and solutions

# **ATLAS COPCO TOOLS NORTH AMERICAN OFFICES**

---

## **USA**

The Auburn Hills facility is the new home of Atlas Copco Tools and Assembly Systems, USA. Opened in the fall of 2014, this site is frequently used to host training courses and seminars. Customers are encouraged to visit and test run our products in our state-of-the-art demonstration areas.

3301 Cross Creek Parkway      Phone: 800-859-ERGO  
Auburn Hills, MI 48326      Service Technical Support:  
    866-TOOLFIX  
    Fax: 248-373-3001

---

## **CANADA**

The Canadian office was opened in 1984 and is a sales and service facility. This office has had ISO 9002 approval since 1997, a quality system that is applied to sales, service, and distribution of air powered and electric hand held power tools.

2240 Argentia Rd. Unit 101      Phone: 901-501-9968  
Mississauga, Ontario      Fax: 901-501-9790

# Your guide to the catalog

## ACCESSORIES INCLUDED

Under this heading a specification is given for each type of tool and of the parts (nipples, keys, guards, etc.) supplied with the tool. Instructions and a list of spare parts are always included in the package.

## OPTIONAL ACCESSORIES

Here you will find the specifications for most of the accessories. They are dependent on the job the tool is to be used for and have to be ordered separately.

## AIR CONSUMPTION

The air consumption of the tools is stated in liters per second, l/s, and relates to free air, i.e., the compressed air expanded to atmospheric pressure. Unless otherwise stated, the figures are valid at a working pressure of 6.3 bar and indicate the maximum air consumption.

Maximum air consumption is valid for the tool without a speed governor when idling, i.e., when the tool is running at no load. A tool with a speed governor, has the maximum air consumption at the maximum power output.

## SPEED

The tool speeds are indicated in revolutions per minute, r/min, and indicate the idling speed, i.e., the speed at which the tool runs at no load and at a working pressure of 6.3 bar, if not otherwise specified. The speed at max. output is 50% of the idling speed for tools without a speed governor and 80 – 90% of the idling speed for tools with a speed governor.

## SELECTED SERVICE KITS TO ORDER

Under this heading, service kits for the most frequent service jobs done on the tool in question are listed.

## VIBRATION AND NOISE EMISSION

Vibration values referring to the ISO 28927 are always given as a measured vibration value and an uncertainty. The uncertainty is an indication of the spread in the vibration when measured. The spread in the in-use vibration emitted in a real work situation is at least of the same magnitude, often considerably bigger.

Vibration values referring to ISO 28927 can in many cases also be used as rough estimates of the in-use vibration values when tools are used in typical applications.

In-use vibration is influenced by factors beyond our control such as poor maintenance, pirate parts, unbalanced grinding wheels, etc.

When measuring noise, Atlas Copco uses the standard ISO 15744. The figure given in this catalogue is the measured sound pressure level. If the measured value exceeds 80 dB(A), the sound power level is

also given. The standards describe how to calculate this figure. The uncertainty in the figures from variations in the test method and production is 3 dB(A). In-use noise values close to the operator's ear may differ considerably from the given values particularly since in many applications the sound from the process is higher than the unloaded tool noise.

We, Atlas Copco Tools AB, cannot be held liable for the consequences of using the declared values, instead of values reflecting the actual exposure, in an individual risk assessment in a workplace situation over which we have no control. We recommend a program of health surveillance to detect early symptoms which may relate to noise or vibration exposure, so that management procedures can be modified to help prevent future impairment.

# Introduction – Pneumatic Assembly Tools

## Fast, accurate and operator friendly

Atlas Copco supplies a broad range of pneumatic assembly tools designed to give you highest possible productivity on your assembly line. The result of decades of development, the tools include ergonomically designed screwdrivers, pulse tools, nutrunners and impact wrenches, that offer superior productivity. High productive tools means less air consumption that translates into big energy savings since energy consumption and CO<sub>2</sub> emissions are reduced. Vibration and noise levels are minimized, power-to-weight ratios are high. It all adds up to maximum operator comfort and highest individual productivity.

### IMPACT WRENCHES (LMS)

Impact wrenches have unmatched speed and power-to-weight characteristics, which makes them ideal e.g. for loosening applications. They productify raw power and cover a wide torque range including both non shut-off and shut-off models. They are also reaction free.

### IMPULSE TOOLS (ERGOPULSE PTI, XS, PTS, PTX)

Impulse tools are the ideal choice for fast and reaction-free one-hand tightenings. They have the same advantages as impact wrenches but with higher accuracy. In addition you will get a tool with good ergonomics, which means lower sound levels and less vibrations. Pulse tools also have a longer service life. They come in non shut-off and shut-off version.

### SCREWDRIVERS

We offer a wide range of extremely accurate, ergonomically designed screwdrivers for all kinds of jobs involving smaller screw sizes, up to M6. All models are lubrication-free.

- **Direct drive (LUD, LUF, HRD)**

The low cost alternative for wood and self-drilling screws.

- **Slip clutch (TWIST, LUF)**

Best for sheet metal screws, wood screws or self-tapping screws.

- **Shut-off control (LUM)**

Best practice in most cases, especially for machine screws and screws in plastic. Very good accuracy and lowest bit consumption.

### NUTRUNNERS

Suitable for all kinds of tightening tasks from 0.5 Nm, nutrunners in Atlas Copco's extensive range are extremely accurate. Due to their ergonomic designs they are also very comfortable to operate. All models are lubrication-free.

- **Angle and straight type (LTV, LTD)**

Accurate workhorses for limited spaces suitable for high volume serial production. Very good accuracy, small angle head and possible to attach special heads. Low noise and vibration levels.

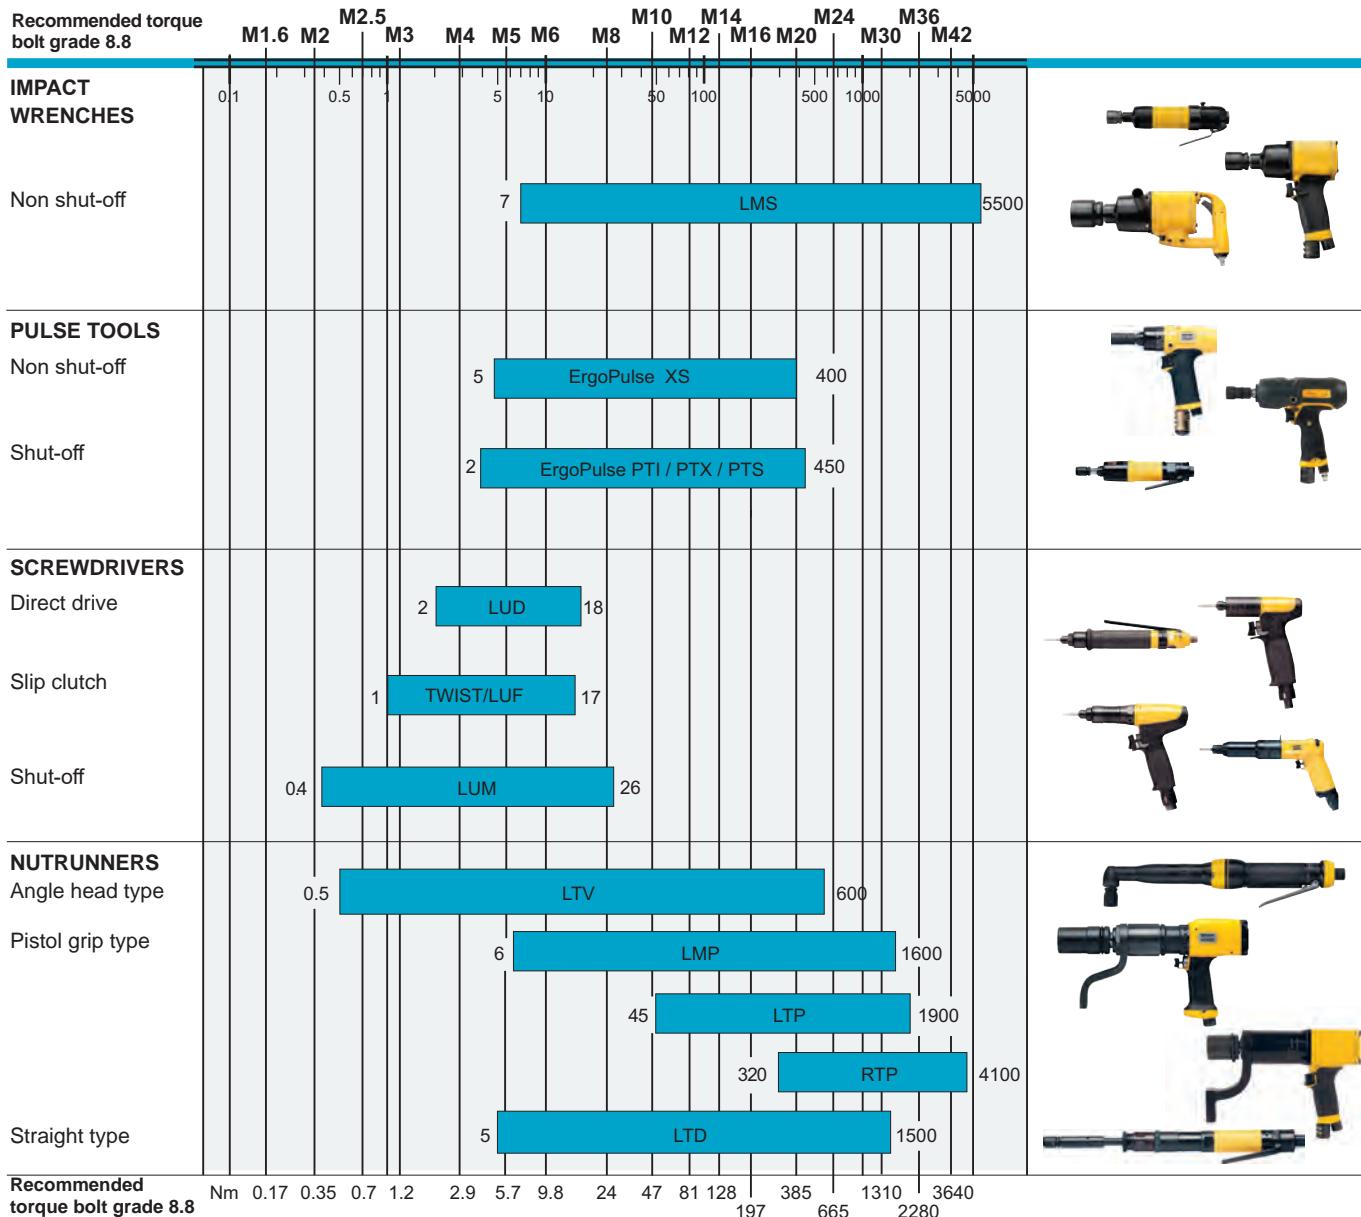

- **Pistol grip type (LMP, LTP)**

High torque tools for super fast, accurate tightenings. Low noise, and low vibration tools for operator comfort.

### RTP NUTRUNNERS

Whatever your industry, if your operations include loosening or tightening heavy duty bolts, Atlas Copco's slim, lightweight RTP pneumatic nutrunner can help increase your productivity.

Among the smallest on the market, the RTP's slim gearpack gives you effortless access to bolts in cramped spaces. Tightening accuracy and repeatability are high. Noise and vibration levels are lower than in traditional impact wrenches.

## TORQUE RECOMMENDATIONS

The torque is important to ensure the required clamping force. The table shows the recommended max tightening torque for the most common types of screws and bolts: untreated, oil-smearred screws (friction coefficient = 0.125) with metric coarse thread. The torque corresponds to approximately 62% of tensile stress.

**M-threaded screws/bolts** Tightening torque Nm, according to ISO 898/1

| Thread | Bolt grade |       |       |      |      |      | Thread | Bolt grade |      |      |      |      |      |      |
|--------|------------|-------|-------|------|------|------|--------|------------|------|------|------|------|------|------|

## High accuracy, good ergonomics

*Atlas Copco pneumatic screwdrivers bring accuracy and good ergonomics into the production process, while offering robust, reliable designs. The range includes models to fit any low torque application. The tools are available in pistol grip, angle and straight configurations with drive types spanning a wide range of speeds and torques.*

In this range of pneumatic screwdrivers, the proven and patented Atlas Copco clutch design gives high torque accuracy and repeatable results over time. All screwdrivers are lightweight, with optimum non-slip grip and handle design for operator comfort. A fast shut-off clutch give minimum reaction impulse, thus reducing operator strain. All Atlas Copco screwdrivers can be used as lubrication-free.

### A COMPLETE RANGE

Our pneumatic screwdrivers are available in pistol grip, angle and straight configurations. The LUM, TWIST, LUF and LUD models are pistol grip and straight tools, and the LTV is an angle tool.

### SHUT-OFF TYPE SCREWDRIVERS

LUM and LTV models have a fast and accurate shut-off clutch for smooth performance and high quality tightening. They are suitable for joints with demands on torque accuracy, providing accurate tightening time-after-time, independent of variations in joint stiffness. Electro Static Discharge (ESD) approved models and RE models are available in this range. RE models enable a signal to be received from the tool, in order to control batch count. All RE models need to be combined with an external RE control system. Shut-off tools are the best choice for machine screws, thread-rolling screws and thread-forming screws for plastic.

### SLIP CLUTCH TYPE SCREWDRIVERS

TWIST and LUF HR screwdrivers have a slip clutch that applies a pulsating force when the torque level is reached. These tools are suitable where the torque level may temporarily rise during the rundown phase, for instance when using sheet metal screws, wood screws or self-tapping screws.

### DIRECT DRIVE TYPE SCREWDRIVERS

LUD and LUF HRD are direct drive screwdrivers that stall when final torque is reached. The torque level is adjusted by regulating the air pressure. LUD and LUF HRD are mainly used for self-drilling and wood screws.

 Shut-off clutch    Slip clutch

 Direct drive

\*With optional coupling-ring.

Ordering No. 4210 2316 01

\*With optional spring.

Ordering No. 4210 1831 00

## Pistol Grip Models

## Shut-off

The LUM pistol grip range comes in several different configurations:

- HR: Model with traditional-grip can be used with high grip when feed force is needed or with low grip for minimal reaction force.
- HRX: Model with balanced grip perfectly balanced for standard pistol grip applications.
- HRF: Balanced grip with multiple air inlets for flexible connection.
- The LUM32 model has the highest force to weight ratio amongst the pneumatic screwdrivers. It is also a tool with low reaction force and fast shut-off because of the position of the clutch.

RE reporting models are available, designated with suffix -RE.

<sup>a</sup> 1/4" square drive.

All models: Are reversible and have quick change chuck.

All data at an air pressure of 6.3 bar.

For operator comfort a support handle is recommended for high torque, see Optional Accessories.

## Pistol Grip Models

## Direct Drive

The LUD and LUF pistol grip range comes in several different configurations:

- HR/HRD: Model with traditional-grip can be used with high grip when feed force is needed or with low grip for minimal reaction force.
- HRX: Models with balanced grip are perfectly balanced for standard pistol grip applications.

All models: Are reversible.

Are equipped with a 1/4" female hexagon drive for bits.

Combi-tools are delivered with drill chuck and 1/4" female hex drive for bits.

Torque range is reached by adjusting the air pressure between minimum 3 bar and maximum 6 bar.

The TWIST and LUF pistol grip range comes in several different configurations:

- HR: Model with traditional-grip can be used with high grip when feed force is needed or with low grip for minimal reaction force.
- HRX: models with balanced grip are perfectly balanced for standard pistol grip applications.
- HRF: Balanced grip with multiple air inlets for flexible connection.

All models: Are reversible.

Are equipped with a 1/4" female hexagon drive for bits.

Have quick change chuck.

All data at an air pressure of 6.3 bar.

# Straight Models

# Shut-off

Straight screwdrivers should be used with a torque arm for best ergonomics.

LUM straight screwdrivers come in two different configurations:

- PR: Model with push-to-start function and reverse button.
- SR: Model with lever start function and reverse ring.

RE reporting conversion kits are available for SR models, see accessory page.

Soft stop options are available, designated with the suffix -SS.

LUM12 PR

LUM12 SR

## Slip-clutch

## Straight Models

Straight screwdrivers should be used with a torque arm for best ergonomics

The TWIST straight screwdrivers come in two different configurations:

- PR: Model with push to start function and reverse button
- SR: Model with lever start function and reverse ring.

## Angle Models

## Shut-off

LTV angle screwdriver models have a fast, accurate shut-off clutch and are designed for durability.

- Slim design of the angle head allows good access in limited spaces and awkward positions.
- Spiral cut gears give high accuracy.

RE reporting conversion kits are available for LTV screwdriver models. For kit, see accessory page.

## Accessories Included

### EXHAUST HOSE

Included with straight and air-on-top models

### CLUTCH ADJUSTMENT KEY

Included with all shut-off and slip clutch tools

*Clutch adjustment key*

## Optional Accessories

| Designation       | Exhaust hose | Support handle | ESD hose     | Torque arms adapters | Installation proposal | ESD approved pistol handle |

***Service Kits***

The spare parts included in the service kits cover a normal overhaul of your tool. Always have them available for a fast and economical repair.

## Main parts included:

- Vane kit                  • O-rings
- Motor bearings         • Circlips
- Gaskets                  • Pins etc.

# Power you can depend on

*Atlas Copco impact wrenches are designed to provide dependability and a long, trouble-free service life in the toughest conditions. Few other tools can match the Atlas Copco impact wrench when it comes to flexibility, capacity-to-weight ratio and simplicity in use and maintenance.*

Atlas Copco's powerful, high-speed impact wrenches are designed to cut production times by providing rapid run-down and fast tightening. Impact wrenches build up torque in joints through a series of rotary impacts, where air pressure and tightening time affect the torque obtained. As a general rule, if a wrench impacts longer than 5 seconds on a fastener, a larger wrench should be used in order to achieve better durability.

The LMS models are non shut-off, which means they will shut off once the operator releases the trigger.

### LMS

The LMS is a non shut-off impact wrench with extraordinary power to weight qualities and virtually no reaction force during tightening. The torque is applied to the joint, not to your wrist.

These tools are typically used where fast tightening or disassembly is needed and the range covers recommended torque levels between 7-5500 Nm.

### LMS 8-SERIES

The LMS 8-series impact wrenches delivers true raw power and enables extremely fast tightening and loosening.

The innovative and unique Grease Retaining System ensures maximum tool performance with long service intervals.

### MINIMUM WEAR AND LOW VIBRATIONS

Each part of the durable LMS8-Series impact mechanism is produced with a very precise accuracy. This allows the maximum amount of energy to be generated in each impact. It also minimizes wear, vibration and strain on the operator.

■ = **HEAVY DUTY**

■ = **EXTRA HEAVY DUTY**

The torque figures are normal tightening torque for untreated oil-smeared and rust-protected bolts and nuts in the most common strength grades. The torque figures correspond to approximately 63% of tensile stress.

**LMS MODELS**

- Recommended operating range 7-1800 Nm.
- Fast tightening and disassembly.
- Negligible reaction force.
- Low weight.
- High power-to-weight ratio.
- Tightening time should not exceed 5 seconds, to avoid excess wear on the tool.
- Soft-start throttle.
- Long service intervals.
- Durable high performance with Grease Retaining System.

### LMS MODELS

- Recommended operating range 7-5500 Nm.
- Fast tightening and disassembly.
- Negligible reaction force.
- Low weight.
- High power-to-weight ratio.
- Soft-start throttle.
- Tightening time should not exceed 5 seconds, to avoid excess wear on the tool.
- Long service intervals.
- Durable high performance with grease retaining system.

## ErgoPulse impulse tools – fast, reliable and operator friendly

*The speed, reliability, and accuracy of ErgoPulse hydraulic impulse nutrunners, combined with the fact that they are comfortable to operate, make them suitable for continuous heavy production. Since there is no metal-to-metal impact in a pulse tool, it provides a softer, more controlled pulse with considerably less vibration and noise than an impact wrench.*

### A COMPLETE RANGE

ErgoPulse impulse tools are available in straight and pistol grip, shut-off and non shut-off, as well as high- and low pressure versions. The range covers torque from 2–450 Nm.

The ErgoPulse principle – The heart of a pulse tool is the hydraulic pulse unit. Since the pulses are very short, there is almost no reaction force in the handle, only the much lower motor torque is transferred to the operator's hand. In addition, there are less vibrations and noise than with an impact wrench. Combined with good balance and low weight the result is a tool that is very comfortable to operate.

Atlas Copco offer both shut-off and non shut-off tools. The shut-off pulse tools shut off the air supply when the pre-set torque is been reached. Operator influence is minimized and the result is increased accuracy and faster tightening. The torque is "sensed" by means of a rotatable inertial mass acting against an adjustable spring. The result is a highly accurate and easily adjustable shut-off system. Non shut-off tools are operator dependent and preferred when the goal is to have a process controlled by the operator.

### ERGOPULSE PTI TOOLS

Our newest addition in the ErgoPulse shut-off tool range is the PTI. With the redesigned pulse unit technology DuraPulse® up-time of the tool is increased up to five times. It also offers the highest accuracy of all ErgoPulse tools as it's equipped with a more fine tuned shut-off mechanism. There is no need to choose between Trim and Autotrim function; the Multitrim function enables the use of both in the same tool, thus reducing meanshift on different types of joints.

With growing demands of increased production rate, the new TorqueBoost® technology creates faster torque build

up to reduce time per production unit. As per Atlas Copco standard, this tool is well balanced and created with superior ergonomics for maximum operator comfort in mind. The handle is designed for conventional use, and for use upside down. Available in a torque range from 8–150 Nm (6–110 ft lb) and in both high - and low pressure versions, the ErgoPulse PTI fills the needs of most applications requiring a pulse tool.

### ERGOPULSE PTS AND PTX TOOLS

Pulse mechanism – The pulse mechanism of the shut-off tools (including PTI) has pistons for minimum weight and long service life. The design is based on cam-guided pistons and rollers and the pulse cylinder is oil-filled. The moving parts are thus completely immersed in oil, which ensures a long service life.

Twin chamber vane motor – This is designed to give high torque at low speed, which gives the best characteristics for fast, accurate tightening.

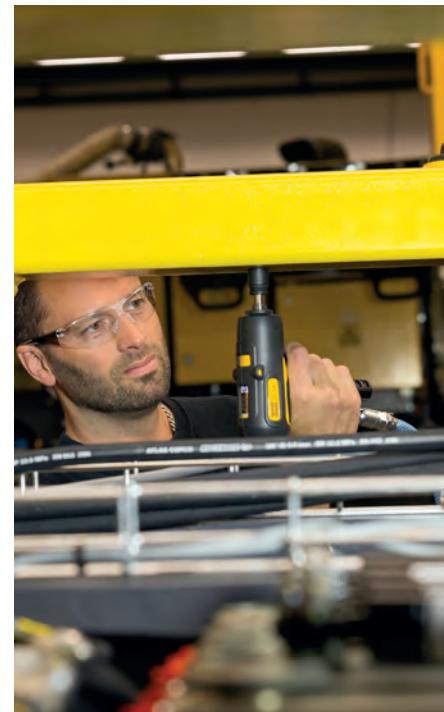

TRIM valve – A patented adjustable valve at the air outlet is used to maximize tool accuracy on one type of joint, which could be hard, medium or soft.

AUTOTRIM valve – PTS/PTX-AT tools are equipped with an automatic two-stage trim valve. The tool runs down the screw with reduced free speed. After 1-2 pulses it shifts automatically to full power thus enabling both hard and soft joints to be tightened with excellent results without any adjustments.

The tools are available in both Trim and AutoTrim versions.

### ERGOPULSE XS TOOLS

The XS non shut-off tool is the correct choice when the operator needs to control the process. The tools provide high torque, fast, accurate tightening and long service lifetimes.

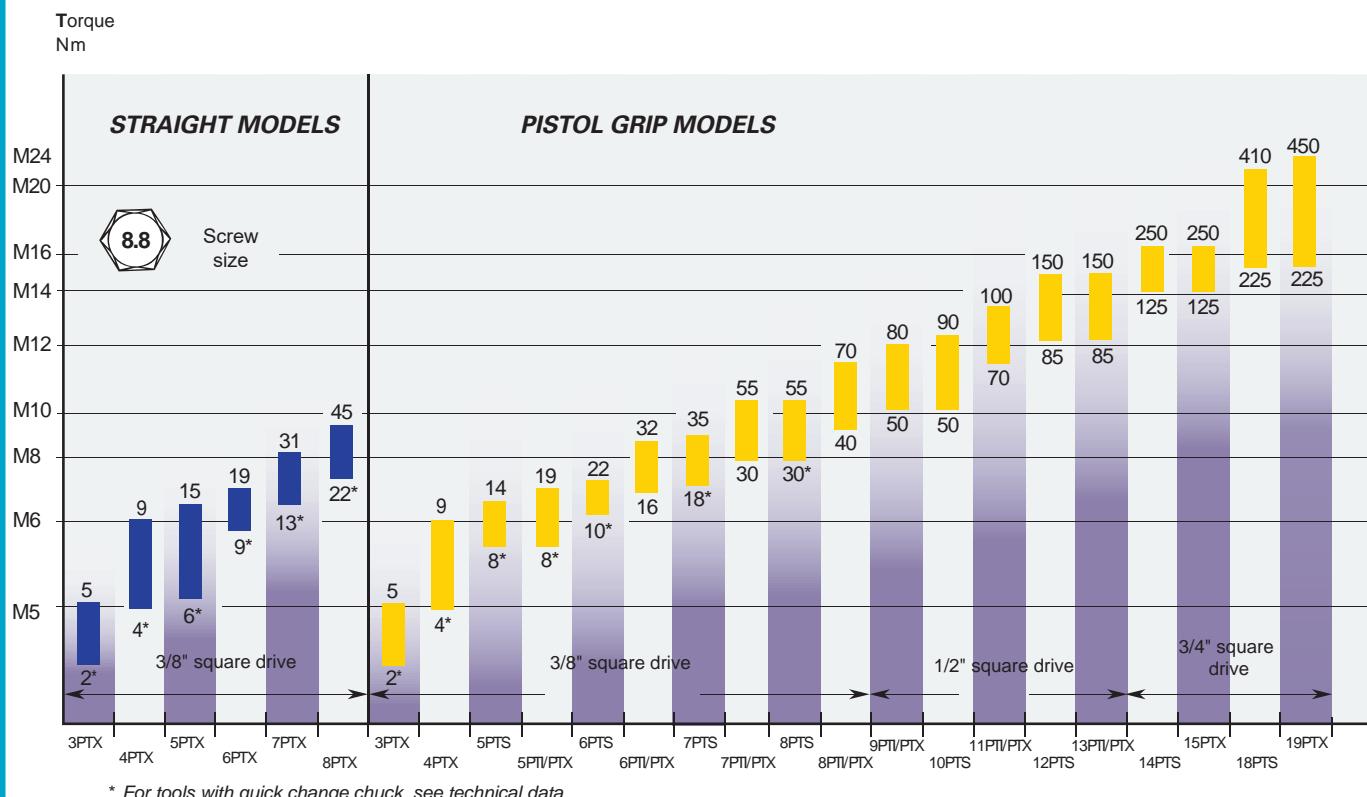

Twin chamber vane motor – This is designed to give high torque at low speed, which provides the best characteristics for fast, reliable and accurate tightening.

Double or triple bladed pulse mechanisms – The tools are equipped with pulse units with two or three blades. They employ the Atlas Copco patented cam-guided design to push out the blades, giving very high reliability. The pulse units have a high power-to-weight ratio, making the tools very powerful for their size. Torque is adjusted by regulating an artificial leak in the hydraulic circuit.

# Selection Guide

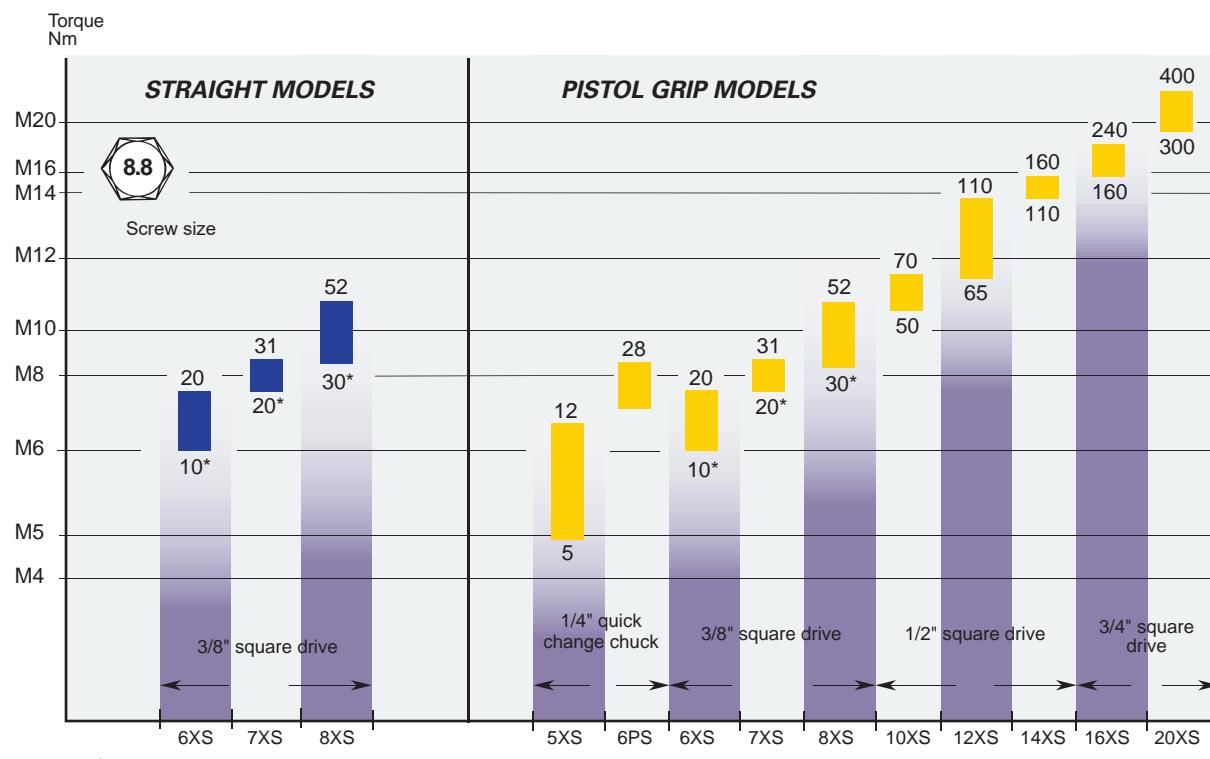

## EP PTI/PTS/PTX SHUT-OFF MODELS

The ErgoPulse PTI, PTS and PTX tools can be adjusted within a wide torque range by simply setting the spring force that counteracts the inertia body. Torque should preferably be checked with a hand torque wrench. Electronic monitoring with an in-line transducer is possible but should be verified with a manual hand torque wrench to avoid measuring errors due to the extremely short pulse sequence.

## EP XS/PS NON SHUT-OFF MODELS

The size of tool is determined on the basis of torque and/or bolt dimension. Torque should preferably be checked with a hand torque wrench. Electronic monitoring with an in-line transducer is possible but should be verified with a manual hand torque wrench to avoid measuring errors due to the extremely short pulse sequence.

**EP PTI MODELS**

The unique design of the ErgoPulse PTI shut-off hydraulic impulse tools brings pulse tool performance up to a level never experienced before.

PTI is our new generation of pulse tools offering superior uptime, ergonomics and productivity.

- TorqueBoost® for faster tightenings.
- MultiTrim® function integrated in tool.
- DuraPulse® technology allows for up to 5 times longer use before maintenance is required.
- Separate RE-port integrated in all tool models.
- High level of durability.
- Well balanced with superior ergonomics.
- New handle shape enabling tool use upside down.
- High speed, short cycle times.
- High power-to-weight ratio.
- No reaction forces.
- Low noise levels.
- Lubrication free.

<sup>a</sup> To be used as a guide only, final torque depends on type of joint, accessories used and air pressure.

<sup>b</sup> In full speed mode.

<sup>d</sup> Air pressure 4 bar / 58 psi.

<sup>c</sup> Air pressure 6.3 bar / 91 psi.

**NOTE:** Protective cover is included for every tool.

# Pistol Grip Models

# Shut-off

## EP PTX MODELS

In ErgoPulse shut-off tools the air supply is shut off as soon as the pre-set torque has been reached, minimizing operator influence. The result is increased accuracy and faster tightening.

- High reliability.
- Consistent torque over time, low mean-shift.
- High level of durability.
- High speed, short cycle times.
- One-handed operation.
- High power-to-weight ratio.
- No springs to wear out.
- No wear on key parts.
- High precision components.
- No reaction forces.
- Light, well-balanced tools.
- Low noise levels.
- Lubrication free.

<sup>a</sup>To be used as a guide only, final torque depends on type of joint, accessories used and air pressure.

<sup>b</sup>Female hexagon drive. Quick change chuck.

<sup>c</sup>In full speed mode.

<sup>d</sup>Air pressure 4 bar / 58 psi.

## EP PTS MODELS

ErgoPulse PTS is the reliable and powerful workhorse and offers the same shut-off mechanism as the peak performer PTI. All PTS models can also be used as lubrication free, just like other ErgoPulse tools.

<sup>a</sup> To be used as a guide only, final torque depends on type of joint, accessories used and air pressure.

<sup>b</sup> Female hexagon drive. Quick change chuck.

<sup>d</sup> In full speed mode.

<sup>c</sup> With TRIM valve fully open.

## Pistol Grip Models

## Non Shut-off

### EP XS MODELS

In ErgoPulse non shut-off tools the tool produces pulses until the operator releases the trigger. Preferred in applications where it is an advantage for the operator to be able to control the process by shutting off the tool manually.

- High reliability and durability.
- High speed, short cycle times.
- One-handed operation.
- High power-to-weight ratio.
- No springs to wear out.
- High precision components.
- No reaction forces.
- Light, well-balanced tools.
- Low noise levels.
- Lubrication free.

<sup>a</sup> To be used as a guide only, final torque depends on type of joint, accessories used and air pressure.

<sup>b</sup> Female hexagon drive. Quick change chuck.

<sup>c</sup> Torque is adjusted by regulating the air pressure.

**EP PTX MODELS**

In ErgoPulse shut-off tools the air supply is shut off as soon as the pre-set torque has been reached, minimizing operator influence. The result is increased accuracy and faster tightening.

- High reliability.
- Consistent torque over time.
- High level of durability.
- High speed, short cycle times.
- One-handed operation.
- High power-to-weight ratio.
- No springs to wear out.
- High precision components.
- No reaction forces.
- Low noise levels.
- Lubrication free.

<sup>a</sup> To be used as a guide only, final torque depends on type of joint, accessories used and air pressure.

<sup>d</sup> With TRIM valve fully open.  
<sup>e</sup> Air pressure 4 bar / 58 psi.

<sup>b</sup> Female hexagon drive. Quick change chuck.

<sup>c</sup> In full speed mode.

## Straight Models

## Non Shut-off

### XS MODELS

In ErgoPulse non shut-off tools the tool produces pulses until the operator releases the trigger. Preferred in applications where it is an advantage for the operator to be able to control the process by shutting off the tool manually.

- High reliability and durability.
- High speed, short cycle times.
- One-handed operation.
- High power-to-weight ratio.
- No springs to wear out.
- No wear on key parts.
- High precision components.
- No reaction forces.
- Light, well-balanced tools.
- Low noise levels.
- Lubrication free.

# User-friendly tools offering power, speed and accuracy

*The tools in Atlas Copco's broad range of pneumatic nutrunners offer a superior combination of power, speed and accuracy. With their advanced ergonomic designs, they are also extremely user-friendly and will contribute to raising productivity in a wide range of applications in your assembly plant.*

Tools in Atlas Copco's range of pneumatic nutrunners are divided into three main categories: Angle, straight and pistol grip versions. These are also available in optional models, such as crowfoot, hold-and-drive, and flush socket.

### THE POWER TO RAISE PRODUCTIVITY

The high power output provided by Atlas Copco nutrunners is decisive for productivity, i.e., the combined performance of operator and tool. The tools are set at the optimal speed for every torque capacity rating. The balance between speed and clutch response gives high accuracy, ensuring torque repeatability, regardless of joint characteristics.

### COMFORTABLE TO WORK WITH

Our pneumatic nutrunners live up to Atlas Copco's reputation for developing tools with good ergonomics. Low tool weights, thermally insulated grips and low noise and vibration levels all help to reduce operator fatigue and raise individual productivity in your plant.

Simplicity in selection and installation allow you to set the torque once and that is the torque you will get, joint after joint, without complicated analyses.

### CHOOSING THE RIGHT TOOL IS EASY

No joint is too complicated for a nutrunner. To set the torque, just adjust it to the required level, regardless of joint conditions.

# Introduction – Angle Nutrunners

## A new angle on productivity

The LTV 9-2 and LTV 8 angle nutrunner range from Atlas Copco successfully combines two key performance factors – speed and accuracy. Consistently accurate, high-speed tightening is complemented by advanced ergonomic design, ensuring an unmatched level of productivity. All this is presented in a tool that is very easy to handle.

Angle nutrunners from Atlas Copco are certified for accuracy and durability by major car manufacturers. They are easy to choose, easy to set, and easy to operate.

### ACCURATE EVERY TIME

Hard or soft joint? You don't need to think about it. The tool gives the torque you install, independent of joint variations and variations in air pressure and lubrication. The clutch shuts off at the same torque, tightening after tightening.

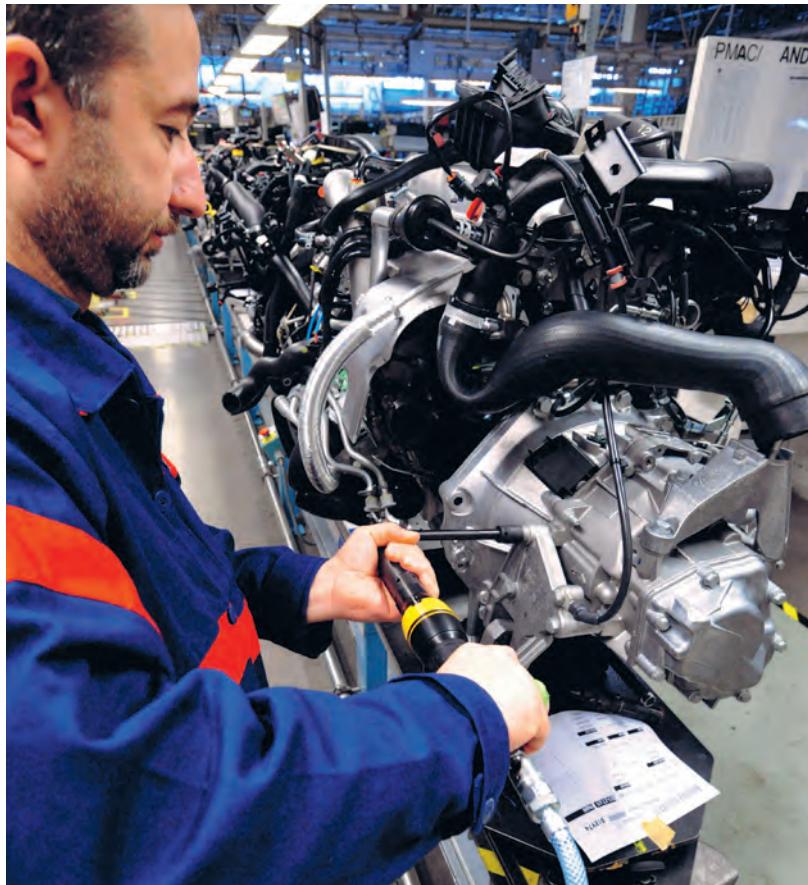

### HIGHEST PRODUCTIVITY

Instant disengagement of the clutch keeps torque over-shoot to a minimum even on the fastest tools. Our new models were developed to meet the most extreme requirements on operational speeds.

As always, we kept operator comfort in mind. The tools are well balanced, slim and comfortable to handle. Reaction forces are extremely low.

### JOB VERIFICATION

For remote indication of clutch release function the tools can be equipped with air signal outlet – RE. This is often used for counting the number of fasteners in a tightening cycle.

**LTV29-2 SERIES**

- Designed for high speed and small dimensions.
- Slim lightweight design.
- Soft, comfortable grip.
- Easy to reverse.
- Low reaction force.
- Spiral cut angle gears.

LTV29-2

**LTV39-2 SERIES**

- The fastest nutrunners of this type.
- Powerful motor.
- Consistently high accuracy.
- Many operator-friendly features.
- Spiral cut angle gears.

LTV39-2

**LTV FS FLUSH SOCKET TOOLS**

- Minimum angle head size gives good access.
- High torque accuracy.
- Integrated sockets give reduced angle head height.
- Spiral cut angle gears.

<sup>a</sup> Quick change chuck. <sup>b</sup> Female hex drive. B - Ball retainer

NOTE: All LTV29/39 with -10 (3/8) square drives can be used as either pin or ball retainer.

# Angle Nutrunners

# Shut-off

## LTV28 AND 38 SERIES

- Highest reliability when tightening M5-M12 screws.
- Small, durable gears.
- Precise clutch.
- Reliable motor.
- Spiral cut angle gears.

LTV28

## LTV48 SERIES

- Robust, reliable tools.
- Reversible for torques up to 200 Nm.
- Comfortable to operate due to low weight and smooth handles.
- Reaction bars and other accessories available.
- Spiral cut angle gears.

LTV38

LTV48

## LTV FS FLUSH SOCKET TOOLS

- Minimum angle head size gives good access.
- High torque accuracy.
- Integrated sockets give reduced angle head height.
- Spiral cut angle gears.

<sup>a</sup> Female hex drive.

<sup>b</sup> Quick change chuck.

**LTV69 SERIES**

- New twin motor – higher rundown speed, accurate tightening.
- High torques.
- Good access in cramped spaces.
- Spiral cut angle gears.

LTV69

**HOLD AND DRIVE**

Hold and drive bolts are being used increasingly by, for example, truck manufacturers on the frame assembly line, making what used to be a two-man operation, a one-man task. The distinguishing feature of a hold and drive bolt is that one part is held and the other is tightened from the same side.

**LTV HAD**

- Especially suitable for shock absorber assembly.
- Special tools based on the standard LTV series are available for use on hold and drive bolts.
- HAD sockets are available in three different lengths.
- Special sockets available upon request.
- Also suitable for break-away bolts, Hi Lok/Hi Shear.

LTV48 R200 HAD

**NOTE:** To reduce the reaction force in the holder, the use of a reaction bar is recommended.

<sup>a</sup> At min 5 bar.

<sup>b</sup> For low torque applications.

**NOTE:** For sockets and holders see accessory pages.

Other types of Hold and Drive equipped tools are available on special request.

## Non Shut-off

## Angle Nutrunners

### STALL TYPE

- Low inertia design gives accurate torque independent of joint stiffness – in other words, low mean shift.
- Easy torque setting by adjusting the inlet air pressure.
- Reliable, well-proven design.
- Good accessibility due to small dimensioned angle head.

### RATCHET WRENCHES

- Unique accessibility, the ratchet wrench is a superior tool for limited space applications.
- To loosen, turn the tool upside down.

<sup>a</sup> Female hex drive.

### WORM-DRIVE NUTRUNNERS

- Teasing throttle characteristics give significantly reduced free speed.
- Suitable for:
  - Nutrunning
  - Light reaming
  - Tapping
  - Tube-rolling
- Can also be incorporated in rigs as air motors for intermittent operation.

NOTE: Tool nipple is not included in the Productivity kit and needs to be ordered separately together with the tool.

## Service Kits

The spare parts included in the service kits cover a normal overhaul of your tool. Always have them available for a fast and economical repair.

Main parts included:

- Vane kit                  • O-rings
- Motor bearings         • Circlips
- Gaskets                 • Pins etc.

| LTV38   | 4081 0103 90 |
| LTV39-2 | 4081 0298 90 |
| LTV48   | 4081 0236 90 |
| LTV69   | 4081 0397 90 |

# Introduction – Straight Nutrunners

## Fast, flexible and user-friendly

The LTD system offers a flexible, low-cost solution to many advanced tightening requirements. With fixtured tools the operator influence is minimized and very high torque accuracy is achieved.

### ARTICULATING ARMS

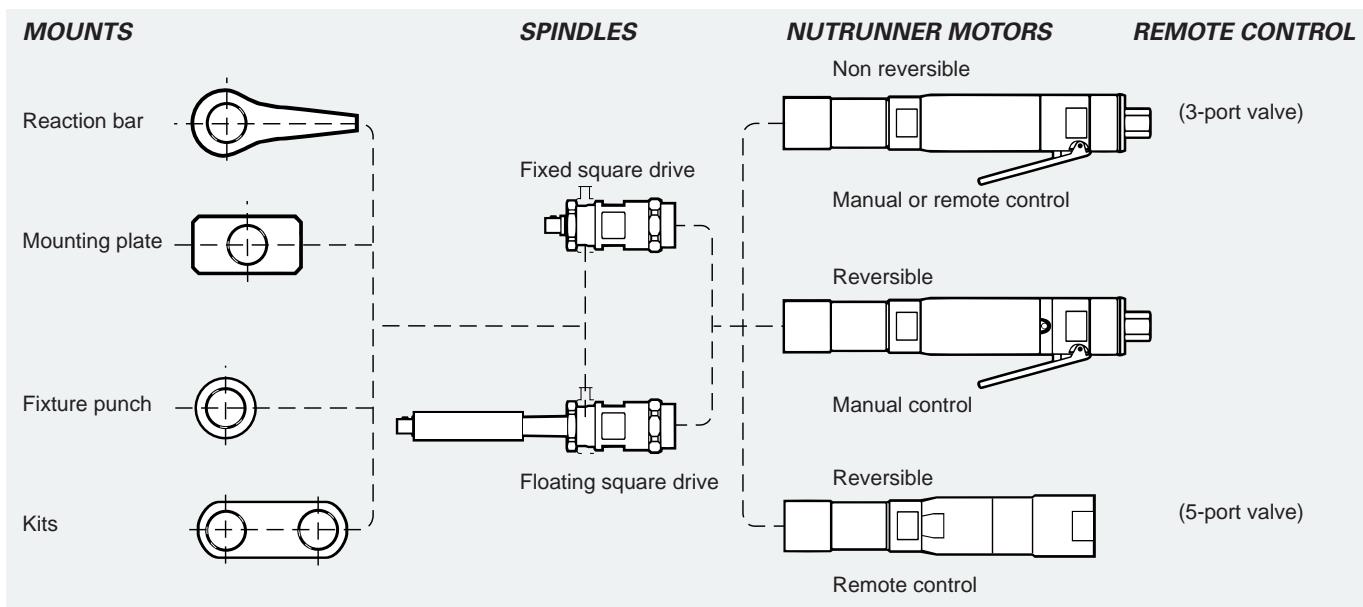

Where a fixed support on the workpiece for a reaction bar is not available, a telescopic or articulated arm mounted LTD nutrunner can be an efficient solution.

- **Reaction bar blanks** – For single spindle hand-held applications.
- **Mounting plates** – The LTD straight nutrunners have a splined reaction bar connection which can also be used for fixed assembly of the nutrunner. A number of standard mounting plates are available to order.

- **Floating square drive** – For two or more spindles the units must usually have floating spindles to compensate for run-down variations. Models with floating square drive or telescopic front parts are available.
- **Fixture punches** – For mounting of the nutrunner to locally made base plates a punch for the splines connection is available as optional equipment.

- **Air signal outlets** – All LTD models are equipped with air signal outlets for completed operation.

### THE LTD SYSTEM

## Shut-off

## Straight Nutrunners

LTD28, 38 and 48 straight nutrunners are based on the power package and clutch from the LTV angle nutrunners.

LTD nutrunners are based on the unique LTP range of twin motor pistol grip nutrunners. With fast run-down and accurate final tightening they offer high productivity and unmatched torque accuracy as well as joint independence.

- Remote control back head – A remote valve is connected to the back head of the LTD-RR tools allowing a better multiple.
- Accessibility – Slim design allows the building of smooth, simple multiples or paired spindle designs. The absence of a clutch makes these tools shorter.
- Flexibility – The range of LTD tools provides you with the options you need to meet your requirements.
- Reversibility – Reversible LTD tools are available.

# An optimum combination of torque, speed and weight

*With the range of pistol grip nutrunners from Atlas Copco you get the highest possible torque and speed in relation to the weight of the tool. Fast, accurate and highly operator friendly, the tools are available in reversible versions for maximum flexibility.*

### **FAST AND ACCURATE**

In LTP/LMP61 tools the twin motor concept provides extremely fast rundown with good torque accuracy, even on soft joints.

### **OPERATOR FRIENDLY**

Our pistol grip nutrunners are comfortable to operate. The reaction bar eliminates reaction forces and the exhaust through the handle arrangement keeps noise levels low.

Single-handed operation combined with the low weight and perfectly balanced pistol grip design make LMP61 and LTP61 nutrunners safe and comfortable to use.

### **REVERSIBLE FOR MAXIMUM FLEXIBILITY**

Being able to loosen fasteners without changing tools saves time and effort and raises productivity.

# Pistol Grip Nutrunners

## Non Shut-off

The twin motor in the 61 series gives faster production and increased accuracy with a minimum of air consumption. Torque level on LMP models depends on the pressure of the air fed to the tool, higher pressure creates higher torque.

- High torque accuracy.
- Swiveling function makes tool positioning easy on the 61 series.
- Fast rundown motor saves time.
- Extremely good torque output to weight ratio compared to single motor pistol grip nutrunners.
- Available as both reversible and non-reversible models.

<sup>a</sup> Weight excluding reaction bar.

NOTE: Change over torque is around 4% of maximum

torque on a given air pressure.

Recommended hose (61 series) size 13 mm for  
hose length up to 5 m and 16 mm hose size for  
length 5-10 m.

## Shut-off

## Pistol Grip Nutrunners

- LTP61 models are equipped with twin motors and a shut-off valve to ensure that the tool shuts off when the preset torque level is reached.
- Rundown is twice as fast as the LTP51.
- High torque accuracy.
- Extremely high torque output to weight ratio.
- A reversible tool with fixed positions for both forward and reverse.

<sup>a</sup>Without reaction bar.

**NOTE:** Change over torque is around 4% of maximum torque on a given air pressure.

Recommended hose size 13 mm for hose length up to 5 m and 16 mm hose size for lenght 5-10 m.

# Pistol Grip Nutrunners

## Shut-off

### FOR PREVAILING APPLICATIONS

- LTP61X PH is specially designed to handle prevailing applications, such as locking nuts.
- Special gear gives a higher change-over torque.
- Fast rundown motor handles most of the rundown before the slower but stronger tightening motor is used.

LTP61X PH900-25

<sup>a</sup>Without reaction bar.

Recommended hose size 13 mm for hose length up to 5 m and 16 mm hose size for length 5-10 m.

**NOTE:** Change over torque is around 15% of maximum torque on a given air pressure.

## RTP NUTRUNNERS FOR HEAVY DUTY BOLTING

- RTP's slim gearpack gives you effortless access to bolts in cramped spaces.
- The torque output of the RTP is adjusted with an Atlas Copco FRL air pressure unit, helping to prolong the lifetime and torque accuracy of the tool.
- The tool's 1" exchangeable drive simplifies maintenance and cuts repair costs.

## Re Assembly Qualifier II

The RE Assembly Qualifier II provides your operator with visual and audio feedback for error-proofing single or multiple fastener assemblies. When used with a pressure ported pneumatic assembly tool, the RE Assembly Qualifier II verifies fastener installation and fastener count by monitoring pressure differentials during the fastening cycle. The RE Qualifier II monitors internal tool air pressure according to joint characteristics during the assembly process. Your operator will be notified if a correct or an incorrect fastening (such as a re-hit, cross-thread or early trigger release) has occurred. Atlas Copco brings you an intelligent product for error-proofing your fastener assemblies.

- Error-proofing for pneumatic shut-off assembly tools: RE pulse tools, RE screwdrivers and RE nutrunners.
- Verifies fastener installation "Accept/Reject".
- Verifies fastener count.
- Provides audio and visual operator feedback.
- AutoCal™ automatically determines tool type, pulse or continuous drive.
- Password protected.
- External transducer with OK and NOK lights.
- On-screen graphs.
- Stores 1,000 rundowns.
- Dimensions: 8" base, 10" height and 3.3" depth.

## A dynamic range of bolting tools

Frequently chosen by customers in the oil and gas, power generation, wind energy, and other sectors, Atlas Copco world-class bolting tools and software help you maximize process security, minimize human and operational risk and reduce your overall investment costs. Our custom-designed hydraulic bolt tensioners, “smart” hydraulic torque wrench systems, and industry leading electric and pneumatic nutrunners are supported by Atlas Copco's extensive application expertise and worldwide presence.

### IT PAYS TO CHOOSE THE BEST

Atlas Copco's core bolting techniques are hydraulic torque, tensioning, and continuous rotation. Our complete portfolio of advanced bolting tools includes:

- Hydraulic torque wrenches
- Hydraulic bolt tensioning systems

- Electric transducerized nutrunners and pneumatic nutrunners
- Mechatronic and transducerized manual wrenches
- Smart Systems
- Accessories, pumps

We have the best products in all bolting technologies, and all our products are designed and produced inhouse by our own plants in the UK and Sweden.

**SMART SOFTWARE**

## Tentec Airbac bolt tensioners

### ABOUT TENSION

With tensioners, the action is not directly on the nut, instead tension is applied directly to the stud in order to produce stretch. Once the prestretch is achieved, the nut can be tightened. Once the pressure is released the nut holds the load on the bolt. This produces the clamp force. Multiple tensioners can be used together to provide even load when tightening.

### SETTING A NEW STANDARD

- Innovative, market leading technology.
- Minimum operational downtime.
- At least 3 times faster piston retract than spring assisted tensioners.
- Around 20 percent lighter.
- Nickel plated to enhance corrosion resistance.

## RT Advance hydraulic torque wrench system

### ABOUT TORQUE

Using torque tools, such as nutrunners or hydraulic torque wrenches, you turn the nut. As the nut turns, it stretches the stud. The torque setting for the tool translates into load on the connection. When the tools are used following the appropriate specifications for lubrication, coating and other factors, a desired clamp force can be produced.

### OUR FIRST 'SMART' BOLTING SYSTEM

- Torque, angle and time based tightening strategies.
- Tightening feedback with traces.
- Full function remote control.
- 16GB inbuilt memory.
- ToolsNet enabled.
- WiFi: Remote access system support.

The products shown above are just two of our latest innovations. To see our full range of bolting products and solutions, please access our Bolt Tightening Solutions catalog:

## True cordless freedom

Atlas Copco's range of industrial battery assembly tools includes all kind of technologies: shut-off, transducerized, and low reaction tools (LRT). They allow maximum freedom of movement along the line and inside narrow or closed compartments.

### **BCP – BCV BATTERY TOOLS - EXPERIENCE CORDLESS FREEDOM**

The brushless BCP – BCV tools are ideal for quality critical applications where flexibility is essential. Final assembly of cars, offroad vehicles, buses, trucks, aircraft, motorcycles, engines, and white goods are just some examples of applications which can benefit from the performance and accessibility provided by the BCP - BCV tools. The slim, well-balanced design and ergonomic handle make it a pleasure to hold. Its compact size and Lithium-Ion batteries put it among the lightest battery tools on the market. BCP – BCV tools also offer variable speed and plenty of power, with torque levels ranging from 0.8 up to 60 Nm.

All these ergonomic features make the BCP - BCV the kind of tool you can work with all day long.

### **TENSOR SB NUTRUNNERS – TRANS- DUCERIZED BATTERY TOOLS**

The Tensor SB are the tools for quality and critical applications, allows adjustable torque settings and has a transducer to ensure superior joint quality.

A robust metal housing ensures that the Tensor SB will stand up to tough industrial environments. Also the battery is powerful, reliable and has no memory effect, which means increased uptime for your production.

### **TENSOR STB NUTRUNNERS – FAST, LIGHT, TRANSDUCERIZED BATTERY TOOLS**

Ergonomically designed Tensor STB pistol-grip (up to 12 Nm) and angle nutrunners (up to 150 Nm) are ideal for safety critical applications in cramped areas. No other battery powered tool can match Tensor STB's unique fastening performance and advanced process control.

Atlas Copco Industrial Radio Communication (IRC) enables the Tensor STB to be partnered with a Power Focus controller for accurate torque monitoring and full joint traceability. At a typical workstation, one Tensor STB tool can be used for several applications within the same torque range.

### **TENSOR SRB AND TBP – LOW REAC- TION TOOLS**

Tensor SRB, is the evolution to the Tensor STB, designed to support all kinds of tightening strategies, from the traditional direct drive to the most advance Low Reaction Strategies as a TurboTight or Tensor Pulse.

TBP, is redefining what a pulse tool can do. The TBP will change everything you thought you knew about pulse tools. TBP is a cordless tool for one-handed operations, enabling error-proof productions. And our DuraPulse® technology will ensure the robustness of the TBP, making it your new favorite workhorse.

**CROWFOOT AND TUBE NUT MODELS**

BCP screwdrivers offer true cordless freedom and superior ergonomics for the operator, thus contributing to outstanding performance.

- Ergonomic, lightweight pistol-grip design.
- 7 brushless models offering variable speed with a speed setting unit.
- Torque range: 0.8-12 Nm.
- Low speed models available.
- Two 18 V batteries: 2.1 Ah flat pack or 4.2 Ah regular pack.

-L stands for low speed models.

**NOTE:** The tools are set at maximum speed at delivery.

All pistol grip models have 1/4" female hexagon drive for bits with quick change chuck.

## Nutrunners – Clutch Type

BCV

BCV nutrunners are durable and reliable and offer flexible assembly. A lightweight and handy tool for maximum operator comfort.

- Robust yet ergonomic angle tool.
- Torque range 1.5-60 Nm.
- There are 3 Li-Ion batteries, 18 V (2.1 and 4.2 Ah) and 36 V (2.1 Ah).

**TENSOR SB-B**

Tensor SB is Atlas Copco's response to customers who demand a truly superior industrial battery nutrunner. This user-friendly tool is characterized by a combination of quality in every tightening, operator mobility and long-lasting durability. Together these advantages give Tensor SB a unique position on the market.

- Low tool weight and high spindle speed increases productivity.
- Durable metal housing.
- Freedom of working freely in any position.
- Torque range ETV: 2-140 Nm.
- Torque range ETP: 4-12 Nm.

– IRC-B or -B stands for Bluetooth.

– SEL stands for models with premounted Pset selector.

**ETV STB-X4**

- State-of-the-art HMI with extensive functionality.
- Ergonomically designed tool, compact, lightweight, comfortable to work with.
- Durable housing for long service lifetime.
- Excellent accessibility in cramped spaces.
- External antenna gives superior communication reliability.
- Embedded buffer battery.
- Communication during battery recycling.
- Torque range: 2-150 Nm.

<sup>a</sup>Only compatible with Power Focus 6000, for more information about Power Focus see chapter "Controllers and Software".

**ETP STB-X4**

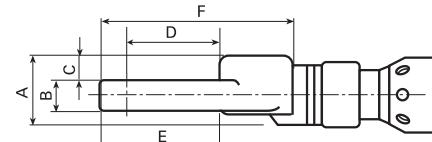

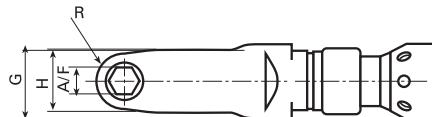

- State-of-the-art HMI with extensive functionality.
- Ergonomically designed tool, compact, lightweight, comfortable to work with.
- Durable housing for long service life-time.
- Excellent accessibility in cramped spaces.
- External antenna gives superior communication reliability.
- Embedded buffer battery.
- Communication during battery recycling.
- Torque range: 2-800 Nm.

## Tensor SRB

## Transducerized Type

The SRB reports wirelessly to the Power Focus 6000 system and takes full advantage of Virtual Stations, able to perform low reaction strategies as TurboTight and Tensor Pulse, and traditional strategies as the two steps.

- Operator feedback and battery status via LED indicator.
- A buffer battery makes battery swaps trouble free.
- Integrated indicator on the battery shows battery and health status.
- Dual antenna.
- Rapid Backup Unit (RBU) functionality.

## TBP

## Transducerized Type

TBP is a low reaction tool with maximum flexibility and high torque. Thanks to the DuraPulse technology the tool uptime is increased and keeps it on the line instead of the tool crib. With TorqueBoost, active cooling and advanced motor steering, the torque build up is fast with reduced hours per production unit and the tool has high productivity.

- DuraPulse technology with new sealing and air separator.
- High torque.
- Excellent ergonomics with low vibrations and reaction force.
- Cooling system to prevent the tool from over-heating.
- Buffer battery.
- Dual antenna.
- Rapid Backup Unit (RBU) functionality.
- LED indicators to provide operator feedback.

# Highest productivity with lowest life-cycle cost

Atlas Copco supplies a comprehensive range of high productivity assembly tools with intelligent controllers and a sharp focus on ergonomics. Our many product lines were developed to meet all your tightening needs and give you lowest life cycle cost. Products range from low torque MicroTorque tools providing 0.01 Nm of torque, to high torque Tensor ST tools, offering up to 4,000 Nm.

### EBL SCREWDRIVER

Low voltage, brushless screwdriver for demanding applications, with shut-off clutch for high fastening precision, time after time.

### MICROTORQUE SCREWDRIVERS

The most innovative and reliable low torque screwdrivers on the market to ensure high productivity and quality in all joints. The new groundbreaking controller, MTF6000, is designed for Industry 4.0. With the fixtured QMC series, or the handheld ETD M ABL V2 series, it is the ultimate solution to improve the competitiveness of any manufacturing process.

### TENSOR TOOLS

The Tensor tool range covers all assembly requirements for safety critical and quality critical applications.

Tensor ES: Quality critical applications with high demands on productivity, ergonomics and error proofing.

Tensor SL: Safety-critical low torque tools for small screw applications. It offers compact screwdriver ergonomics with traceability and error proofing capability.

Tensor ST: The second generation of Tensor tools was developed with the focus on reducing tool weight and increasing productivity. Tensor ST has an internal bus connection for intelligent accessories such as a barcode reader and P-selector switch.

Tensor STR, SR: The latest generation of Tensor tools where ergonomics and productivity are taken to a new level.

Tensor STB: The battery version of Tensor ST for safety critical applications.

### POWER FOCUS 6000 CONTROLLER

Power Focus 6000 is the market-leading controller for handheld battery and electric tools. Power Focus is a controller with full flexibility and connectivity to fit your production infrastructure. The Power Focus 6000 is compatible with STR, ST, SR and ES.

### POWER FOCUS 600 CONTROLLER

The Power Focus 600 is compatible with the Tensor ES tools and is the perfect choice for quality critical assembly. It comes in one single hardware version regardless of which tool model or functionality level is used.

# Product Safety

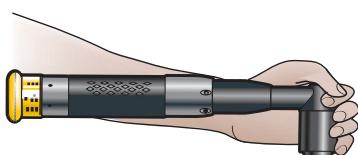

## SAFETY GUIDELINES

At Atlas Copco we want you to operate our tools safely. Always read and follow all operating and safety instructions, and comply with local safety regulations. There is a range of accessories for Atlas Copco tools. They are intended to reduce the risk of injury during certain assembly processes.

## HOW TO MAKE TOOL OPERATION SAFER

### 1 Entanglement hazard

- Hands and other objects (long hair, necklaces etc.) can get entangled with the rotating drive, causing severed or broken fingers.
- Do not use gloves.
- Never hold the drive, socket or extension with your hands.

### 5 Reaction bar

- When a reaction bar is used, keep hands away from the reaction bar while tightening a joint, otherwise hands may get squeezed.

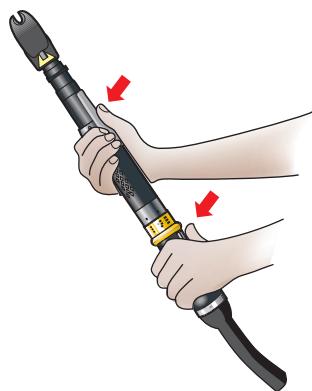

### 2 Hold the tool correctly

- Keep hands and other objects (long hair, necklace, etc.) away from the rotating drive, socket or extension.
- Hold the tool correctly with one hand on the handle of the tool and the other hand on the top of the angle head.

### 6 Open end tools

- Never put your finger into the open end of a tool, even if a dual action trigger is used.
- To avoid accidents, to activate the tool, both triggers must be pressed within 500 ms.

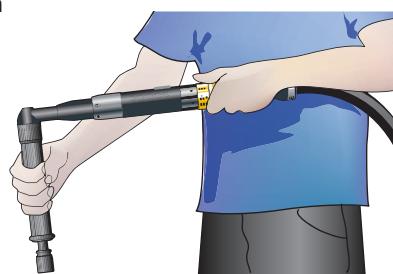

### 3 Supported extensions

- If you use an extension, never hold the extension with your hand while it is rotating. If you need to guide the extension, in order to locate the socket quickly and accurately, use an accessory to reduce the risk of entanglement.

Other advantages are:

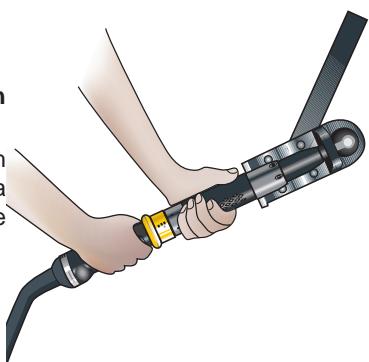

- Longer life for angle gear.
- More uniform tightening results.

### 7

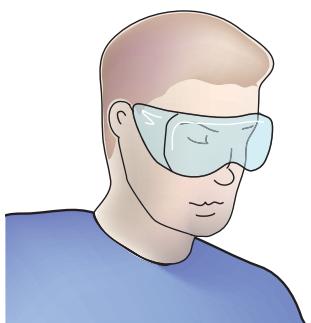

### Angle nutrunners with reaction bar

- Use reaction bar at high torque. For soft joints, a reaction bar should be used at >60 Nm.

### 4 Use goggles

- Always use approved safety goggles to protect your eyes from objects that might accidentally fly into your face.

### 8

### Screwdrivers

- Consider using a support handle or support arms, particularly for straight versions and for torques of 6 Nm and upwards.

## If you're looking for quality, you've found it

Atlas Copco supplies a complete range of advanced electric screwdrivers to match your needs. If it's cutting-edge ergonomics you want, true reliability, or long-life, low maintenance motors, we have tools to match your needs. With models such as MicroTorque QMC, ETD MT, ETD M ABL V2 or Tensor we cover the range from 0,01 Nm up to 200 Nm. They all have one thing in common – high quality.

### EBL SCREWDRIVERS

EBL screwdrivers are the best in class clutch electric screwdriver for low torque applications, its brushless motor combined with the high accuracy, delivers the best clutch tool solution for any assembly process.

### MICROTORQUE

MicroTorque screwdriver range is the most advanced and intelligent tightening solution for any low torque application: extremely ergonomic, very compact and full of functionalities. It is the right tool to boost productivity and quality, resulting in high efficiency and cost reduction.

### TENSOR SR TOOLS

ESD certified, Tensor SR angle tools are fast, compact and easy to operate. They feature an easy-to-configure function button and front LED's for clear operator feedback.

With a push-to-start mechanism and an integrated front guide light, SR straight tools are suitable for both hand-held and fixtured applications.

### TENSOR SL

Tensor SL transducerized screwdrivers are available in straight, right angle and pistol grip versions, with a straight model for fixtured applications that is very light and compact. All the tools offer high power-to-weight ratios, good ergonomic designs and clear operator feedback via LED's lights and buzzers (depending on the model).

### TENSOR ES

Tensor ES transducerized screwdrivers for quality critical applications are available in straight, right angle and pistol grip versions. All models have a sealed design for robustness and offer high productivity with improved ergonomics.

### ESD CERTIFIED SCREWDRIVERS

Atlas Copco offers ESD certified tools in the standard range of screwdriver models most frequently used in the electronics industries. ESD certification means a guarantee against damage of electronic components by an uncontrolled electrostatic discharge (ESD) from the tools.

Conformity to the requirements of IEC 61340-5-1 standard proposal is approved by SP, the Swedish National Testing and Research Institute. In practice it certifies that at no point will the material of the equipment hold an electrostatic potential above 100 V for more than 2 seconds.

**DESIGNED FOR LOW-TORQUE ASSEMBLY OPERATIONS**

Featuring superior ergonomics and the latest technology, Atlas Copco's EBL screwdriver is setting new standards for electric low-torque screwdrivers.

- Brushless motor provides long working life, extended service intervals and low maintenance requirements.
- Good ergonomics mean maximum operator comfort: comfortable grip, low tool weight and lower noise level due to the brushless motor.
- Reporting tool models have a batch count feature that ensures that all screws have been tightened.
- Soft-stop feature on certain models prevents damage to sensitive electronics and plastic assembly components.

<sup>a</sup> EBL 25-1500 to be used with EBL Drive Plus.

<sup>b</sup> EBL 25-1500-RE to be used with EBL Drive Plus and EBL RE Module.

<sup>c</sup> EBL 45, 55 to be used with EBL Drive Plus.

**NOTE:** Max torque reduced to 80% when run on slow speed and soft joints.

<sup>d</sup> EBL 45-RE and EBL 55-RE to be used with EBL Drive Plus and EBL RE module.

**NOTE:** Max torque reduced to 80% when run on slow speed and soft joints.

All tools models, drives and cables are ESD and UL certified.

Tool box include cable for drive connection (standard models with 5 pins cable and reporting models with 6 pins cable)

All the models are push-to-start or lever start configurable.

## Optional Accessories

### DRIVES

| Model   |   | Ordering No. |
|---|---|--------------|
| EBL Drive   | For standard models and soft-stop models              | 8431 0170 70 |
| EBL RE-Drive  | For reporting models and soft-stop + reporting models | 8431 0170 75 |
| EBL Drive Plus  | For all standard models and soft-stop models          | 8431 0170 85 |
| EBL Drive Plus is required for EBL25-1500, EBL25-1500-RE, EBL45, EBL45-RE, EBL55 and EBL55-RE |   |              |

EBL Drive

### EBL REPORTING MODULE

| Model  |  | Ordering No. |
|--|--|--------------|
| EBL RE module  |  | 8431 0170 76 |
| RE module to be connected between EBL Drive or EBL Drive Plus and RE tool. |  |              |

EBL RE-Drive

### VACUUM PICK-UP ACCESSORIES

Angle head, EBL

### ANGLE HEAD

| Model                             |              | Ordering No. |
|-----------------------------------|--------------|--------------|
| <b>Angle head</b>                 |              |              |
| Front part square drive 1/4" (06) | 4210 4033 90 |              |
| Hex bit drive 1/4" (42)           | 4210 4033 81 |              |
| Hex quick change 1/4" (Q)         | 4210 4033 82 |              |
| <b>Adapter</b>                    |              |              |
| Adapter EBL 12, 20                | 4210 4609 85 |              |
| Adapter EBL 21/25/35/45/55        | 4210 4609 81 |              |

Both angle head and adapter needs to be ordered for mounting on EBL.

Screw dispenser

## CURRENT CONTROLLED TOOLS – ETD MABL V2

MicroTorque handheld screwdrivers are designed to deliver outstanding quality with superior productivity in all assembly processes.

- High accuracy current controlled tools.
- Torque and angle monitoring for error proofing customized to any process.
- Advanced seating control tightening strategy that eliminates floating screws.
- Advanced torque seating monitoring to ensure final torque and monitor the clamping torque (unique for MTF 6000).
- Ergonomic design: comfortable grip and low weight to maximize operator satisfaction.
- Controllers and tools are ordered separately.

## CURRENT CONTROLLED TOOLS – QMC

MicroTorque fixtured screwdrivers are designed to deliver outstanding quality with superior productivity in all assembly processes.

- Lightweight to maximize productivity in any automation process.
- High accuracy current controlled tools.
- Multistep tightening to maximize productivity and quality.
- Torque and angle monitoring to ensure quality.
- Advanced torque seating monitoring to ensure final torque and monitor the clamping torque (unique for MTF6000).

<sup>a</sup>Only compatible with MTF6000. **NOTE.** Ordering number for screwdriver only. Tool cable, controller and PSU need to be ordered separately.

## TRANSDUCERIZED TOOLS – ETF MT AND G4 SYSTEMS

MicroTorque transducerized systems are designed to bring outstanding precision, time after time.

- High accuracy transducerized tools.
- Complete system with one ordering number that includes screwdriver, controller, tool cable, PSU and ToolsTalk MT.
- Torque and angle control and monitoring.
- Multistep tightening.
- Advanced programing via PC software, ToolsTalk MT.
- Multiple I/Os for integration with assembly line, automation stations or error proofing accessories.

## TRANSDUCERIZED TOOLS – ETD MT

MicroTorque transducerized handheld screwdrivers ETD MT are smart, interactive and precise with improved ergonomic design and functionalities, helps to enhance production efficiency, minimize product quality cost and further increase productivity.

- High accuracy transducerized tools.
- Internal transducer helps measure real calibrated torque to further enhance reliability of the torque data and traceability of tightening errors.
- Guiding light and gentle vibration give operators feedback when there are NOK tightening results.

## MTF 400

MT Focus 400 is an extremely compact and advanced controller designed to attend the most demanding assembly processes. It offers the advanced seating control strategy, multiple Psets, multi-steps tightening and ensures high quality and productivity. It is compatible with the latest MicroTorque tools including ETD M ABL V2 and QMC (excluding QMC21-05).

- 20 P-sets.
- Multistep tightening.
- Simple programming directly at the controller.
- Advanced programming via PC software, ToolsTalk MT.
- Batch count.
- Different display lights for operator feedback.
- Multiple I/Os for integration with assembly line, automation stations or error proofing accessories.
- ToolsTalk MT included, with Graph Analysis and Net functionality for detailed information.

## MTF 6000

MT Focus 6000 is the latest and most innovative controller from MicroTorque including all features of MTF 400 and much more. It elevates the Atlas Copco's low torque tightening and is designed for Industry 4.0.

MT Focus 6000 is smart with new advanced tightening strategies such as Torque Seating Monitoring. With Batch Sequence it is easy to setup simple workflow instructions to ensure efficiency, and the multi communication ports ensures connectivity with external equipment and software.

With two different levels of functionality, the IAM models gives a good offering for every customer. IAM Workstation is designed for a workstation setup with no or low need for advanced tightening strategies and communication. For processes, with a need of communication, data and advanced tightening strategies, IAM Process is the right choice.

MTF 6000

MTF 400A

| Model    | Ordering No. |
|----------|--------------|
| MTF 6000 | 8432 0851 00 |
| MTF 400A | 8432 0850 00 |

NOTE: Ordering number for controller only. PSU and IAM Module (for MTF6000) has to be ordered separately.

Screw dispenser for magnetic bit

Screw dispenser for vacuum pick up

**ETV ES**

- Torque transducer with an accuracy of  $\pm 7.5\%$  over six sigma.
- Robust, sealed design.
- New durable motor with higher speeds.
- Engineered in modules with component commonality.
- Clear LEDs visible through 360°.
- Hot swap.

## Tensor ES

## Straight Models

### ETD/ETF ES

- Torque transducer with an accuracy of  $\pm 7.5\%$  over six sigma.
- Robust, sealed design.
- New durable motor with higher speeds.
- Engineered in modules with component commonality.
- Clear LEDs visible through 360°.
- Hot swap.

## Pistol Grip Models

### ETP ES

- Torque transducer with an accuracy of  $\pm 7.5\%$  over six sigma.
- Robust, sealed design.
- New durable motor with higher speeds.
- Engineered in modules with component commonality.
- Clear LEDs visible through 360°.
- Hot swap.

**ETD SL**

- ETD SL is a very compact screwdriver with excellent power to weight ratio.
- Torque range from 0.3 to 10 Nm.
- Push-to-start function and front lights.
- Small center-to-side distance.
- Ergonomic design.
- Buzzer and additional blue LED for better operator support.

ETD SL

**ETV SL**

- ETV SL is the most compact transducerised angle screwdriver in the Tensor range.
- Torque range from 0.8 to 20 Nm.
- High durability with spiral angle gears.
- Ergonomic design.
- Buzzer and additional blue LED for better operator support.

ETV SL

**ETP SL**

- ETP SL is our first push-to-start pistol tool.
- Torque range from 0.3 to 10 Nm.
- Ergonomic, balanced pistol tool.
- Front lights for dark applications.
- Blue light and buzzer.

ETP SL

**ETF SL**

- ETF SL is the smallest and lightest fixtured tool.
- Torque range from 0.3 to 10 Nm.
- Stroke with 25 mm suspension.
- Small center-to-side distance.

<sup>a</sup> For ETV, CS distance over angle head.

# Tensor SR

## ETP SR31

The ETP SR is a pistol type electric nut-runner that delivers accurate, fast and error proof tightening with low reaction force. With TurboTight™ the ETP SR31 can handle one hand operations up to 25 Nm.

Delivers fully traceable results, has a low energy consumption and is simple to set up.

- Perfectly balanced and ergonomically designed handle.
- High free run speed (up to 2000 rpm's) and short tightening cycle (Up to 10 tightenings/min).
- Direct and robust gear box.
- The LED ring provides instant input to the operator and the incorporated speaker improve the operator feedback.
- Integrated function button, customized for your needs.

ETP SR

ETV SR

ETD SR

## ETV SR

- SR angle tools are extremely fast, compact and easy to operate.
- ESD certified.
- Easy to configure the function button.
- Front LED's gives better operator feedback.
- Torque range from 2.5 to 30 Nm.

## ETD SR

- SR straight tools are ideal for handheld applications and fixture applications.
- Torque range from 1.5 to 16 Nm.
- Front light guide is integrated.
- Push-to-start mechanism.
- ESD certified.

## Tensor – the operators' choice

The Tensor range of electric assembly tools covers all station and assembly line requirements for safety critical and quality critical fastening applications. At Atlas Copco we have a proud legacy of putting the operator first and we continuously improve the ergonomic features on each new generation of Tensor tools. Tensor is also one of the most advanced tool ranges on the market in terms of high power-to-weight ratios and operator guidance in the form of clear result feedback via LED's or audio signals.

### PRODUCTIVITY GAINS

Atlas Copco's unique Tensor motors give the Tensor range outstanding spindle speeds and, thus, help you achieve lower cycle times in your operation. Exceptional ergonomics in terms of balance, grip and low weight make the tools a favorite of the operators and increase individual productivity.

### OPERATOR FEEDBACK

All Tensor tools are equipped with LED's that will indicate the tightening result, green light for tightening OK and red light for NOK. Tensor ST and STR have configurable LED's and an integrated speaker for indicating results via audio signals.

### LOWEST COST OF OPERATION

At Atlas Copco we believe that quality is the road to lowest cost of operation over time. A maintained Tensor tool produces the same performance year after year at minimum and predictable costs while ensuring highest possible uptime.

### TENSOR TOOLS

**Tensor SL:** low torque safety critical, configurable tool functions

The Tensor SL range is optimized for safety critical small screw assembly. It offers compact screwdriver ergonomics, combined with traceability and error proofing capabilities.

**Tensor ST:** safety critical, configurable tool functions

The second generation of Tensor tools was developed with low weight and productivity in mind. Tensor ST has an internal bus connection for intelligent accessories such as a barcode reader and torque selector switch.

**Tensor STR, SR:** safety critical, configurable tool functions

The latest generation of Tensor tools where ergonomics and productivity are taken to a new level.

**Tensor ES:** quality critical

Tensor ES transducerized nutrunners for quality critical applications are available in straight and right angle versions. All models have a sealed design for robustness and offer high productivity with improved ergonomics.

**ETV ES**

- Torque transducer with an accuracy of  $\pm 7.5\%$  over six sigma.
- Robust, sealed design.
- New durable motor with higher speeds.
- Engineered in modules with component commonality.
- Clear LEDs visible through 360°.
- Hot swap.

## Tensor ES

## Straight Models

### ETD/ETF ES

- Torque transducer with an accuracy of  $\pm 7.5\%$  over six sigma.
- Robust, sealed design.
- New durable motor with higher speeds.
- Engineered in modules with component commonality.
- Clear LEDs visible through 360°.
- Hot swap.

## Tensor ES

## Pistol Grip Models

### ETP ES

- Torque transducer with an accuracy of  $\pm 7.5\%$  over six sigma.
- Robust, sealed design.
- New durable motor with higher speeds.
- Engineered in modules with component commonality.
- Clear LEDs visible through 360°.
- Hot swap.

NOTE: Tensor ES models of crowfoot and open end are not compatible with Power Focus 600.

**ETV ST**

- ETV ST right angle tools are ideal for hand-held and fixtured applications.
- Torque range from 1 to 4000 Nm.
- Tensor ST offers:
  - Extremely high productivity.
  - More ergonomic benefits.
  - Better operator feedback.
- The ETV ST ATEX tools are certified to be used in environments with hazardous gases and liquids.

**ETD ST**

- ETD ST inline tools.
- Torque range from 1 to 4000 Nm.
- Tensor ST offers:
  - Extremely high productivity.
  - Ergonomic design.
  - Excellent operator feedback.

## Pistol Grip Models

Tensor ST Revo

### ST REVO

- Unique and patented 360° swivel with transducer.
- Ultra-compact size improves access.
- Reduced weight means less need for fixtures.
- Display on tool gives direct feedback of tightening result.
- Program selection is made directly on tool.
- Ideal for handheld application or fixtures with reduced space.
- Torque range from 60-8000 Nm.

**ETV STR**

- Protected against intrusion of dust and water to withstand the toughest environments. IP class 54.
- Built in gyroscope to detect operators influence on tightening.
- Modular STR design for parts commonality between models and sizes.
- Dual accessories support for customizable functionality such as QR code scanning, EHMI display or headlights.
- High cycle rate capability due to improved heat dissipation.
- Operator feed back through built in loudspeaker, vibrator and high visibility LEDs.

**ETD STR**

- Protected against intrusion of dust and water to withstand the toughest environments. IP class 54.
- Built in gyroscope to detect operators influence on tightening.
- Modular STR design for parts commonality between models and sizes.
- Dual accessories support for customizable functionality such as QR code scanning, EHMI display or headlights.
- High cycle rate capability due to improved heat dissipation.
- Operator feed back through built in loudspeaker, vibrator and high visibility LEDs.

## Pistol Grip Models

## Tensor STR

### ETP STR

- Outstanding power to weight ratio.
- D-handel shape for increased robustness and safety.
- Easy mounting of additional accessories or optional support handle.
- High cycle rate capability due to improved heat dissipation.
- Operator feed back through built in loudspeaker, vibrator and high visibility LEDs.

## Two Trigger

## Tensor STR

### ETT STR

- Transducer in front for outstanding accuracy and reliability. +/- 2,5% over 6 sigma.
- Built in gyroscope to detect operators influence on tightening.
- Modular STR design for parts commonality between models and sizes.
- Additional front trigger makes the tool ideal for a combined pre tightening and final tightening combination, two tools in one. front trigger can also be used a safety trigger
- High cycle rate capability due to improved heat dissipation.
- Operator feed back through built in loudspeaker, vibrator and high visibility LEDs.

# Tensor SR

## ETP SR31

The ETP SR is a pistol type electric nutrunner that delivers accurate, fast and error proof tightening with low reaction force. With TurboTight™ the ETP SR31 can handle one hand operations up to 25 Nm.

Delivers fully traceable results, has a low energy consumption and is simple to set up.

- Perfectly balanced and ergonomically designed handle.
- High free run speed (up to 2000 rpm's) and short tightening cycle (Up to 10 tightenings/min).
- Direct and robust gear box.
- The LED ring provides instant input to the operator and the incorporated speaker improve the operator feedback.
- Integrated function button, customized for your needs.

ETP SR

ETV SR

ETD SR

## ETV SR

- SR angle tools are extremely fast, compact and easy to operate.
- ESD certified.
- Easy to configure the function button.
- Front LED's gives better operator feedback.
- Torque range from 2.5 to 30 Nm.

## ETD SR

- SR straight tools are ideal for handheld applications and fixture applications.
- Torque range from 1.5 to 16 Nm.
- Front light guide is integrated.
- Push-to-start mechanism.
- ESD certified.

## Error-proofing through intuitive control of the assembly process

*Atlas Copco advanced controllers and software provide intuitive monitoring and control of tightening operations performed using Atlas Copco electric assembly tools. Assembly process control and quality assurance is made easy by advanced control functions. The system guides the operator through the assembly process, avoiding mistakes that can result in costly quality problems.*

### **POWER FOCUS 6000**

The Power Focus 6000 comes in two hardware versions: Power Focus 6000 and Power Focus 6000 LV.

The Power Focus 6000 is easy to use due to its 7 inch touch screen and intuitive software. The web HMI enables you to configure and monitor the controller from any device with a web browser. Smart software management will guarantee highest possible uptime. Upgrade your controller in a few seconds using only a USB stick.

The Power Focus is based on standard hardware and software components which, when combined, will fulfill all demands, from the most basic stand-alone installation to full integration into the factory network. The modules fit together using the "plug-and-play" concept.

Assembly process control and quality assurance is made easy by advanced control functions. On receipt of assembly information, the Power Focus automatically selects the correct tightening sequence and parameters. The operator is guided through the process, avoiding mistakes that can result in costly quality problems.

### **PROGRAMMING SOFTWARE TOOLS-TALK 2**

ToolsTalk 2 is the user-friendly tool that enables you to communicate with your Power Focus tool controller. It makes programming and process analysis of a tightening station simple.

### **POWER FOCUS 600**

The Power Focus 600 is compatible with the Tensor ES tools and is the perfect choice for quality critical assembly. It comes in one single hardware version regardless of which tool model or functionality level is used. Its powerful industrial design gives a reliable process that will speed up your tightening operations.

Thanks to the intuitive interface and the fact that it's so easy to use you can set up and run a new system from the box in minutes. External computer software is no longer required since you can browse in using a web HMI. The intuitive interface and color screen provide clear operator feedback.

Smart software management will guarantee highest possible uptime. Upgrade your controller in a few seconds using only a USB stick.

### **MT FOCUS**

The new ground-breaking controller MT Focus 6000 is designed for Industry 4.0 and is Atlas Copco's most innovative controller for MicroTorque. The MT Focus 6000 elevates Atlas Copco's low torque tightening offer with advanced tightening strategies, a wide range of communication possibilities and smart solutions for high efficiency in any tightening process. For more information about MicroTorque controllers see chapter Electric Assembly Tools.

## POWER FOCUS 6000

This all new fastening solution from Atlas Copco takes productivity, ergonomics, quality and environmental impact to entirely new levels. And all this with the most user-friendly experience ever.

Enjoy the benefits of a system providing a unique operator experience, with superior quality control and the most flexible integration.

## ONE PLATFORM

One platform for handheld and fixtured tools. The Power Focus 6000 reduces your inventory costs and training requirements.

Easy to connect and configure back up tools, using the same programming interface. More compatible solutions will continuously be deployed. And the Power Focus 6000 will be your common controller for all tools and needs.

## MULTITOOL CONTROLLER

The Power Focus 6000 increases your flexibility in rebalancing assembly lines. Atlas Copco's virtual stations concept allows you to connect up to 6 tools to the same controller. Giving you a simpler installation with less cables, hardware components and network drops. Add to that the lower power consumption, less floor space utilization and a much lower environmental footprint, the benefits are obvious.

- Power Focus 6000 is compatible with: Tensor STR, ST, STB, SR, ES, TBP, SRB, STwrench and QST.
- Power Focus 6000 LV is compatible with: SL, STB, TBP, SRB and STwrench.
- Connect up to 6 tools to the same controller with Virtual Stations.
- Simpler installation with less cables, hardware components and network drops.
- Lower power consumption.
- Less floor space utilization.

## IAM

Virtual stations, software, tightening data and configuration – all in one place. In the IAM two software areas allow for smart software management. Allowing a much safer upgrade process, always giving the possibility to switch between two software versions.

## REVOLUTIONARY TIGHTENING STRATEGIES

TurboTight® and TrueAngle® are Atlas Copco's cutting-edge tightening strategies for the Power Focus 6000.

### TURBOTIGHT®

TurboTight® lets the tool absorb the reaction force and significantly improves ergonomics for the operator. Shorten cycle times and at the same time improving flexibility. Less hardware means less maintenance.

### TRUEANGLE®

TrueAngle® uses a gyro signal to read operator movement, increasing the accuracy of your angle reading. Enabling handheld angle controlled tightening's while removing operator influence. This allows you to narrow down your angle window, and detect the most common assembly problems such as wrong or missing components and damaged threads. Avoid premature shut-offs and detect re-hits.

### VIRTUAL STATIONS – THE ENABLER

Virtual Station is the Power Focus 6000 concept that offers the possibility to connect multiple tools and accessories into the system. With the Virtual Station concept, each tool can have its own separate result view on the Power Focus 6000 controller HMI.

The Virtual Station keeps all information about the assembly process, giving an instant overview of what is going on in the production.

**POWER FOCUS 600**

The Power Focus 600 controller takes quality critical assembly to the next level. Setting up and using an electric system has never been easier. And, by switching from pneumatic tools, you can reduce your energy consumption by up to 85%. Unbelievable but true – we call it easy transformation!

**EASY**

Set up and run a new system from the box in minutes. Computer software is no longer required. Intuitive interfaces enable real-time analysis and fast reaction if needed.

**EFFICIENT**

Same controller hardware regardless of tool model. Powerful industrial design gives a reliable process to maximize uptime and speed up your tightening operations.

**ERGONOMIC**

Both hardware and software is intuitive, giving clear operator feedback on the screen.

**TOOLSTALK 2**

ToolsTalk 2, the new generation software in controller programming, is ready to take your line management to the next level. The client-server based software solution is geared to provide quick and easy configuration, as well as complete visibility and traceability to your entire line structure.

Built on a state-of-the-art user experience and with an extended amount of unique features it is tailored to fit your needs and optimized to get the job done. It allows you to delegate additional features at any time to respective stations, through the embedded simple Functionality Management System (FMS). With 100% customizable user rights, you maintain quality control in complex production systems and increase uptime in production critical operations.

## Atlas Copco's Station Solutions reduce cost and ensure quality

As part of Atlas Copco's Quality Integrated Fastening (QIF) concept we offer complete error proofing stations. These are created by combining our advanced tightening equipment with standard Atlas Copco hardware and software components. Integrated error-proofing assembly stations help you avoid costly reworking, raise productivity and ensure quality on your production line.

Atlas Copco is one of the few suppliers able to offer a range of products comprehensive enough to build a fully integrated assembly station. QIF error-proofing stations offer the following benefits:

- Increased product quality.
- Standard modules reduce project and set-up time.
- Fast line re-balancing with standard interfaces.
- Higher productivity due to improved operator guidance.
- Full after sales support from Atlas Copco.

### FAST, EASY SET-UP

Most QIF products can easily be connected to Power Focus and Pulsor Focus using one I/O Bus cable, and to PowerMACS using one MACS I/O cable. They can be configured using standard Atlas Copco software ToolsTalk 2. This user-friendly PC software makes programming very simple.

A key factor that makes QIF products so well accepted by users is their logical and intuitive set-up. By combining QIF products with ToolsTalk Logic Configurator, it is possible to make logical diagrams with inputs and outputs that further enhance the flexibility of the products.

### SELECTOR 6 SERIES

Improve you productivity and achieve reduction in defects and energy use with superior flexibility and error proofing of your tightening process. Selector 6 Series is designed to give you a perfect Error Proofing solution with outstanding mobility and connectivity. It will improve your productivity and operator ergonomics with increased uptime, make product introduction easier as well as ease of installation.

## FEEDBACK

Higher quality can be achieved by giving audio and/or visual feedback about the assembly process to the operators. Time and costs can be saved by reducing reworking and avoiding faulty products leaving the production line. For feedback use Atlas Copco's Stacklights.

## REDUCTION IN DEFECTS AND NEW PRODUCT INTRODUCTION

The value of guiding the operator is key when introducing new models or having a big product mix. Selector 6 Series provides visual feedback to the operator, decreasing costs related to scrapping and rework.

Selector 6 Series and wireless connectivity greatly supports variance support by bringing the selector closer to application unnecessary operator movement is reduced.

## OPERATOR GUIDANCE

Flexible assembly lines demand different products to be assembled at the same station. Providing direct instructions on a screen with images and text of the assembly process reduces the risk of operator errors. For operator guidance use the Atlas Copco's Scalable Quality Solution 3 and HMIs.

## PROCESS MONITORING

Storing production data for documentation and further analysis is a key factor for traceability. Process improvements can be made by analyzing data. This contributes to increasing quality and boosting productivity by minimizing the number of recalls. For process monitoring use Atlas Copco's ToolsNet 8.

## TOOLSNET 8

ToolsNet 8 is a data collection and process improvement software application for use with Power Focus, Pulsor Focus, PowerMACS and STWrench with support for other controllers over ToolsNet open protocol. Combined, these products provide total control of the assembly process, providing a platform for quality improvements. Historical data, statistics and capability indexes can be accessed at any time via a standard web browser such as Microsoft Internet Explorer. ToolsNet is the complete assembly process improvement tool.

## TRACEABILITY MINIMIZES RECALL COSTS

The production can be followed in real-time through the dashboard or monitored through different reports such as the Result List report or Product List report which provides information of every tightening related to a specified period or product. In the event of warranty recalls, the result database provides access to critical information which can easily minimize the extent of any recall leading to an overnight payback on your investment.

## THE RIGHT SOLUTION FOR YOUR NEEDS

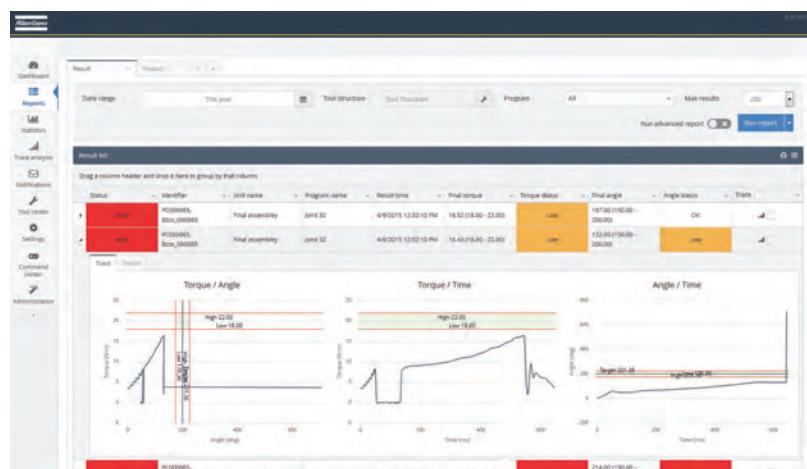

ToolsNet 8 is divided in three different packages to cover different needs.

### REPORTS

Take the first step in traceability by collecting all tightening results and storing them in a secure database system. Legal documentation and process improvements can be handled by running several pre-formatted reports specially designed to save user time and effort.

### ALERT

Extend the usage of available information by collecting all production events as they occur on the assembly line, in real time. Generate reports to identify events that are happening often and trigger emails to the right personnel based on event distribution rules you create. Be always on the alert for quality variation and workstations that require preventative or corrective tool maintenance.

### ANALYSIS

The analysis package adds advanced statistical capabilities making it possible to search for variations when it comes to large amounts of production data. Another feature that is added with the analy-

sis package is tool center which makes it possible to track detailed information about the tools that are used in production ensuring that they are serviced and calibrated on time.

## HTLQ - INDUSTRIAL PC

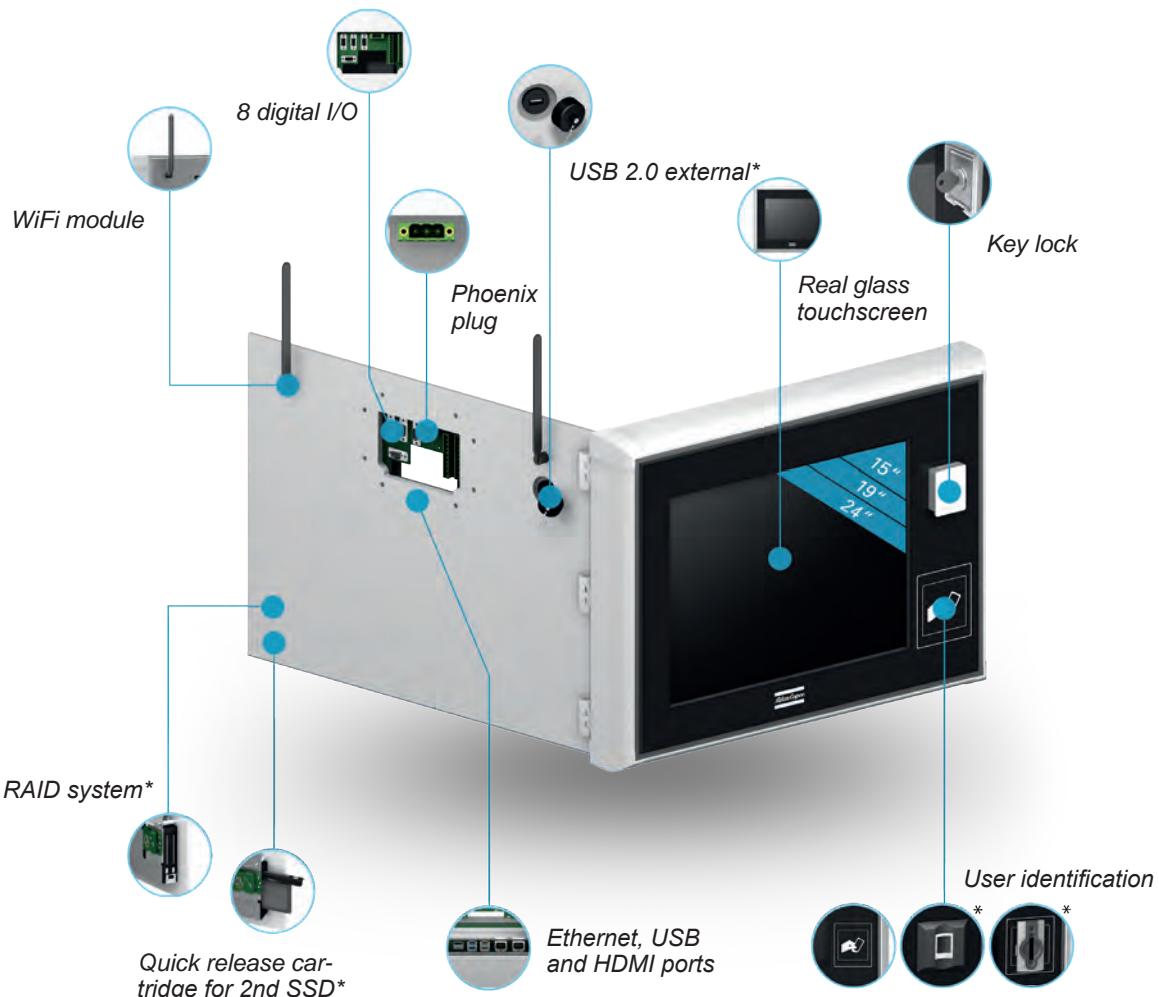

With their robust design and high-performance components the HTLQ (Hard Line Terminal) series are state-of-the-art devices for your industrial purposes.

You can choose between 6 standard models that are pre-configured and available off-the-shelf, or a customized version which can be configured individually based on available options.

\* Please contact your local Atlas Copco sales representative who will be pleased to help you configure your requested industrial PC.

## ***Technical data***

(1) Standard RAID upgrade kit is with 128 GB SSD size only

(2) RAID upgrade kit is with the customer specified SSD size

(3) Available with WiFi

**NOTE:** For individual configurations please contact your local sales representative.

## SCALABLE QUALITY SOLUTION 3

The Scalable Quality Solution 3 (SQS3) is an error proofing software that helps achieving zero defects and reducing cost of rework, scrap or warranty claims.

In combination with the industrial PC HLTQ it guides operators step by step through the assembly process.

The software ensures that all fasteners are torqued with the appropriate tool, the correct program, and the right socket to improve product quality and eliminate waste of material.

The data collection feature records the results of all assembly tasks for traceability purposes.

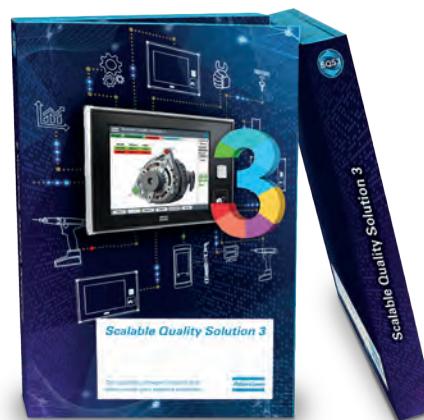

The integrated configurator has a user-friendly interface that does not require programming skills to set up and configure new products and processes.

## TOOLSNET REWORK

ToolsNet Rework, as a module of the SQS3 error proofing software, helps achieving zero defects in rework or repair processes improving productivity and trust of your customers.

Main functions of ToolsNet Rework:

- Queries ToolsNet for OK and NOK tightening data of products.
- Computes consolidated status (OK or NOK) of products based on tightening data.
- Guides operators through the repair process of NOK products.
- Selects the right tool and correct tool parameters required for the repair process.
- User access control ensures only qualified operators are working at the repair station.
- Returns tightening data of repair process to ToolsNet for full traceability.

## Protect your most valuable resource

*Operator health is important. If your operators work with hand-held electric or pneumatic tools, the last thing you want is for their health to suffer. However light the tool, when an operator performs repetitive tasks daily, often with incorrect posture, the tool seems to grow heavier by the hour. Add torque reaction from the tightening process, and the result can be hand-arm-shoulder disorders that may lead to injury and even premature retirement.*

Give your operators an extra arm! Atlas Copco torque arms are labour-saving extensions of Atlas Copco hand-held tools that ensure accurate tightening, and raise individual productivity in your plant. Available for torques of up to 1000 Nm, these ingenious constructions are the perfect way to lighten the load when performing repetitive tasks on lines or benches.

### EASE THE STRAIN

Atlas Copco torque arms take the strain off your operators, and allow maximum freedom of movement and flexibility. Wide fields of reach mean that the operator has a large working area without stretching.

### FAST PAYBACK

Investing in torque arms is not such a major decision. With their benefits in terms of increased productivity and improved employee health, payback time is short.

### TO CONSIDER

- However light or low torque, daily use of tools for repetitive tasks can result in hand/arm/shoulder disorders.
- On average a female operator can take 2/3 of the same force as her male colleague.
- Is there enough space for a torque arm at the workplace?
- Finished product quality improvement.
- With the use of a torque arm the arm will absorb all the reaction force from the tool and prevent the tool from spinning around its axis. To ensure highest possible accuracy of the clamp force a torque arm should be used to prevent movement of the tool.

### BASIC GUIDELINES FOR TORQUE ARMS

Tools used full days with a torque capacity shown in the table should always be used together with a torque arm in order to prevent work related injuries.

|                        | Straight | Pistol | Angle   |
|------------------------|----------|--------|---------|
| Ergonomical optimized* | > 4 Nm   | > 7 Nm | > 30 Nm |
| Conventional tools     | > 3 Nm   | > 5 Nm | > 20 Nm |

\* Ergonomically optimized tools is electric tools with two step softstop, turbotight or fast clutch pneumatic tool on a hard joint.

# TPS – Tool Positioning System

### **CONTROL THE SEQUENCE AND THE POSITION**

With a TPS controller you are always sure that the operators tighten the joints in the correct sequence and the correct position. The TPS controller works together with the SML/SMS T-series positioning torque arms or the SMC POSI L/ LA torque arms and tool controller. The torque arms are equipped with encoders, SMS T-series have 2 angle encoders and SML T-series have 1 linear encoder and 1 angle encoder. The SMC POSI L is equipped with 1 linear encoder to measure the distance the arm travels. SMC POSI LA is equipped with 2 encoders, to measure the distance the arm travel and the angle. The TPS works with digital I/Os for OK or NOK signals to the tool controller to determine the sequence and position of the tool, if the tool is out of position the tool will not start and when the tool is in position it will be able to start. After a correct tightening with OK signal from tool/controller the operator will receive an OK signal from the TPS and is able to start in the next position.

### **EASY PROGRAMMING**

The TPS can use self learning programming, position the tool in the arm over the selected joint and confirm position, go to next joint with the tool/arm and do the same procedure. When all joints are selected validate the job sequence and the TPS is ready for its new job.

### **50 JOBS – 500 POSITIONS**

The TPS can have up to 50 jobs and up to 500 positions (sequences). The TPS can send information to the tool controller to change Pset in the same job which means that it can be different torque settings in the same job and that the same joint can be tightened several times in the same job. When programming the TPS it can also be with different Psets for different jobs so that the operator always has the correct Pset from tool controller when the TPS job is selected.

### **FAST AND SMOOTH TO START TO INCREASE PRODUCTIVITY**

A job can be started by the operator by pressing the start button on the TPS

control and if the TPS is set to Level in job start the operator only needs to push the start button once, when the job is finished with Level setting the same job starts automatically again. Jobs can also be started by a switch button, from tool controller or on timer from previous job.

### **STAND ALONE SYSTEM**

The TPS is a stand alone system that works together with Power Focus, Micro Torque controllers and EBL RE driver. A pneumatic license and air tool package is available to make the TPS work with RE controlled air tools.

### **OPTIONS**

All options are activated by a license code. The license code is ordered separately.

### **BARCODE READER LICENSE OPTION**

Use a barcode reader to start a job and/or identify a job for the TPS to select the correct Pset.

### **RESULT REPORT FUNCTION OPTION**

Save the results to a PC. The results can be saved in two ways, report on job or report on sequence and job.

### **PNEUMATIC TOOL LICENSE OPTION**

The pneumatic tool license also includes the necessary valves and hoses for a correct set up of RE controlled air tools.

## TPS CONTROLLER – CONTROL THE SEQUENCE AND THE POSITION

With a TPS controller you are always sure that the operator tightens the joints in the correct sequence and in the correct position.

- Up to 50 jobs and up to 500 positions.
- OK/NOK signal on position.
- The tool will not start when it is out of position.
- Batch count together with OK/NOK on position.
- Works together with Atlas Copco electric tools and RE controlled pneumatic tools.
- Possibility to save and upload set up through a PC.
- Easy and fast set up and programming.
- Error proofing solution.
- ESD approved.

## HOWTO ORDER

1. TPS Controller
2. Select positioning torque arm by style (T-series linear or swivel, or SMC telescopic) and torque arm capacity
3. Cable TPS to tool controller
4. Power supply - optional (needed for MTF 6000)  
NOTE: Order power cord separately.
5. Select other options if applicable

## TPS CONTROLLER

# TPS Positioning Torque Arms

## SMC POSI L

SMC carbon arms with 1 encoder to measure the distance the arm travels. With this arm and encoder it is possible to verify the position due to the distance the arm travels. The encoder is mounted inside the arm to safe guard that nothing can interfere with the distance measurements. The SMC POSI L arm can work in both horizontal and vertical position and thus be roof or wall mounted. The accuracy of the encoder is 0.32 mm and the arm together with a TPS controller control the sequence and position.

- Carbon arm with position control up to 200 Nm.
- Encoder measures the distance the arm travels.
- Verify position due to distance.
- Can be mounted both in horizontal and vertical position for maximum flexibility.
- Accuracy of encoder 0.32 mm.
- Control the sequence and position together with TPS controller.

## SMC POSI LA

SMC carbon arms with 2 encoders to measure the length the arm travels and the angle of the arm to determine the position of the arm/tool. With this SMC carbon arm it is possible to verify the position due to the length the arm travels together with an encoder that measures the angle of the arm. The length encoder is mounted inside the arm to safe guard that nothing can interfere with the length measurement and the angle encoder is mounted at the top of the arm. The SMC POSI LA can work in both horizontal and vertical position and thus be roof or wall mounted. The accuracy of the encoders is 0.32 mm and the arm together with a TPS controller will control the sequence and position.

- Carbon arm with 2 encoders to control position.
- Encoders measure the arm travel length and the angle of the arm to determine the position.
- Can be mounted both in horizontal and vertical position for maximum flexibility.
- Accuracy of encoder is 0.32 mm.
- Control the sequence and position together with the TPS controller.
- Arms available up to 200 Nm.

SML T-series have 1 linear encoder and 1 angle encoder to determine the position. The arms are delivered with balancer, encoders and encoder cables ready to be plugged into the TPS controller.

- Control the sequence and position together with TPS controller.
- Excellent working area for work bench assembly stations.
- Available up to 100 Nm.

| SMS T-5 Position   | 4390 2036 00 |
| SMS T-12 Position  | 4390 2037 00 |
| SMS T-25 Position  | 4390 2038 00 |
| SMS T-50 Position  | 4390 2039 00 |
| SMS T-100 Position | 4390 2040 00 |

**NOTE:** Tool holder needs to be ordered separately.  
SML/SMS T-series are equipped with balancer.

Choose the appropriate balancer for SMC arms depending on tool weight and order the balancer kit for easy and fast assembly if the arm is roof mounted.

**SML T – SERIES TORQUE ARMS**

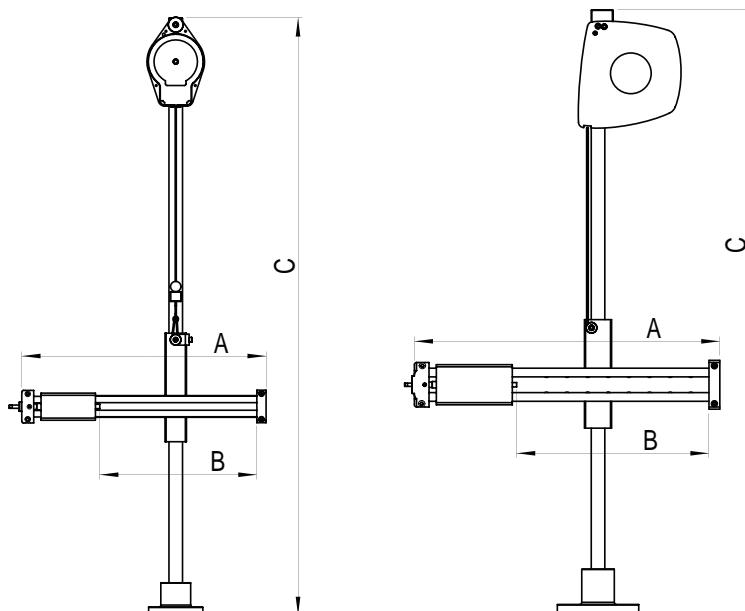

The Atlas Copco linear arms are built to handle the most demanding industrial situations. The robust design offers unmatched user friendliness. The linear arms are equipped with ball bearings for smooth operation, and an adjustable plate for maximum adjustment of minimum and maximum working area. The linear arms have balancer included that will absorb the weight of the arm and tool combination to reduce the weight for the operator. The arms minimize the reaction force of the tool to prevent hand-arm-shoulder disorders. With minimized reaction force of the tool, finished product quality is also higher since there is no movement of the tool and all torque is absorbed in the joint.

- Robust construction for long life and no force transferred to operator.
- Balancer included to remove the tool and arm weight from the operator.
- Available from 5 Nm up to 100 Nm.
- Minimizes reaction force to prevent hand-arm-shoulder disorders.
- Improves finished product quality with all torque absorbed in the joint and no movement of tool.

## SMST – SERIES TORQUE ARMS

The Atlas Copco linear arms are built to handle the most demanding industrial situations. The robust design offers unmatched user friendliness and, due to the swivel function, a wide working area is covered with the SMS T-series. The swivel arms are equipped with ball bearings for smooth operation, and an adjustable plate for maximum adjustment of minimum and maximum working area. The swivel arms have a balancer included that will absorb the weight of the arm and tool combination to reduce the weight for the operator. The arms minimize reaction force of the tool to prevent hand-arm-shoulder disorders. With minimized reaction force of the tool, finished product quality is also higher since there is no movement of the tool and all torque is absorbed in the joint.

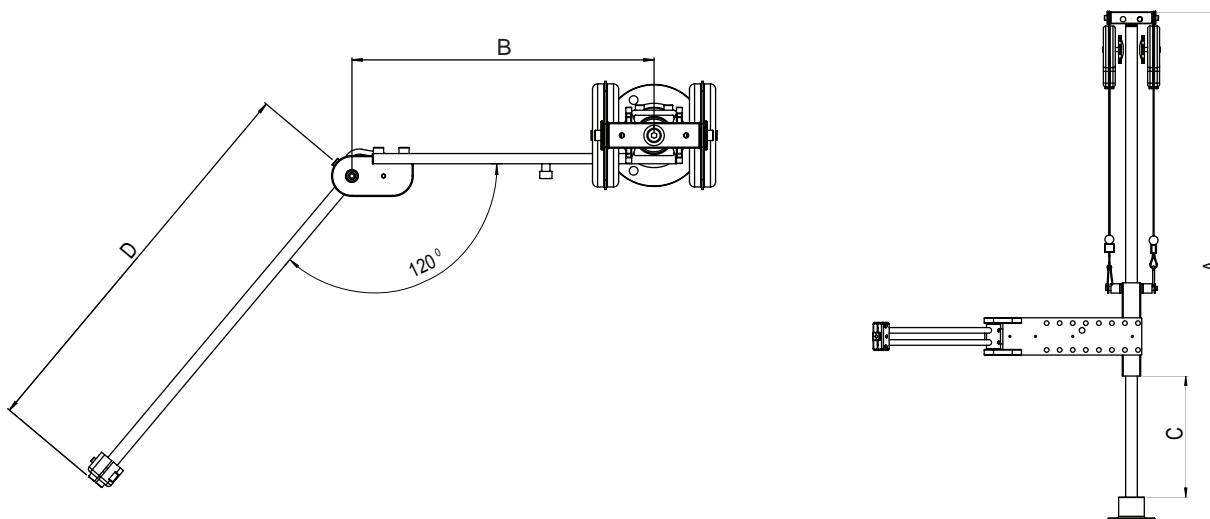

- Robust construction for long life and no force transferred to operator.
- Balancer included to remove the tool and arm weight from the operator.
- Available from 5 Nm up to 100 Nm.
- Minimizes reaction force to prevent hand-arm-shoulder disorders.
- Improves finished product quality with all torque absorbed in the joint and no movement of the tool.

Tool holder is ordered separately.

## Dimensions

**SMC – CARBON ARMS**

The Atlas Copco carbon arms have a telescopic design for maximum flexibility in the workplace. The carbon arms are light weight with smooth movements to reduce the operator force to use the arms. Together with a balancer the carbon arms can either retract up or be used in a weightless position to improve operator comfort. The carbon arms minimize reaction force to prevent hand-arm-shoulder disorders. With minimized reaction force of the tool you will also improve finished product quality because there is no movement of the tool and all torque is absorbed in the joint.

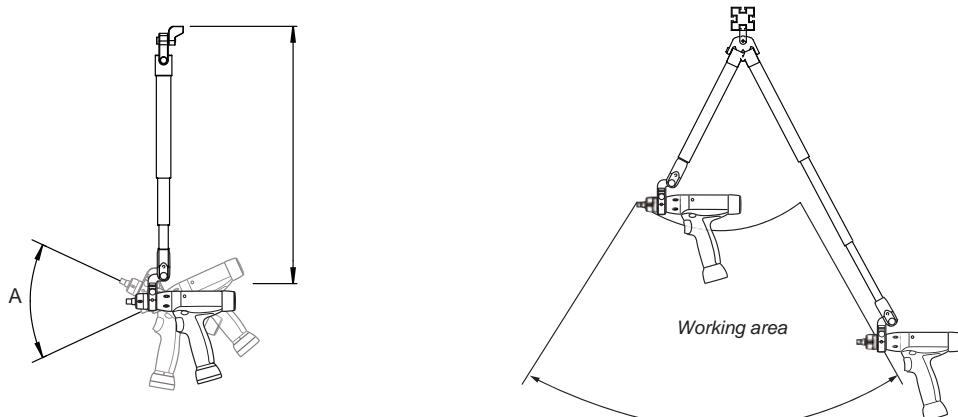

- Telescopic design for maximum flexibility in the workplace.
- Light weight and smooth movements for operator comfort.
- Easy to use together with balancer to create weightless solution to improve ergonomics.

- Minimizes reaction force to prevent hand-arm-shoulder disorders.
- Minimizes pinching and can replace reaction bars.
- Improve finished product quality with all torque absorbed in the joint and no movement of the tool.

**SMC-TT – CARBON ARMS**

The SMC-TT torque arm range from Atlas Copco consists of three models varying from 10 to 25 Nm. The SMC-TT torque arms are designed to be used in combination with handheld straight and angle tools, including both electric and pneumatic. They are suited to be utilized for various rail and roof-mounted applications in all sorts of assembly environments. The product range has a modular setup with several available combinations and accessories to provide the most efficient and ergonomic workstation. The availability of a rigid top fixation allows the SMC-TT arm to be fastened to a roof attachment. The 10 Nm torque arm is available in one length version and the 25 Nm models are available in two length variants to achieve better reach.

- Easy to position and handle torque arms that allow for smooth movements to achieve operator comfort.
- Telescopic design for maximum flexibility with an extensive working range.
- Easy to use together with balancer to create weightless solution leading to improved operator ergonomics.
- Minimized strain to prevent wrist/arm/shoulder injuries due to repetitive use.
- Improved finished product quality with all torque absorbed in the joint and no movement of the tool.

**TORQUE ARM SML MK II**

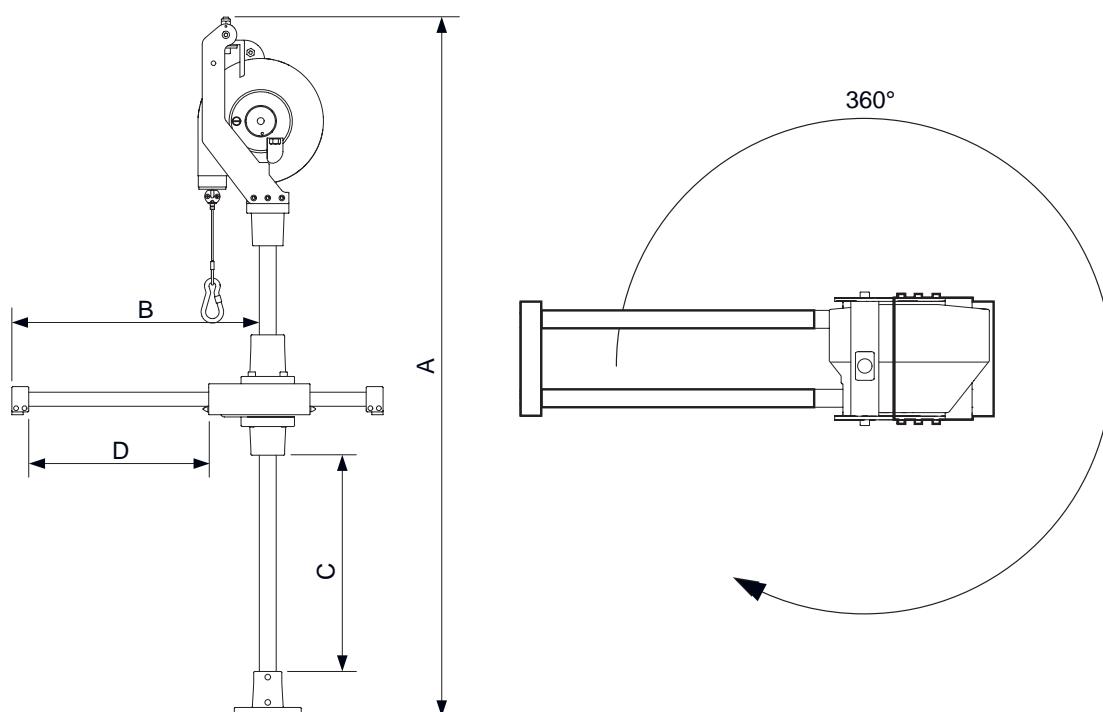

By mounting your assembly tool on a SML MK II torque arm you will immediately increase the productivity and reduce muscular stress from your operators. All arms are delivered with integrated balancer, 3-axis movement and the Atlas Copco interface for tool holders. The 3-axis movement allows the operator to ease the arm effortlessly around the workstation.

- 3-axis movement for maximum flexibility.
- Strong and durable design.
- Integrated balancer to support tool and arm weight.
- High torque capacity, up to 1000 Nm.
- Same tool holder interface as SML T / SMS T / SMC for arms up to 150 Nm.

## TORQUE ARM SMF

The SMF-25 torque arms are labor-saving extensions of the Atlas Copco handheld tools. They are made of aluminum and are suitable for straight and pistol assembly tools up to 25 Nm. The parallel torque arm has a foldable and space-saving design that eliminates the weight and torque of the tool, thus improving operator ergonomics, providing accurate tightening and contributing to increased productivity.

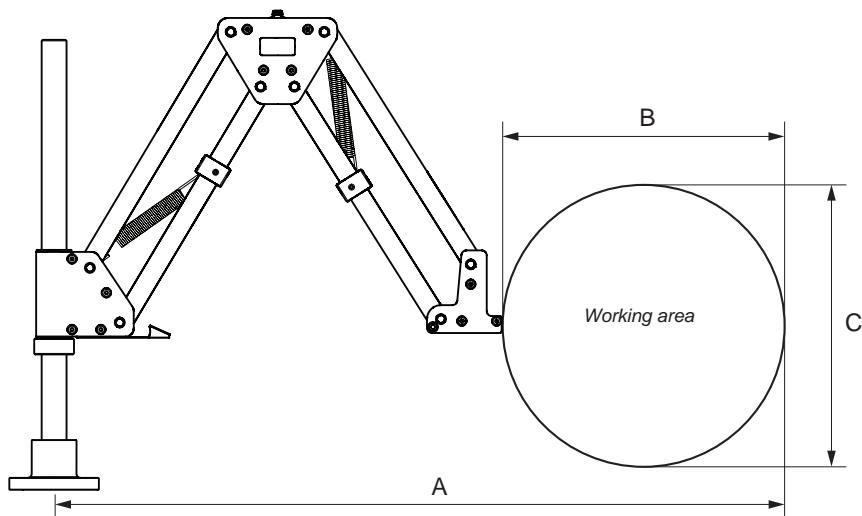

The SMF-25 arm range has a bench stand with a working area of 710 mm and 870 mm allowing tool setups weighing up to 2 kg (4.4 lb). These arms can also be used with a wall mount, therefore making them suitable for either flat wall surfaces or structural framing systems in assembly environments. All related accessories and tool holders need to be ordered separately.

- Robust construction that diminishes the transferred force to operator and extends product longevity.
- Springs included to eliminate tool and arm weight from the operator.
- Reaction force minimized to prevent hand/arm/shoulder disorders.
- Improved product quality due to torque absorption in the joint and no movement of the tool.

## Dimensions

### GHP – TORQUE ARM FOR MICROTORQUE RANGE

Atlas Copco GHP torque arm is an excellent means of assistance when using hand-held or fixtured straight microtorque screwdrivers.

Torque arm GHP Mini is recommended with screwdrivers below 100 Ncm, and GHP Small below 200 Ncm.

The GHP torque arms are exceptionally easy to position and handle. The design is intended for low torque applications and work tasks over a long period of time. Comes with appropriate balancing system to support the weight of the tool.

# Torque Arm Accessories

## Optional Accessories

### TOOL HOLDER GUIDE

Atlas Copco tool holders are designed to optimize your workplace solution. Depending on tool, torque arm and application you can choose from a wide range of tool holders; universal holder, specific diameter holders, spline holders, mounting plates with spine or hole, pistol tool holders or angle tool holders. A tool specific tool holder is always better than a universal holder.

### HOW TO BUILD YOUR WORKPLACE SOLUTION

- 1) Tool
- 2) Torque arm
  - Torque range
  - Work area
  - Tool weight
- 3) Tool holder
  - Arm - Tool holder interface type (or mounting on arm clevis, as for SMC angle tool holders)
  - Tool interface: eg. Spline, Diameter or Angle
- 4) Accessories
- 5) For SMC - Balancer

Universal tool holder

Tool holder, diameter

Mounting plate

Tool holder, Spline

### TOOL HOLDERS FOR TORQUE ARMS WITH TOOL HOLDER INTERFACE TYPE A SMC 12/25 AND SMS/LT 5/12/25 AND SML MK II 10

Tool holster large

Modular tool holder

**COLIBRI – COL**

Balancers in the unique COL range hold the load and keep it weightless throughout the entire cable length.

**PRODUCTIVITY**

COL balancers always hold the tool in the correct position.

**ERGONOMIC**

COL balancers reduce the stress level in the operator's muscles.

**SAFETY**

The load is not pulled back when released and the surroundings are protected from accidental hoisting of the load.

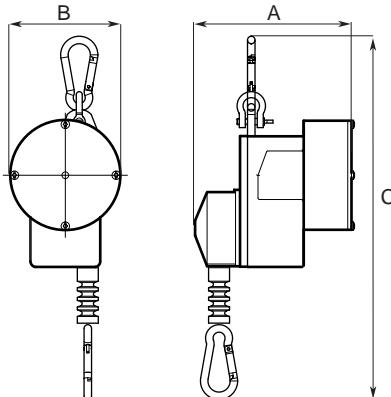

The cable locks in the event of spring failure (downward braking power).

In all models the braking function can be activated upwards by using the "bow and arrow" principle if you need to slacken the cable to change the tool.

<sup>a</sup> Balancer equipped with automatic safety drum lock in case of spring failure.

**NOTE:** RIL 1C, 2C, 4C and 5C comes with nylon cable. All other models are equipped with steel wire.

## Optional Accessories

### SAFETY CHAIN

|                   | Ordering No. |
|-------------------|--------------|
| 1C, 2C, 4C and 5C | 4391 4045 90 |
| 10C, 15C and 22C  | 4391 4156 00 |

**WP BALANCER**

Weightless positioning balancers with a cone-shaped drum hold the load and keep it weightless throughout the entire cable length. The casing for WP 05/10 are in plastic, the WP 20 in aluminium and the WP 30/40 models are in abrasion resistant aluminium.

All models except for the WP 20 comes with a swiveling safety hook.

**PRODUCTIVITY**

WP balancers always hold the tool in the correct position and minimize worker fatigue.

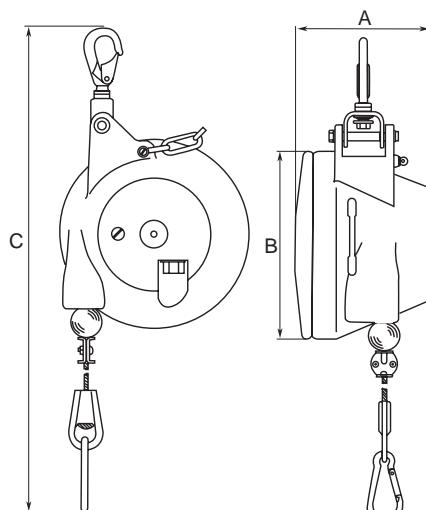

**ERGONOMIC**

The WP balancers reduce stress level in the operators muscles.

**SAFETY**

The load is not pulled back when released and the environment is protected from accidental hoisting of the load.

- Steel cable with cable stop buffer.
- Safety chain.
- Quick and easy cable replacement.
- Available with extended cable lengths for roof mounting. (A) -models.

# With our vast experience, we are a supplier you can rely on

*Atlas Copco is the world-leading supplier of fixtured solutions with nutrunners and press systems. Our vast experience of designing components for multiple nutrunner systems, combined with knowledge of building, commissioning and maintaining fixtured solutions, makes Atlas Copco a supplier you can rely on.*

For fixtured nutrunner systems, Atlas Copco offers a complete portfolio of products designed to satisfy your needs. These range from individual components to operator controlled Multiples by Express® stations and demanding stitching applications. There are two different systems designed for fixtured applications, as well as user-friendly controller software.

Please contact your local Atlas Copco sales representative who will be pleased to discuss your needs.

### **POWER MACS 4000 AND QST NUTRUNNERS**

A state-of-the-art, stand-alone system offering high reliability, accuracy and capability. The system is designed with user friendliness in mind and is easy to build and integrate into production lines.

### **POWER FOCUS 6000 AND QST NUTRUNNERS**

The newest Atlas Copco controller now can offer the possibility to run QST and battery handheld tools in one single controller, bringing even more flexibility and commonality.

### **POWER MACS 4000 AND PST PRESSES**

Design to be the most compact and efficient press in the market, PST system delivers both high productivity and full commonality with Power MACS 4000 systems.

### **TOOLSTALK SOFTWARE**

ToolsTalk software for Power MACS 4000 has been developed with user-friendliness and customer adaptation in mind. This Window-based program can be installed on a station PC, a laptop or a back office PC.

*Power MACS 4000 stand alone system – small, cost efficient and powerful. No need for bulky cabinets.*

### Nutrunners to match your needs

*The QST nutrunner is a true state-of-the-art product. Partnered with the Power Focus 6000 or the Power MACS 4000 tightening controller, QST offers one of the most advanced and reliable tightening solutions on the market.*

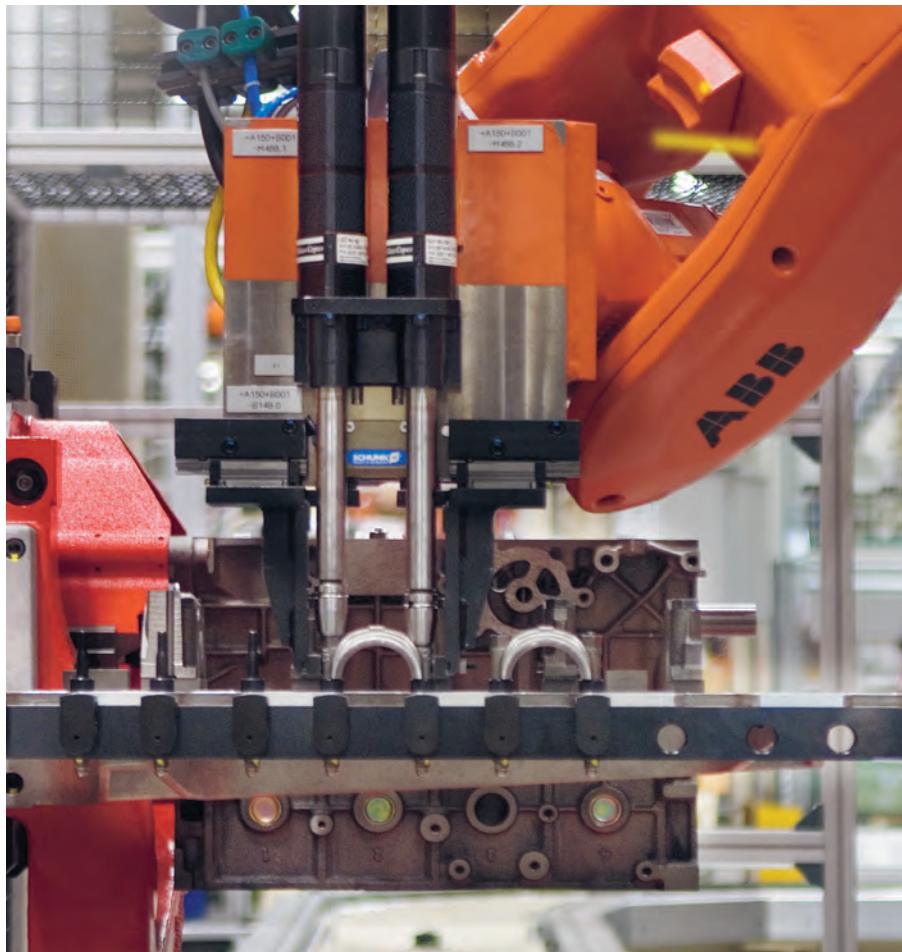

Designed specifically for fixtured systems, these reliable, durable nutrunners have many features.

With QST nutrunners pilot mount or sandwich are possible. Different socket holder lengths (0-200 mm) permit access to applications or parts with tight clearances. For longer bolt lengths, spring travel can be increased from the standard 50 mm to 76 or 100 mm on request.

A built-in memory chip in QST nutrunner stores calibration values and general tool and service data. The tools are ISO certified to +/- 2.5% accuracy and 1 million duty cycles on hard and soft joints.

#### **QST NUTRUNNERS – FEATURES**

- Digital communication between nutrunner and controller.
- Hot Swap – replace cable or spindle without turning off the power.
- Increased speed characteristics, up to 3,000 rpm.
- Optional redundant angle encoder and transducer.
- MTBF better than 5 million cycles under normal conditions.

- Inline nutrunner, CT – Equipped with commutation sensor and transducer.
- Off-set nutrunner, COT – Comes with a commutation sensor, off-set gears for narrow bolts and transducer.
- Extended spring travel 76 mm and 100 mm – Nutrunners with extended spring travel for longer bolt lengths.
- Dual transducers, CTT – Nutrunners with dual torque transducer feedback.
- Dual transducers and angle feedback, CATT – Nutrunners with dual angle and torque transducer feedback.
- Angle head nutrunners, CTV – Nutrunners with angle heads. Available with or without travel.

- Lean and compact, PST press is equipped with the latest planetary roller screw capable to handle high speeds, accelerations and decelerations.
- High accuracy and precise load readings thanks to load cell on outgoing shaft.
- Unique and compact mechanical gear unit delivering higher durability level compared to the market belt system.
- PST can be ordered in a brake version. The brake can be used as parking or as holding brake.
- Commonality through the standard and robust QST motor and smart cable connector which can be turned in 2 directions of freedom.

# Advanced process control and monitoring

*State-of-the-art tightening controllers Power MACS 4000 and Power Focus with their advanced process control and monitoring functions, and supported by ToolsTalk software, can put your assembly operation on the path to zero-fault production.*

### **POWER FOCUS 6000**

The Power Focus 6000 is the perfect choice for safety critical assembly processes. It comes in one single hardware version regardless of which tool model or functionality level is used. Power Focus 6000 offers the possibility to run battery tools and the QST nutrunner, one of the most advanced and reliable tightening solutions on the market, in one single controller.

### **POWER MACS 4000**

Power MACS 4000 is Atlas Copco's tightening and pressing controller for fixtured tools. It has effective tools for statistical process control to ensure that quality issues are identified long before they cause production problems.

The controller supports a zero-fault production philosophy with its capacity to collect tightening and pressing data for analysis, continuous improvement and traceability. PowerMACS processing power and memory are designed to handle and send large amounts of data without influencing the tightening process.

### **TOOLSTALK POWER MACS**

The ToolsTalk software for Power MACS 4000 has been developed with user friendliness and customer adaptation in mind and can be installed on a laptop or a back office PC. It is available in two versions: Tightening and Pressing.

**POWER MACS 4000**

One primary controller is needed per system. The primary controller takes care of external communication and comes with most field busses used in modern production lines (optional). A primary controller can be run as a secondary controller.

The secondary controller comes in two versions; with or without Ethernet switch in the back plate.

- One servo covers the complete torque range from 2 to 8,000 Nm.
- One servo covers the complete force range from 5 to 100 KN.
- No external PC required, inherent back-up functionality for increased reliability.
- Define your tightening and pressing strategy based on results to make sure valuable time and resources are not wasted.
- Powerful PLC onboard.
- Reject Management enabling you to handle faulty tightening in the most efficient way.
- Extensive library of tested tightening strategies – each joint can be tightened in the best possible way in terms of cycle time and quality.
- Stand alone design (no need for bulky cabinets).
- 24V DC supply, integrated Ethernet switch, E-stop circuit.
- Informative display
- Integrated line filter.

**MAIN SWITCH BOX – MSB**

The MSB is used for power distribution and makes power management easy. It is designed to be fed with 380-480 V AC 3-phase without requiring an external transformer. The MSB leaves room for customer adaptations and the E-stop functionality can be upgraded from class 3 to class 4. Each MSB supplies up to 6 controllers with power.

**MAIN SWITCH BOX II – MSB II**

Main Switch Box II exists in two versions, 30 Amps and 60 Amps.

**DISTRIBUTION BOX – DB**

The DB provides the same functionality as the MSB except for the main switch and is used as a complement to the MSB for systems with more than 6 channels.

**DISTRIBUTION BOX II – DB II**

DB II is needed when MSB II is used.

**GENERAL BOX – GB**

An empty DB, suitable for external system devices.

## POWER FOCUS 6000

This all new fastening solution from Atlas Copco takes productivity, ergonomics, quality and environmental impact to entirely new levels. And all this with the most user-friendly experience ever.

Enjoy the benefits of a system providing a unique operator experience, with superior quality control and the most flexible integration.

## ONE PLATFORM

One platform for handheld and fixtured tools. The Power Focus 6000 reduces your inventory costs and training requirements.

Easy to connect and configure back up tools, using the same programming interface. More compatible solutions will continuously be deployed. And the Power Focus 6000 will be your common controller for all tools and needs.

## MULTITOOL CONTROLLER

The Power Focus 6000 increases your flexibility in rebalancing assembly lines. Atlas Copco's virtual stations concept allows you to connect up to 6 tools to the same controller. Giving you a simpler installation with less cables, hardware components and network drops. Add to that the lower power consumption, less floor space utilization and a much lower environmental footprint, the benefits are obvious.

- Power Focus 6000 is compatible with: Tensor STR, ST, STB, SR, ES, TBP, SRB, STwrench and QST.
- Connect up to 6 tools to the same controller with Virtual Stations
- Simpler installation with less cables, hardware components and network drops.
- Lower power consumption.
- Less floor space utilization.

## IAM

Virtual stations, software, tightening data and configuration – all in one place. In the IAM two software areas allow for smart software management. Allowing a much safer upgrade process, always giving the possibility to switch between two software versions.

**TOOLSTALK POWERMACS**

The ToolsTalk software for PowerMACS 4000 has been developed with user friendliness and customer adaptation in mind. This Window-based program can be installed on a station PC, a laptop or a back office PC. ToolsTalk supports off-line programming; to edit or upload programs, simply connect the PC to the PowerMACS 4000 controller using an Ethernet cable.

- User friendly Windows programming interface with “drag-and-drop” and “copy-paste” functionalities.
- 10 levels of read and write security.
- Trace reporting on torque, angle, current, current as torque and time.
- Improved read-at-a-glance graphics with actual pictures of customer parts.
- Possible to view up to 20 tightening traces simultaneously.
- Graphical system map of hardware and software.
- Configurable cycle data menu for station reporting.
- Real time SPC and TDA reporting.
- Event logging of security access, parameter changes, errors, faults, alarms and warnings.
- Maintenance menus to verify hardware and software changes without machine intervention.
- Run the program in Basic or Advanced mode depending on needs.
- Quick-set functionality for trimming a process in seconds.
- Optimize each tightening by means of the tightening path for each bolt, including start times, stop times, and execution times for the steps.

## Quality assurance and manual tightening that gives peace of mind

An improperly tightened joint in any assembly process can cause costs for re-work or warranty and can damage manufacturers' brand image. Atlas Copco's wide range of manual tightening and quality assurance tools and systems offer the right tool for nearly any application to meet high-quality standards, secure error proofing functionalities or even verify measurement requirements.

### QUALITY ASSURANCE

Atlas Copco's tightening quality assurance solutions meet torque, angle and pulse measurement requirements for all types of fastening tools and joint verification. This product line offers you tools, analyzers and benches for testing, calibrating, process control and check of residual torque of already tightened joints.

### DATA COLLECTORS

The Atlas Copco STpad represents the QA Platform 4.0 innovating data collector, guiding operators through step by step quality inspections, including visual and dimensional checks.

The STa 6000 Plus enables you to check the tool in the crib or along the line. Connected to a MRTT-C wrench the STa 6000 Plus analyser is able to detect residual torque using the same patented algorithm as the electronic STwrench.

### BENCHES

The STbench is the new standard in tool check and joint simulation: it's the fastest solution in the market able to test any tool according the real application joint condition, perfectly integrated in the QA Platform 4.0.

### ELECTRONIC STWRENCH

The four-patent STwrench that tightens a bolt with the most advanced torque or torqueangle-strategies with complete traceability and error-proofing functionalities even checking the residual torque on an already tightened joint.

### MECHANICAL WRENCH SERIES

Atlas Copco's mechanical wrench product line form the basis for manual tightening. Regardless whether you are working in assembly lines, rework or repair and maintenance, this product line always offers a suitable solution for your tightening situation, even if limited space handicaps your processes.

### MECHATRONIC SYSTEM

If an increased and controlled tightening process is needed, combine the high productivity of a click wrench with error proofing functionalities using the newly launched MWR Mechatronic system. This system provides a complete traceability while small dimensions allow to reach even joints inaccessible for standard tools.

# STpad

## STPAD

STpad represents the QA Platform 4.0 wireless hub, guiding the operators through all quality checks, including non-torque test like visual and dimensional checks.

The STpad is a rugged and portable wireless tablet having 10.1" touch display, integrated camera and 2D barcode reader, satisfying MIL-STD 810G standard.

Thanks to flexible software licensing, different features can be enabled:

- **Tool check**

You can deliver highest tool test reliability and operator independence in latest assembly technology such as robot and automated spindles thanks to IRC-C Bluetooth communication. With an STpad you can have real time control over tightening results to assure the high quality you need for a satisfactory result.

- **Joint Check**

Quality auditors performing residual torque check with STwrench is now guided during the execution with pictures and text instructions.

Deep analysis such as torque/angle trace zoom is available from STpad display.

- **Visual Check**

STpad guides the operator also for those checks that don't require numerical measurement, such as defects collection and go-no go test. Visual check processes can be standardized and digitalized through visual check steps definition, avoiding operator mistakes and paperless data collection. Statistic data, corrective actions and issue assignable causes can be also tracked to improve related quality processes.

- **Dimensional Check**

There will always be productions where non-torque related checks need to be conducted – and reported – manually.

These measurements can be crucial information when working with quality assurance over the whole production. So whereas torque is reported automatically into the system, measurements from for example length or pressure, gauge needs to be reported manually to complete the big picture.

All results are safely stored in STpad internal memory or synchronized with QA Supervisor database.

## STa 6000 Plus

*In assembly operations worldwide there is an increasing focus on quality. Using sophisticated tools to tighten bolts is simply not enough. It's also important to monitor tool performance, and to test joints after they have been tightened. This is where the Atlas Copco STa 6000 Plus comes in. The portable STa 6000 Plus can be used to check tool performance, repeatability and accuracy for all types of power tools and torque wrenches. Test your tools in the tool crib following service and continuously on the line to monitor performance or test your joint by checking the residual torque using our unique residual torque check function.*

### STa 6000 PLUS

Improve everyday tasks for Quality supervisors and operators. Reduced weight and compact design make the STa 6000 Plus easy to carry along the line. Checking tools in the Tool Crib and on the line and checking tightened joints means quality guaranteed.

### PORTABLE AND ERGONOMIC

The compact STa 6000 Plus with long-life battery weighs less than 500 g. No special device is required to carry the system it can be conveniently hung on a strap from the operator's belt.

The STa 6000 Plus small size and features make it easy to use in the production line.

### QUICK PROGRAMMING

The STa 6000 Plus is designed for easy connection to Atlas Copco IRTT-B in-line transducers, SRTT-B static transducers and MRTT-C wrenches. It is also easy to connect the STa 6000 Plus to SRTT-L by specific cradle in order to have a compact complete solution. The STa 6000 Plus also works with the IRC-Connect, our Smart transducer. The IRC-connect is more than just a cable replacement, is a tool to simplify and improve your daily tasks with an incorporated memory that will store up to 5000 results and traces.

It provides automatic recognition and calibration and allows the operator to start a test with a few clicks: just selecting the tool type to be checked. The test setup is automatically created by STa 6000 Plus.

### MODULARITY – YOU BUY WHAT YOU NEED

The STa 6000 Plus is easy to upgrade. You don't need to buy a complete new model. Simply add modules and accessories that expand the functionalities and create your customized torque analyzer system.

### COMMONALITY CUTS COSTS

The STa 6000 Plus utilizes the same modules and software as the STanalyser and STwrench, thus saving you money.

### CLEAR OPERATOR FEEDBACK

STa 6000 Plus color screen features intuitive icon menus.

Feedback is clearly displayed thanks to the green or red screen, with the possibility to add a gauge indicator and fully customize information.

### STa 6000 PLUS BASIC

The ideal solution for simple and quick tests.

#### Quick programming

- The quick tool or joint check test can be launched with STa 6000 Plus basic version. Up to 50000 results are stored in the device memory, traces can be seen with TT BLM if the software is purchased.
- No PC is required
- Test conditions can be set up right on the device for each test
- Color screen
- The green/red color screen guides the operator for the tests

### STa 6000 PLUS QC

The ideal solution for operators requiring a complete testing solution.

This version includes all the features listed for the Basic one, and additional others:

#### • Tools and Psets database

This is a list of tools you want to test (max. 1,000). It contains all information related to the tool, such as type, model, min. and max. torque, etc. The PSet defines how the test has to be performed with acceptance limits. A maximum of 1,000 PSets can be stored and 5 max. per tool can be assigned.

Continued...

# Analyser

## • Traces on display

Traces can be seen directly on the STa 6000 Plus screen.

## • Customized screen

The measure screen can be customized with all the important information to have them displayed during the test. It is possible to have on the measure screen information as Cm/Cmk values, sigma, last results also a graphical gauge indicator can be added.

## • Full text notes

Text notes can be added to the results to keep the full traceability of the tests.

## • PF and PM Calibration

STa 6000 Plus allows completing calibrations simply connect the STa 6000 Plus to an Atlas Copco controller with either an Ethernet cable or with the small USB to serial adapter. All other operations are done by the STa 6000 Plus as the Pset is automatically read from the controller. The readings are also acquired and the new calibration value is stored in the controller. Calibration made easy, fast and completely error-proofed.

## • Reports can be printed on a network printer.

## STa 6000 PLUS AA

The recommended solution for Advanced Analysis.

### • The STa 6000 Plus ultimate solution

All the features are included in this version, statistics CM/Cmk graphs and X/R charts can be visualized right on the STa 6000 Plus screen.

## TT BLM

With TT BLM software, it's possible to manage programs, settings, results and traces of the STa 6000 Plus remotely via the network from the office PC.

A smart Excel database for the STa 6000 Plus results is featured by TT BLM software.

**NOTE:** Software license is necessary for the above features.

## IRC-CONNECT

The IRC-Connect is not just a cable eliminator. It stores up to 5000 results that can be uploaded to the STa 6000 Plus as soon as they are connected. When this device is paired with the IRC-Connect the transducer is automatically recognized.

Thanks to the STa 6000 Plus, plus multitest functionality, up to 30 IRC-Connects can be connected at the same time for multi-spindle applications.

## TORQUE SUPERVISOR

STa 6000 Plus is fully integrated with Torque Supervisor software.

It's possible to take advantage of all the advanced features of Atlas Copco Quality data management software with STa 6000 Plus, programming the tool check and joint check routes to be executed.

## ACCESSORIES

With the Barcode Module it is possible to automatically start a tool or a joint test, and it is possible store further scanned information on their results. In addition a work order can be defined to set the scanning order of different identifiers.

With IRC-W Radio Module you can wirelessly communicate to software.

With the USB/Serial converter, it is possible to synchronize to Power Focus, Power MACS and PST for their calibration.

## SRTT-L

SRTT-L is a family of transducers for the STanalyser. It is designed for lower torque assembly tools. Both transducers and test joints are exchangeable and can be used with any STanalyser. The modular design allows the user to scale his system as his needs evolve. The same SRTT-L plate can be used with any transducer in the SRTT-L family.

## QRTT-B

Transducers used for QST nutrunner as well as for fixtured Tensor tool calibration. This transducer enables fast, easy set-up with the highest system accuracy. By using the QRTT-B, no special test adaptation device between the spindle and the product itself is needed.

**NOTE:** The QRTT-B includes the complementary kit for its installation.

**IRTT-B**

IRTT-B is the Atlas Copco torque and torque/angle in-line rotary transducers incorporating significant improvements in durability and accuracy. The angle reading system use a patent solution which gives better resolution and longer life. The mechanics have also been completely reviewed to achieve a higher level of durability.

IRTT-B is equipped with a memory chip that is read by the Atlas Copco data analyser. In this way the Data analyser is automatically calibrated to the transducer sensitivity and avoids any possible set-up errors.

## SRTT-B

### STATIONARY REACTION TORQUE TRANSDUCER

Stationary reaction torque transducers are designed for testing wrenches, click wrenches or for tightening tools where rotary action is not desired during measurement. When testing a shut-off tool, a joint simulator is required as an accessory.

The SRTT-B is the new generation of Atlas Copco stationary reaction torque transducers with improved durability thanks to their new mechanical design. The new patented system of fixing the joint simulator on top avoids any possible errors due to the play between the two devices.

A complete range of accessories and a mechanical joint simulator enables you to test shut-off tools or wrenches with square drive output.

**MRTT-B SCREWDRIVER**

MRTT-B is available in a screwdriver version for low torque applications from 0.1 to 15 Nm. The 15 Nm model has a precision reversible 1/4" drive ratchet consisting of two needle clutches. Sliding bush to convert left and right tightening. The very low friction avoids dragging the screws on the return motion.

MRTT-B

| Industrial style | Transducer cable 3 m 19 - 10 |

## MRTT-C

The MRTT-C is a revolutionary way to think about a manual wrench. The MRTT-C is an advanced handle that can be connected to the standard smartHEAD used for the STwrench to create a wrench that can be connected to the STA 6000 Plus using a standard Atlas Copco cable.

The MRTT-C connected to the STA 6000 Plus with Residual or Production RBU can be used to detect the residual torque using the advanced Torque/Angle algorithm, same as the STwrench, or to tighten a bolt for production applications.

## SMARTHEADS

Square connection smartHEAD have been added to the range of smartHEADs. The square connection smartHEADs allow customers to use any square end fitting, losing thought the poka yoke system offered by end fittings.

- Torque or Torque/Angle reading depending to the smartHEAD
- Led ring like STwrench
- Vibrating handle
- Buzzer
- TAG recognition
- Light in front

## QUALITY ASSURANCE SYSTEM – SHARPENING YOUR COMPETITIVE EDGE

To ensure the highest quality of your fastening – and ultimately your company's products – Atlas Copco has developed a comprehensive quality assurance system for micro torques. The ACTA MT4 system provides fast, accurate and reliable measurement of critical parameters.

### ACTA MT4 – SMART FEATURES

- Connect to PC via USB/RS232/Ethernet.
- 6 different engineering units to choose from.
- Colour configurable display (Torque/ Angle/Status/Trace).
- Battery for portable usage.
- Programmable via keypad or software “ToolsTalk ACTA MT”.
- Dual transducer inputs.
- High resolution OLED colour display.
- Audio signal for operator feedback.
- Digital I/O signals for communication with external devices such as PLC.
- Tool speed measurement function possible when using MT TRA transducers.
- Store and export tightening data to excel with ToolsTalk ACTA MT PC software.
- Calculate average torque directly on the display.

## **STBENCH**

The Atlas Copco STbench represent the state of the art in joint simulation testing the tool according the production application. It provides maximum tool evaluation flexibility. DC electric, clutch, impulse and battery tools as well as torque wrenches can be evaluated in accordance with latest ISO standards.

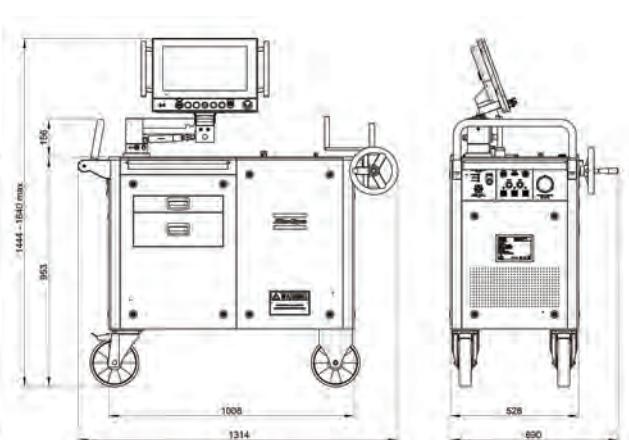

The new hydraulic system design significantly improve the overall testing time by starting the test quickly and performing multiple test in short time. A new encoder increases the angle resolution, and the improved robust brushes increase transducer lifetime.

STbench new modular design includes different standard options to satisfy any customer needs:

- STpad for full accessibility. Thanks to the removable STpad and IRC-Connect, you can reach automated stations, robots or difficult to reach areas.
- Industrial PC as option instead STpad.
- Hydraulic brakes up to 3000 Nm.
- SRTT-B up to 2000 Nm, suitable for pulse tool.
- Tilting Top option improving test ergonomics.
- Articulated arm directly reaching the application without unmounting the tools from the application.

STbench Standard - Large frame dimensions

STbench Standard - Small frame dimensions

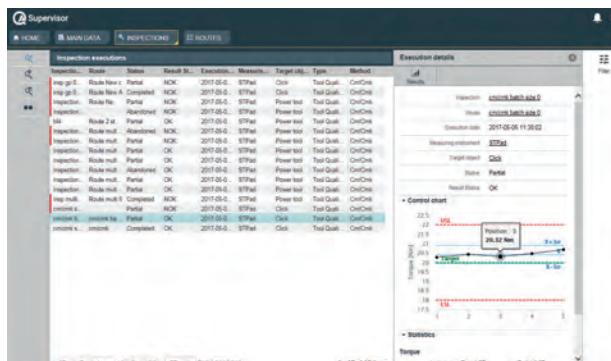

# Quality Assurance in Tightening Management Software

## QA SUPERVISOR

From scheduling to reporting QA Supervisor is a web based software, accessible from any device – always connected. It manages scheduling of the tests requested and shows status overview. The collection of data from STpad, STA 6000 Plus and STbench covers all the QA applications – and each user can work smoothly with a quality dashboard with personalized widgets. Even the reports are customizable to better meet user needs.

QA Supervisor requires one single installation to a server to be managed, this provides different advantages:

- Reduce maintenance and IT costs
- Each user can log in from any device connected to the network with user/password access

## Where the joints are critical

Critical fastening duties are among the most essential tightening operations within industry today. So whether you're in the business of assembling cars or trucks, tractors or harvesters, trains or planes, you need to be in control when it comes to production and quality assurance.

### STWRENCH

The Atlas Copco STwrench is much more than a standard transducerized hand-held nutrunner. Due to its modular design, you can build the STwrench to meet your exact requirements and create a tool that perfectly matches your applications.

Use the STwrench for production to get full traceability of the entire tightening operation, including torque control, angle control and yield control. Or build your wrench to just tighten your joint with high torque accuracy. Or use it for quality control to check residual torque, to perform joint analysis, including joint behavior and stiffness, to set the correct tightening parameters for production and to test the reproducibility of joint stiffness on the benches.

### THE ULTIMATE WRENCH FOR PRODUCTION AND QUALITY ASSURANCE

With the STwrench you can build the functionality you need into your own tool. Choose three patented components – smartHEAD, RBU and the power supply-solution to suit your exact requirements. Then add a fourth: the patented controller that is standard for all STwrenches. Due to the modular design of the STwrench, you can mix and match components to suit all types of applications.

Use it as a basic stand-alone system or integrate it with Atlas Copco hardware and software. The STwrench is versatile enough to tighten hard-to-reach bolts using a variety of torque and angle strategies while providing complete traceability. Yet it handles quality control of residual torque just as easily as it does comprehensive joint analysis.

The STwrench implements a patented residual torque/angle measurement algorithm to measure the torque left on the joints by the tools in production. The STwrench residual torque/angle algorithm makes the residual torque check operator independent.

Furthermore, as the residual point is detected in real time, buzzer, LEDs and vibration alert the operator to stop, avoiding overtorqueing.

### SMARTHEAD

The smartHEAD has a built-in memory chip to store calibration values that are automatically recognized by the STwrench controller. Choose from nine different sizes ranging from 15 to 1000 Nm, which is connected to the controller by a patented system allowing a fast connection. It can be with or without Gyroscope and the torque transducer is made to guarantee length-independent

reading. TAG recognition patented solution is used to assure Poka-Yoke operations. It includes at front a Led bright light to improve visibility in dark bolt area.

### STWRENCH CONTROLLER

This is the brain of the wrench. It has a clear and visible display, LED ring, vibrating handle and buzzer for immediate feedback to the operator. It has dedicated slots where you can insert the RBU, one wireless module and the Bar Code Module (see Optional Accessories).

The STwrench Controller can be powered by a patented bi-energy solution such as the long life STwrench Battery or by Tensor SL connected to the Power Focus via the STwrench Cable Box.

#### STWRENCH RBU

Atlas Copco's patented Rapid Backup Unit (RBU) concept transfers functionality to a non-configured hardware unit,

ensuring that hardware can easily be upgraded. The RBU also acts as back-up for programming and configuration. If a change of hardware is required, just fit the RBU to the new hardware, switch on the unit and you're ready. All programming and network configurations are transferred in seconds. The RBU cuts downtime to a minimum.

#### OPEN PROTOCOL AND API

The STwrench can be easily and wirelessly integrated with Customer systems thanks to the Open Protocol communication.

For more advanced integration, also the API are available in combination with the dedicated API RBU to integrate one or more STwrench in Customers' systems.

## SMARTHEADS AND CONTROLLER

Square connection smartHEAD have been added to the range of smartHEADs. The square connection smartHEADs allow customers to use any square end fitting a losing thought the poka yoke system offered by end fittings in this catalogue.

BI controller is the new controller with the battery inserted in the STwrench handle. New batteries are to be used only in this controller. Recharge these batteries using standard battery charger with BI battery charger adapter.

## HOW TO ORDER YOUR STWRENCH

1. Take the STwrench Controller
2. Select your smartHEAD
3. Select your End fitting tool
4. Select your RBU
5. Select the Battery
6. Select if you want optional modules

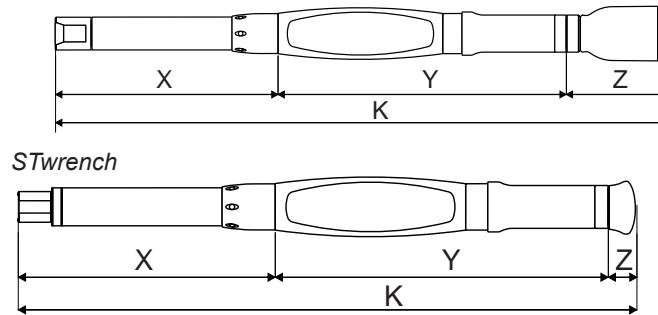

| Model  | Torque range |         | Drive<br>mm | Weight |      | Length<br>mm | Ordering No. |
|--|--------------|---------|-------------|--------|------|--------------|--------------|

## IRC MODULES

Two different IRC modules each with different wireless technology. No extra special software is needed, it is necessary only to plug in the new module to activate the communication. The communication can be to the Power Focus, to the QAT node, to the STwrench cradles or to different systems on the net. The radio modules Plus versions features a more powerful antenna for more stable connection and improved communication range.

**NOTE:** As the dimensions are bigger, a different cover needs to be mounted.

## BAR CODE MODULE

Enables the Bar Code to be read. STwrench is able to handle four different Bar Codes that can be used to activate or control the process and for traceability purposes. It is only necessary to plug in the module to activate the function.

## STWRENCH BATTERY

All batteries are lithium ion ones. The standard battery gives up to 16 h of working time (10 h if wireless communication is used). BI and HD batteries have a working time of 6 h (4 h with wireless communication). Use the standard or the HD battery with the standard controller. BI batteries are only for BI controllers.

## STWRENCH CABLE BOX

Wired to connect the STwrench to the Power Focus using a standard Tensor SL cable. The STwrench cable box supplies power to the wrench and handles the communication between the wrench and the Power Focus.

## STWRENCH BATTERY CHARGER

To recharge the battery, it can be mounted in a horizontal or vertical position. It takes 4 hours to complete recharge the STwrench battery.

## POWER FOCUS

For fieldbus connectivity and additional I/O port, or for backup station, the STwrench can be connected in wireless with PF or IRC Focus. It allows also the possibility to connect all QIF accessories such as stack light etc ...

## TOOL HOLDER

The tool holder is a cradle for the STwrench that can be mounted either on a table or on a wall, providing a safe housing for the wrench.

## RUBBER PROTECTION

Rubber protections for the STwrench provide both a protection for surfaces that come in contact with the wrench and a better grip for the user. Choose a rubber protection for each of the sections of the STwrench.

The TAG placed on the ratchet defines the Pset.

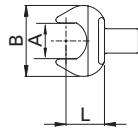

<sup>a</sup>NOTE: The maximum torque which can be applied with 4620 0081 00 is 300 Nm.  
NOTE: Since several sockets could be used, it is recommended to hold the socket in such a way that it is not possible to remove it (e.g. using a pin).

<sup>a</sup>NOTE: The maximum torque which can be applied with 4620 0081 00 is 300 Nm.

## Mechanical wrench series

The mechanical wrenches in the Atlas Copco Saltus product line form the basis for manual tightening. They enable you to find the optimal solution for your individual tightening situation regardless whether you are working in assembly lines, rework or repair and maintenance, and even when limited operating space is available.

The wrenches are also the perfect back-up strategy for your controlled assembly technology.

With regard to workplace equipment and costs, manual tightening wrenches are often more efficient and increase your productivity. The easy handling has earned wide acceptance among operators.

Our different wrench types offer the right strategy for nearly any application.

### CWR 'CLICK' WRENCH SERIES

The torque wrenches in our CWR series provide the distinctive "click" which is a very clear feedback when reaching the pre-set torque value. The repeatability of  $\pm 4\%$  makes them perfect for use in assembly lines.

Standard drive enables the use of a wide range of suitable end fittings.

### BWR 'BREAKING' WRENCH SERIES

The torque wrenches in our BWR series are primarily used in professional industrial environments. The possibility of over-tightening is significantly reduced due to a 22° breaking-angle of the unique BWR mechanism. Therefore, the BWR wrenches are very well-suited for use in assembly lines as well as for repair and maintenance.

You can profit from a wide range of end fittings which are quickly changed.

### MICROSWITCH ADAPTOR

This new adaptor upgrades your click or breaking wrenches into a signal transmitting wrench. Connected via cable to a customers' PLC system, this adaptor can support control functionalities as batch counting and line control.

### SWR 'SLIPPING' WRENCH SERIES

The torque wrenches in the SWR series are "automatically triggered" once the pre-set torque value is reached. The Camover-technology completely avoids over-tightening. After triggering, the SWR wrench is again ready to use. The integrated ratchet function ensures you controlled clockwise tightening. The high repeating accuracy with a tolerance of  $\pm 4\%$  makes the SWR wrenches ideal for assembly lines for extreme continuous operation.

# Mechanical Wrenches

## CWR 'CLICK' WRENCH SERIES

- Wide range from 2Nm up to 300Nm.
- Very small sizes ideal for tightening in limited space.
- Repeatability of  $\pm 4\%$ .
- Easy and safe adjusting and handling.
- Standard drive (9x12 or 14x18) for a wide range of suitable end fittings.

CWR

BWR

SWR

## BWR - 'BREAKING' WRENCH SERIES

- High process reliability as over-tightening is significantly reduced due to the  $22^\circ$  breaking angle.
- Wide range of wrenches from 2Nm up to 2000Nm.
- BWR-D models allow use of standardized end fittings with 9x12 or 14x18 drive.
- Extremely high durability and high repeatability of  $\pm 4\%$ .
- Robust construction.
- Easy and safe adjusting.

## SWR 'SLIPPING' WRENCH SERIES

- Torque range from 5Nm up to 110Nm.
- High process reliability as camover mechanism avoids over-tightening.
- Overloading of the wrench itself is impossible.
- Repeatability of  $\pm 4\%$ .
- Robust construction.
- Easy and safe adjusting.
- 3/8" (SWR-30 / SWR-60) respectively 1/2" (SWR-110) ratchet drive allows use of standard sockets.

## MICROSWITCH ADAPTOR

- Upgrades CWR or BWR wrenches (as seen from revision D) into signal transmitting devices.
- Easy support of control functionalities as batch counting and line control.

# MWR Mechatronic system – more than a click!

*Increase the quality of your joints considerably with the error proofing functionalities of the MWR mechatronic system. Combining the productivity of a click wrench with the traceability of an electronic one, this smart manual fastening system optimizes your tightening processes enormously. The online results provide a complete traceability of the tightening process.*

### **MWR MECHATRONIC WRENCH SERIES**

Based on the mechanical “click” wrench the MWR mechatronic wrench is highly productive. The clear physical feedback with the distinctive “click” in combination with the colored LEDs makes it easy to handle even for untrained workers.

Size and performance makes the MWR wrenches optimal for limited space applications with all functionalities in a compact size. Thanks to standard drive (9x12 and 14x18), the operator can choose from a wide range of end fittings for his application.

Three different models offer the right strategy depending on customers' needs and application:

- MWR-S (OK signal only)
- MWR-T (Torque measurement)
- MWR-TA (Torque and angle measurement).

The MWR charging cradle, a stable holder and battery charger, ensures that the wrench is always ready for performance.

### **CONTROLLER FOCUS 60/61**

In combination with the controller Focus 60 or 61 the MWR mechatronic wrench series offers a controlled tightening process monitoring torque, angle and correct time of release. An optional stack-light connected to the Focus controller signals the status or any error of the tightening.

The Focus controller handles the process and collects all data reporting all results in real time for full traceability. While managers can monitor everything via ToolsNet.

# MWR Mechatronic Wrench

## MWR MECHATRONIC WRENCH SERIES

- High process reliability thanks to complete process monitoring.
- Wide range from 5 - 300 Nm.
- Small size of 177 mm makes the MWR-25 ideal for tightening in limited space.
- MWR-T: torque measurement.
- MWR-TA: torque and angle measurement.
- Colored LEDs for clear feedback.
- Standard drive (9x12 and 14x18) for wide range of end fittings.

## Maximum material removal with minimum effort

*Atlas Copco Grinders are designed to be powerful, yet small in size and weight. With Atlas Copco Grinders, you can rely on maximum material removal with minimum effort. Our range of grinders covers virtually all applications.*

### DIE GRINDING

Small precision deburring – die grinding is performed with either tungsten carbide, high speed steel burrs or mounted points.

The choice of burr depends on the size of your job. A larger volume of removed material will require a bigger size of the burr's head.

Select the tool rpm depending on the diameter of the burr head, the material to be ground and the material in the rotary burr. Use tungsten carbide burrs for hard and tough materials. High speed steel burr's are recommended for natural steel and medium hardened materials. Example, see table below:

| Burr head Ø | Hardened steel   |           | Natural steel    | Soft material                |
|-------------|------------------|-----------|------------------|------------------------------|
|             | Though materials | Cast iron | Softer materials | Wood, brass<br>Plastics, Al. |
| Up to 1/4"  | – TC             | 38000     | 38000            | 38000                        |
|             | – HSS            | –         | 20000            | 20000                        |
| Up to 1/2"  | – TC             | 30000     | 30000            | 30000                        |
|             | – HSS            | –         | –                | 20000                        |

TC – Tungsten carbide tipped rotary burr. HSS – High speed steel burrs.

For mounted points, follow the recommendations that relate to the particular mounted point.

### ROUGH GRINDING

Pure material removal is determined by the power generated at the grinding process. The applied feed force and the rotation of the wheel generates a cutting force which, multiplied by the peripheral speed of the wheel, represents the power of removed material. (Power=Peripheral speed x Cutting force).

A powerful grinder will provide enough power with maintained rotational speed, when applying feed-force. A suitable combination of operative rotational speed, feed-force applied by the operator and power of the grinder, will give you the best combination for the material removal required.

As rough grinding is performed with bonded abrasives, a limitation of rotational speed is necessary in order to prevent wheel fractures due to centrifugal force.

The peripheral speed is limited to 14200 S.F.P.M (surface feet per minute) for fiber reinforced depressed center, straight and cutting off wheels. Resin bonded cup and straight wheels are limited to a peripheral speed of 9000 S.F.P.M.

### SANDING AND POLISHING

Unlike die and rough grinding, sanding and polishing applies to the requirements of a surface. A fine surface will require a fine grit paper, fine Scotch-Brite, Bear Tex or a soft polishing bonnet. Rougher surface grinding will require a higher material removal rate thus requiring a coarser grit paper.

Similar to rough grinding, a rough surface, ground with coarse grit, will benefit from a high rotational speed. The limitations, however, are the maximum allowed speed of the backing pad and the fiber disc.

Normal sanding speeds for fiber discs of diameter 5", 7" and 9" are 4000 to 6000 rpm.

Polishing with different pastes and compounds require low speed in combination with high torque. Suitable speeds are 1800 to 2200 rpm.

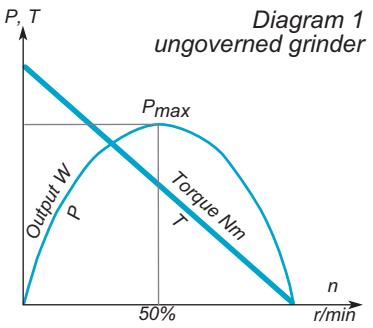

Sanding with wet coated abrasives is best performed at low speeds, because water is thrown out into the periphery and partly because of the fine grit.

Scotch-Brite, Bear Tex and flap wheels perform best at 50% of their maximum allowed rotational speeds.

### THE SPEED GOVERNOR

The amount of material removed in the grinding process depends on the power of the tool and the operative rotational speed. The diagram below shows the correlation between torque, power and rotational speed of a non governed pneumatic grinder.

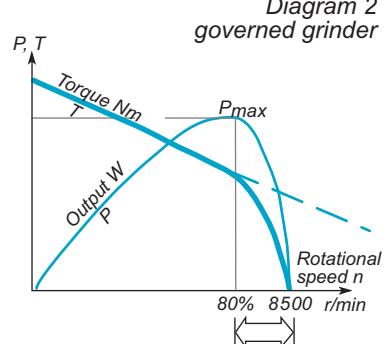

In order to remove material, the operator has to apply a feed-force on the work-piece. Consequently the rotational speed decreases and having passed approximately 50% of the free speed, the operative power output starts to decrease. Theoretically, the most material would be removed at approximately 50% of the free speed on a non governed grinder, (diagram 1).

The Atlas Copco grinders are built small and smooth, partly due to their speed governor. The air is governed to the air flow necessary to maintain the rotational speed regardless of load, (to the extent of the power of the grinder).

The correlation between power, torque and rotational speed of a governed grinder is shown in diagram 2.

A theoretical optimum of material removal is reached at approximately 80% of the free speed. The grinder generates max power, removing more material with applied feed force. The rotational speed decreases are negligible.

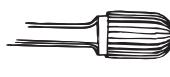

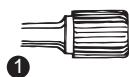

Air is used economically, as the flow through the motor is adjusted after applied load. Air consumption at free speed is minimized. The governor opens and lets in more air during load thus keeping the optimal rpm.

# Product Safety

## THIS IS YOUR RESPONSIBILITY

Always read and understand the safety information supplied with the tool and on [www.atlascopco.com](http://www.atlascopco.com). All locally legislated safety rules regarding installation, operation and maintenance shall be respected at all times.

### 1. Check the free speed

- The measured speed at a pressure of 6.3 bars must not exceed the rated speed, which is marked on the grinder.
- Remove the grinding wheel and outer flange before checking the free speed.
- Carry out checks daily.
- Make sure the speed marking on the tool is legible.
- Return the machine for repair in the event of overspeeding.

### 5. Check the flange and wheel

- Make sure that flange and wheel combinations correspond to national regulations.
- Check that the flanges are undamaged and clean.
  - Attach the wheel with the recommended torque.
  - Always disconnect the air-supply when changing the wheel or adjusting the tool.
  - Test-run your grinder in a protected area after assembling the wheel.
  - Check that the grinder is working correctly.

### 2. Check the wheel guard

The wheel guard protects your health and safety.

- Always use the recommended wheel guard.
  - Check that it is not damaged.
  - Never use a grinder without the wheel guard.
  - Position the wheel guard between yourself and the grinding wheel.
- Check that the trigger is working correctly.
- The trigger must never be removed or fixed by tape for example.
  - If the trigger is not working properly, make sure that it is replaced.

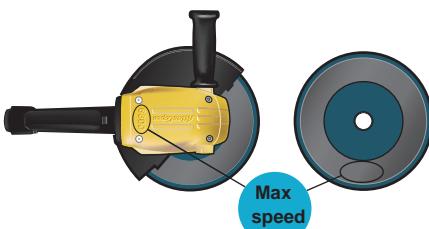

### 6. Personal protection equipment

Make sure that operators wear:

- Eye protection, goggles or a visor.
- Ear protection.
- Gloves.
- Steel toe-capped shoes.
- Protective clothing, such as a leather apron.
- A helmet (for heavier applications).
- Avoid loosely hanging clothing, hair, jewellery (risk of getting caught).

### 3. Maximum speed

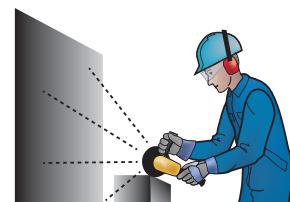

Make sure that the stated maximum speed of the grinding wheel is greater than or equal to the speed specified on the grinder.

### 4. Check the grinding wheel

Make sure that the grinding wheel is not cracked or damaged in any way.

- The grinding wheel should have the correct hole dimensions and be fitted correctly on the spindle to avoid unbalanced vibrations.
- Damaged grinding wheels must be removed and replaced immediately.
- Do not use dropped or damaged wheels, as these can cause serious injuries.

### 7. Working area

Ensure that the area in which you are working is kept free from other people so that no one can get injured.

- People nearby must also wear hearing and eye protection.
- Check that there is good ventilation and dust extraction from the premises.
- There should be a stand or a place available, on which the machine can be safely placed.
- Work within a sealed-off area, if possible with protecting walls, since there is a risk that broken discs could fly off.

#### During work

Stop using the grinder if abnormally loud noises and vibrations occur during use. The grinder and its accessories must not be modified in any way.

#### After the work is finished

Make sure the machine is switched off and has come to a complete stop before it is put down. Put down the tool carefully, so that there is no risk of the tool starting by itself.

#### Maintenance

Make sure you follow the service instructions provided and the recommended service intervals. Do not dismantle safety-related parts such as the speed governor and overspeed shut off. These parts should be completely replaced when damaged.

### TURBINE TECHNOLOGY BOOSTS PRODUCTIVITY

More efficient than a conventional vane grinder motor, the 2 stage turbine motor in the GTG25 provides an extremely high efficiency leading to great rate of material removal on the roughest surfaces. A speed governor ensures optimum process speed and process time is cut to a minimum. Since the job is done faster, the total energy consumption is significantly lower for each job.

### REDUCES OPERATOR STRAIN

The GTG25 is ergonomically designed in every aspect. Its high power-to-weight ratio, 3.4 hp of power in a 5.07 lb tool, makes grinding much easier for the user. Combined with other GTG25 features, for example, an ergonomic angled throttle handle and an autobalancer to minimize vibrations, the overall result is less strain on the operator.

GTG25 F120-527

GTG25 F085-727

### HIGHLY SERVICE FRIENDLY

With its all-metal design, the GTG25 turbine grinder is a robust, durable tool. Service intervals are long and servicing is easy thanks to modular internal components and Service Kits from Atlas Copco.

The GTG40 are the most powerful grinders in the turbine grinder range, with incredible power for their size and weight. The range includes angle and straight type grinders for virtually every common rough grinding application.

- For rough grinding and cutting off with depressed center wheels.
- For surface finishing with coated abrasives and wire brushes.
- For rough grinding with cup wheels.
- Dust extraction – Efficient accessory and standard model for extraction of air-borne dust in sanding applications with fiber discs.

GTG40 S060-611

GTG40 S060-700

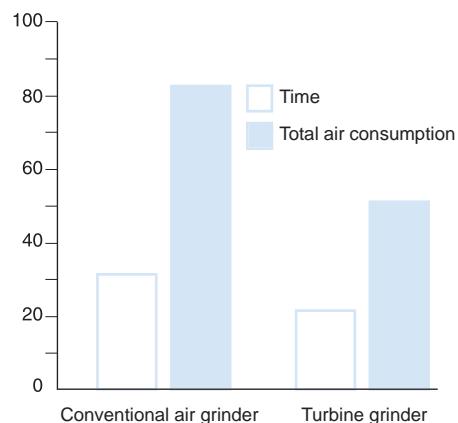

GTG40 S060-927

GTG40 S060-727

### MORE EFFECTIVE

*The turbine motor is more efficient than a conventional grinder motor. Therefore it takes less time to do the same job. Also the total air consumption will be a lot less for a specific job.*

GTG40

4081 0153 90

- LSF07 is a high speed model for precision grinding and polishing. LSF07 is delivered with a 1/8" collet and can be equipped with a 3 mm collet as optional.
- LSF12/LSV12 – Small and comfortable die grinder with up to 0.5 hp for maximum control in cramped spaces. All models are delivered with speed governor and a well balanced 1/4" Erickson collet.
- LSF19/LSV19 – All models in the 19 series are equipped with a powerful 0.67 hp air motor and a speed governor. LSF versions have scatter damping, for less vibrations. The angled models (LSV) have a patented solution that overcomes temperature and leakage problems commonly associated with angle head tools. The result is a leak free and self-cooled angle head. All models are lubrication free except for the high speed model LSF19 S460.
- LSF29/LSV29 – Powerful 1.2 hp air motor, with speed governor and scatter damping. Impressive power-to-weight ratio.
- LSF39 – One of the most powerful one-hand die grinders on the market with up to 1.7 hp. If you are looking for a tool that can boost your productivity and save you money, the LSF39 is the right tool! The die grinders in the 38

series are lubrication free with scatter damping for maximum operator comfort and safety.

## Accessories Included

### LSF07

Air hose  
ErgoNIP 08  
Collet 1/8" (See ill. 1)

### LSF/LSV12, LSF/LSV19, LSF29

Spanner  
Collet 1/4" (See ill. 1)  
Air hose, air hose nipple and clamp  
Exhaust hose

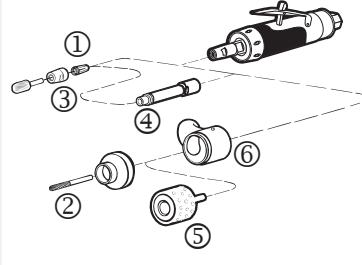

### LSF39

Air hose nipple  
Collet 1/4" (See ill. 1)

# Straight Grinders

# For Cone Wheels and Collet

Atlas Copco straight grinders for cone wheel or collet, are suitable for grinding in holes and cavities in castings, etc. They require rough abrasives, which must be attached to the tool with a rigid shank or be mounted directly to the spindle.

All Atlas Copco tools are designed with focus on operator ergonomics and maximum power, the best combination for maximum productivity.

- If you need maximum power, then LSR48 is the natural choice. You will have access to 2.4 hp in combination with auto balancer for even less vibrations. All packed in a strong and light package.

LSR48 CW

| Model         | Max free speed r/min | Rec. wheel diameter in | Max output hp | Weight lb | Length in | Air consumption at max output cfm | at free speed cfm | Spindle thread and length in | Air inlet thread NPT | Ordering No. |

## Accessories Included

Whip hose  
Wrench

## Service Kits

48 series

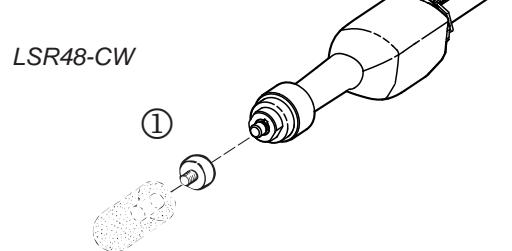

4081 2023 90

## Optional Accessories

### LSR48

See illustration Ordering No.

Adapter for cone wheel with thread  
UNC/W 5/8" 1 4150 0945 01

## Productivity Kits

| Model                          | Max air flow | Hose 16.4 ft | Coupling     | Lubrication | Ordering No. |
|--------------------------------|--------------|--------------|--------------|-------------|--------------|
| MIDI Optimizer F/RD EQ10US-T13 | 65 cfm       | Turbo 13     | ErgoQIC 10US | Yes         | 8202 0850 29 |
| MIDI Optimizer F/R EQ10US-T13  | 65 cfm       | Turbo 13     | ErgoQIC 10US | No          | 8202 0850 30 |

NOTE: Tool nipple is not included in the Productivity kit and needs to be ordered separately together with the tool.

## For Depressed Center and Cut-off Wheels

## Angle Grinders

No matter which of our vane grinders you choose you will get durable tools with high power and low weight. In addition, vibrations and noise are on a low level.

- LSV19 – For work in cramped spaces, the LSV19 series is small yet powerful, and lubrication free.

Features: Speed governor, sealed anglehead, thermally insulated handle and lubrication-free air motor.

- LSV28 – Small, yet powerful giving 1 hp. Available in an extended version for optimal accessibility.

Features: Speed governor and thermally insulated handle.

- LSV39 – If you are looking for the most powerful one-hand grinder on the market, then you have found it – up to 2.4 hp.

Features: Speed governor, sealed angle head, lubrication-free air motor, thermally insulated handle, spindle lock and adjustable wheel guard.

- LSV48 – Our most powerful angle vane grinder with 2.5 hp for ultimate productivity.

Features: Speed governor, sealed angle head, lubrication-free air motor, thermally insulated handle and spindle lock. The autobalancer reduces the vibrations by up to 50%.

## For Sanding and Polishing

## Angle Sanders

- LSV12 series** – For finer work where less power and more control are needed. Available with collet or threaded spindle.

Features: Speed governor, high quality gears and lever with feathering characteristics.

- LSV19 series** – For work in cramped spaces. Available with collet or threaded spindle versions.

Features: Speed governor, sealed angle head and lubrication-free air motor.

- LSV28 series** – The 28 series comes in various speeds.

Features: Speed governor, sealed angle head, LF models have lubrication-free air motor.

- LSV39 series** – Powerful one hand sander for medium rough to rough sanding.

Features: Speed governor, sealed angle head, lubrication-free air motor and spindle lock.

- LSV48 series** – Our most powerful angle vane sander with 2.5 hp for ultimate productivity.

Features: Speed governor, sealed angle head, lubrication-free air motor, autobalancer and spindle lock.

# For Sanding and Polishing

# Belt Sanders

LMB27/LMB35 are suitable for precision sanding where access is difficult with conventional sanders.

The head rotation provides a versatile solution for many applications.

# Orbital and Random Orbital Sanders

Atlas Copco series of random orbital sanders combines all the important customer and application requirements in a very competitive range of products. Applications like sanding before painting and surface coating, polishing with wax and surface conditioner are all quickly done with the small and easily operated LST20-range of sanders.

All models are lubrication free and have silicone free components. They have two grip options in the same handle. In addition, one smaller grip model is included. The full range includes standard models and extraction models. There are also two orbit diameters to choose from in the model range.

- **Lubrication-free** – Avoids contamination of workpiece. No oil in the exhaust air.

| Model  | Max free speed r/min | Pad size mm | Orbit dia mm | Max output hp | Weight lb | Height mm | Length mm        | Air consumption at free speed cfm | Rec. hose size mm | Air inlet thread NPT | Ordering No. |

<sup>a</sup> Includes dust collecting bag.

H = With handle.

<sup>b</sup> Required air flow 150 m<sup>3</sup>/h or 88 cfm.

S = Without handle.

<sup>c</sup> Required air flow 60 m<sup>3</sup>/h or 35 cfm.

-9 Velcro pad, 9 holes.

<sup>d</sup> 186 mm (7.3") suction hose connector included.

## Accessories Included

### LSO

Base pad  
Perforating plate  
Hose nipple for 8 mm hose

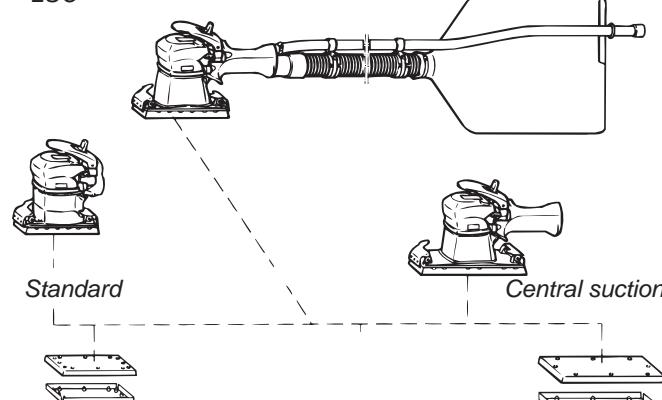

### LST20/21/22

Velcro pad  
U-wrench for pad change  
Air hose nipple  
Dust hose and bag (LST21)  
Large and small grip cover

### LST30/31/32

Velcro pad  
Bar for changing pad  
Hose nipple for 8 mm hose  
LST31 incl dust collection kit

### LSO

# Dust Extraction

---

The fact that dust can represent a hazard in the working environment is well documented.

Dust particles from certain materials are dangerous to health. Even inert dust particles that cause no permanent damage can still be retained in the body and make breathing more difficult. The size of dust particles of most concern are those below 0.005 mm.

Efficient dust control can make a significant contribution to efficiency and productivity in industrial operations. It is already a requirement in countries with strict health and safety regulations.

Efficient dust control will:

- Reduce the health risk for operators exposed to potentially dangerous particles.
- Give a more favourable working environment which will encourage greater efficiency and effort from those who operate industrial tools.

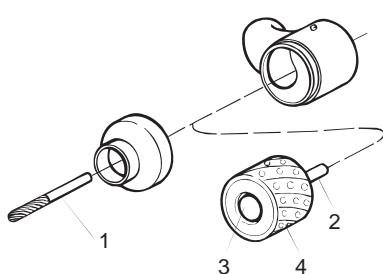

The most efficient method of dust collection is dust extraction at the point of dust creation, i.e. on the tool itself. This not only ensures very efficient extraction but also allows a relatively low power vacuum source to be used.

Atlas Copco spot suction kits provide an extraction hood fixed to the tool. It is fitted with a plastic or brush edge to trap heavier particles as well as the small ones. The following pages show a number of applications and the necessary dust extraction kits with their contents.

**ROUTER**

Pattern fixture cutting of composite in the aerospace industry as well as trimming of composite materials is preferably done with a router. The LSK37 is the only router with dust extraction and support bearing integrated into one unit. This gives the LSK37 excellent performance and ergonomics in most composite applications.

- Productive** – The speed governor maintains the rotational speed at applied feed-force which enables fast and effective cutting and prevents the bit from clogging.
- Ergonomic** – An integrated dust extraction hood for deportation of hazardous dust, thermally insulated throttle handle, sound dampening exhaust valve and piped-away exhaust air provides the operator with the best working environment.

LSK38

Suction requirement: 200 m<sup>3</sup>/h. **NOTE:** LSK38 delivered without rotor housing

Cutting operations in glass and carbon fiber as well as metal sheet, wood and steel can successfully be performed with a circular cutter.

- **Effective** – LCS10 and LCS38 cut to a depth of 10 and 26 mm respectively.
- LCS38 is suitable for diamond coated blades only.
- **Dust extraction** – Cutting of composite materials generates dust containing particles hazardous to health. The dust must be deported in order to prevent the operator from inhaling it.

LCS38 is equipped with a cutter blade guard with integrated dust extraction hood for external vacuum source.

LCS38

LCS10

# These tools make light of the toughest jobs

*Atlas Copco percussive tools are ideal for all material removal tasks in foundries, engineering workshops and shipyards. Built-in-ergonomic features such as vibration damping reduce the human load, delay fatigue and help protect the operator against the ill effects of long-term exposure to vibration and noise.*

Our tools are made out of lightweight alloys to keep weight down while maintaining performance. This makes our tools extremely effective in the hands of your skilled operators.

### **WELD FLUX REMOVAL**

Our tools are used when fettling welds from flux and spatter and in general scaling operations.

The conventional scaler RRC 13 and RRC 13B with a blowing function are the preferred models for these types of application. These tools have the right power and a sturdy reliable design. They also have a low vibration level for conventional models.

### **RUST AND PAINT REMOVAL**

Rust and paint removal is a common application found in various types of industries such as shipbuilding, large transport sector and on offshore rigs.

Our RVM07B has low noise and is vibration damped. The standard chisel delivered with the tool is carbide tipped for a long service life. The tool is also equipped with a clean blowing device.

For lighter jobs the needle scaler RRC 13N is the ideal tool. Needle sets of different shapes and material are available to suit most operations.

### **CHIPPING AND SCALING**

Percussive tools for chipping and scaling are widely used in all kinds of metalworking, construction and other industrial areas. Applications could be slag chipping, concrete trimming and sheet-metal cutting.

We offer high power-to-weight tools for these kind of applications. RRF 21/31 and RRD 37/57 models are vibration damped for operator comfort.

Our RRC22-RRC75 models are robust and highly dependable conventional chipping hammers suitable for heavy roughening.

# Product Safety

IMPORTANT: All local safety regulations with respect to installation, operation and overhaul must always be followed.

## AVOID ACCIDENTS

- ① The chisel, die or punch may fall out or may be shot out of the tool accidentally causing serious injury.

- To prevent injury from a flying chisel:
- Always use a retainer.
  - Inspect the retainer for wear or damage regularly.

- Be aware that the chisel may break during operation.
- Never trigger a hammer unless held against a work piece.
- Remove chisel, die or punch from tool when work is over.
- When finishing a job, disconnect the tool from its air supply.
- Before changing accessories, chisel or die – disconnect the tool from the air supply.

- ② Chips and sparks should be prevented from striking an eye or another worker.

To prevent vision loss:

- Always wear eye protection.
- Isolate work of this kind by using barriers between work stations.
- Do not use the tool for other purposes than it is intended for.

- ③ Gloves protect fingers from pinching, scuffing and scraping.

- Protective shoes may prevent your feet from being injured.

- ④ Explosive atmosphere must not be ignited.

To prevent injury and property loss from fires:

- Use other technique.
- Use accessories of non sparking material (e.g. needle attachment of Beryllium copper for a needle scaler).

- ⑤ Electric shock may be fatal.

- Avoid chiseling into electric wiring hidden inside walls etc.

## LONG TERM RISKS

- ⑥ Always use ear protection.

- To prevent gradual loss of hearing due to exposure to high noise level – wear ear protection.

- ⑦ Vibration may be harmful to hands and arms.

- Use vibration damped tools if available.
- Reduce the total time of exposure to vibrations, particularly if the operator has to guide the chisel by hand.

- ⑧ Dust generated during operation may be harmful.

- Use spot suction or a breathing apparatus.

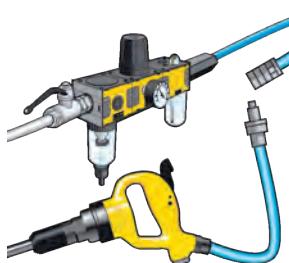

## PROPER USE AND MAINTENANCE

- ⑨ Do not perform idle blows with a hammer.

- They will cause high internal stresses and shorten the life of the tool.
- Note the risk of shooting out the chisel, die or punch if the retainer is not in order or damaged.

- ⑩ Quick coupling.

- If a coupling is used on a percussive tool, it should be separated from the tool by a whip hose (length 0.5 m).

- ⑪ Follow the tool manual and the lubrication instructions.

- ⑫ Perform overhauls at regular intervals.

## Vibration-damped and Silenced

## Chipping Hammers

- RRF21/31** have a sturdy D-handle in light metal alloy for a high power-to-weight ratio and steady grip. The compact, vibration-controlled design offers good accessibility and ease of use.
- RRD37/57** are light, quiet and have a long service life. They have light alloy tool casings, very low vibration and noise levels, vibration damping in both hand grips, and piped away exhaust.

<sup>a</sup> Effective piston dia 19 mm, 0.75 in.

<sup>d</sup> Spline.

-01 and -11: Guided models,

<sup>b</sup> Effective piston dia 21.5 mm, 0.85 in.

<sup>e</sup> Integrated hose barb.

-02 and -12: Non guided models.

<sup>c</sup> ISO.

## Chipping Hammers

- Dependable** – Their robust construction makes them highly dependable.
- Efficient** – RRC65 and RRC75 have a blow rate which makes them particularly suitable for roughening.
- Chisel retainer** – for safer jobs – RRC22-RRC75 are delivered with a chisel retainer as standard. For the same reason choose a tool that can be guided via the machine itself and not by holding the chisel.

Atlas Copco chipping hammers of series RRC are delivered with a standard, guided ISO hexagon nozzle (-01) or a round, non guided shank nozzle (-02).

## Accessories Included

### RRF MODELS

Chisel retainer and a hose fitting

### RRD MODELS

Flat chisel  
Silencer complete  
Hand grip  
Key

### RRC MODELS

Chisel retainer and hose fitting

## Optional Accessories

| Model                        | Ordering No. |
|------------------------------|--------------|
| <b>Power regulator</b>       |              |
| RRF21 and -31                | 3512 0273 80 |
| <b>Retainer, open type</b>   |              |
| RRF21                        | 3512 0290 90 |
| RRF31                        | 3512 0305 90 |
| <b>Protective handle kit</b> |              |
| RRF21                        | 3512 0349 81 |
| RRF31                        | 3512 0349 82 |

### CHISELS

For a wide choice of chisels, see pages with "Chisels" at the end of this chapter.

## Productivity Kits

| Model                          | Max air flow | Hose 16.4 ft | Coupling     | Lubrication | Ordering No. |
|--------------------------------|--------------|--------------|--------------|-------------|--------------|
| MIDI Optimizer F/RD EQ10US-T13 | 65 cfm       | Turbo 13     | ErgoQIC 10US | Yes         | 8202 0850 29 |
| MIDI Optimizer F/R EQ10US-T13  | 65 cfm       | Turbo 13     | ErgoQIC 10US | No          | 8202 0850 30 |

**NOTE:** Tool nipple is not included in the Productivity kit and needs to be ordered separately together with the tool.

## Scalers

## Vibration-controlled

RVM07B is the obvious choice for task such as weld dressing light concrete trimming and for removal of paint and rust.

- **Vibration-damped with low-noise level.**
- **Two-job capacity** – RVM07B features a clean-blowing device which is very useful in order to keep the work piece clean from slagg and other particles from the process.

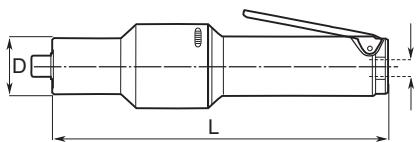

RVM07B

| Model  | Blows<br>Hz | Weight incl.<br>standard<br>chisel |     | Air<br>consumption |     | Hose size |     | Air<br>inlet<br>NPT | Ordering No. |

### Dimensions

| Model  | L<br>in | D<br>in |
|--------|---------|---------|
| RVM07B | 10.7    | 1.5     |

Choose between two different models for heavy slag chipping and for instant trimming of concrete.

- **High removal rate** – RRC13 is very effective and has a high removal rate in relation to its low weight.
- **Well proven** percussive mechanism and retainer.
- **Two-job capacity** – RRC13B with extra clean-blowing device.
- **Improved back head** – Throttle valve and lever with really Heavy Duty performance for long service life. Clean blowing system with twice the previous blow

RRC13B

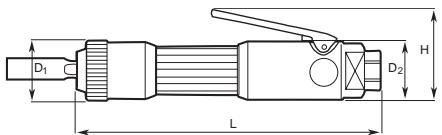

capacity. Big blow button for easy operation and sturdy valve stem to resist rough handling.

|--------|---------|---------|----------------------|----------------------|
| RRC13  | 8.7     | 2.6     | 1.8                  | 1.6                  |
| RRC13B | 9.1     | 2.6     | 1.8                  | 1.6                  |

The effective needle scaler, type RRC13N, is based on the same fundamental design as the straight chipping hammers of type RRC13 described above.

- **Sturdy design** – Easy to maintain.
- **Versatile** – The needle scaler is used to remove welding slag, rust and paint from steel structures.

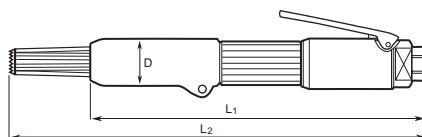

RRC13N

## Minimum vibration, maximum productivity

*Atlas Copco's top-of-the-line riveting systems are designed to minimize the riveter's exposure to vibration, while maintaining high tool performance. The RRH recoilless riveting hammer has an air cushion behind the hammer piston which efficiently kills vibrations. The same air dampening technique is used in RBB bucking bars. It raises individual productivity and boosts output in your plant.*

The Atlas Copco riveting system includes vibration-damped hammers RRH and bucking bars RBB – as well as conventional riveting hammers RRN.

The vibration-damped riveting hammers – RRH – are available in different sizes.

Each size is available in "Trigger start" and "Push to start" models.

The conventional riveting hammer – RRN – is available in one size: RRN11P.

### CRITICAL FACTORS

The number of blows and the power are critical factors which determine the strength of a riveted joint. A few powerful blows are needed to fill out the hole and form a head when upsetting the rivet. The impact force is critical to some extent when working with aluminum alloys, as too many blows can embrittle the metal.

In terms of capacity, the tools overlap. The selection guide below helps you to find the right tool for your particular application of riveting.

The vibration-damped bucking bars RBB are available in two versions – the simple spring damped – SP type and the air servo assisted SA type.

## Selection Guide

| Hammer model <sup>a</sup> | Nominal Max. Rivet Diameter Capacity |             |       |             |          |             | Bucking bar model required <sup>b</sup> |  |
|---------------------------|--------------------------------------|-------------|-------|-------------|----------|-------------|---|--|
|                           | Dural                                |             | Steel |             | Titanium |             |   |  |
|                           | mm                                   | in          | mm    | in          | mm       | in          |   |  |
| RRN11                     | 2-5                                  | 3/32 - 3/16 | 1-4   | 3/32 - 5/32 |          |             |   |  |
| RRH04                     | 2-5                                  | 3/32 - 3/16 | 1-4   | 3/21 - 5/32 |          |             | RBB04                                   |  |
| RRH06                     | 4-7                                  | 5/32 - 1/4  | 3-6   | 1/8 - 1/4   | 2-4      | 3/32 - 5/32 |   |  |
| RRH08                     | 5-8                                  | 3/16 - 5/16 | 4-7   | 5/32 - 1/4  | 3-6      | 1/8 - 1/4   |   |  |
| RRH10                     | 5-9                                  | 3/16 - 3/8  | 6-8   | 1/4 - 5/16  | 4-7      | 5/32 - 1/4  |   |  |
| RRH12                     | 8-11                                 | 5/16 - 7/16 | 7-10  | 1/4 - 3/8   | 6-9      | 1/4 - 1/8   |   |  |
| RRH14                     | 11-13                                | 7/16 - 1/2  | 9-12  | 3/8 - 15/32 | 8-11     | 5/16 - 7/16 |   |  |

<sup>a</sup> Hammer capacity depends on direct/indirect riveting as well as Panel density and stiffness.

<sup>b</sup> Bucking bar capacity is dependent on dolly weight.

## Riveting Hammers

## Vibration-damped

RRH is a unique series of riveting hammers incorporating completely revolutionary ergonomic advantages.

- **Versatile** – RRH can easily cope with rivets in diameters up to 13 mm.
- **Vibration-damped system** – The RRH vibration-damped riveting hammer, combined with the RBB vibration-damped bucking bar, offer an unbeatable system for riveting.
- **Adjustable power**.
- **Adjustable hand guard** – Support hand grip is vibration-damped.
- Models with trigger start for excellent handling. Pistol grip with rubber coating.

-01 means 10 mm short shank rivet set.

-02 means 10.2 mm short shank rivet set.

-12 means 10.2 mm stand shank rivet set.

## Riveting Hammers

## Conventional Type

For riveting in confined spaces we recommend our RRN11 riveting hammer.

- **RRN11** – is the smallest riveting hammer available on the market, with unique accessibility.
- **Adjustable** – The RRN11 has a built-in adjustment knob with which you can set the power for different rivet materials and sizes.
- **Controllable** – The trigger is easily operated and provides excellent control.

## Bucking Bars

## Vibration-damped

An efficient riveting system consists of vibration-damped bucking bars together with vibration-damped riveting hammers.

- **Cramped spaces** – Mini bucking bars RBB04SP are ideal for work in confined spaces. The large mass types -04, -05 will in most applications set the rivet faster than the smaller models.

# Reliable, productive and comfortable to work with

*The handheld drills in Atlas Copco's wide range are of the highest quality and built to provide consistent reliability and performance in a wide range of applications. Their advanced ergonomic designs make your job easier, safer and more efficient.*

From the time our first drill was produced in 1901, Atlas Copco has demonstrated a genuine understanding of customer needs. Our drills have evolved to meet changing customer demands over the years. Whatever the job, Atlas Copco has a drill to match your exact requirements.

### **RELIABLE**

When you pick up an Atlas Copco drill, you can be confident that it will do the job over and over again.

### **POWERFULLY PRODUCTIVE**

Despite their compact designs, our drills consistently deliver all the power you need. Their high power-to-weight ratio ensures maximum material removal in the shortest possible time.

### **ERGONOMIC**

Thanks to 50 years of focusing on ergonomics, Atlas Copco drills fit comfortably in your hand. Grips are anatomically shaped to keep your arm and wrist straight, reducing the risk of injury during

long-term use. The light weight and perfect balance of each drill enables you to guide it smoothly and easily. Low noise and vibration levels make the tools comfortable to work with all day long.

### **DURABLE, LOW MAINTENANCE**

The rugged, lubrication-free designs of our drills can withstand the toughest industrial situations and go on working day in, day out. Maintenance requirements are low.

### **QUALITY THROUGHOUT THE TOOLS' LIFE-CYCLE**

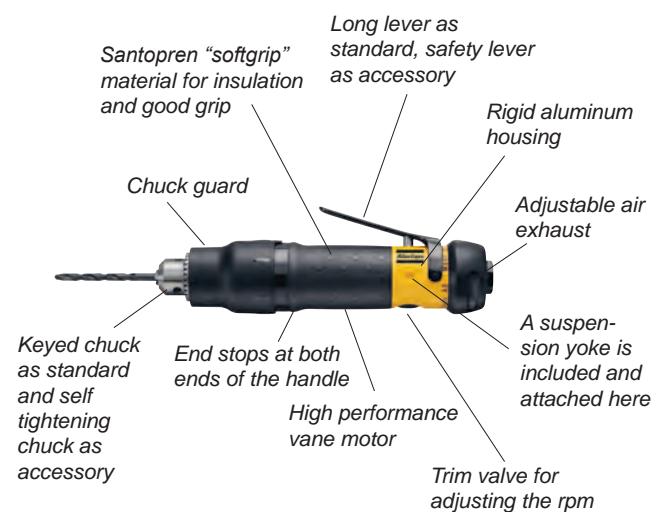

Atlas Copco stands for quality, from the manufacture of critical drill components, through production and sales, to service and support throughout the tools' long life-cycle.

<sup>a</sup> Remember that, if the speed is too low the cycle time increases.

Regardless of which model you choose, you'll get a product with superior ergonomics and productivity.

- Quiet – Very low noise level.
- Comfortable grip – For high precision.
- Two-hand grip available – Gives even greater flexibility.
- Lubrication-free – For clean working environment and operator comfort.

# Straight Drills

LBB

Atlas Copco straight drills are primarily intended for vertical drilling operations and for drilling in cramped spaces.

- Quiet – Very low noise level.
- Very high power to weight ratio.
- Adjustable exhaust – The exhaust air is directed away from the operator.
- Lubrication-free – LBB16 drills are lubrication-free for clean working environment and operator comfort.

# Modular Drills

The LBD16M and LBP16M are designed with the operator in focus. A lightweight tool with a powerful air motor combined with interchangeable angle heads equals excellent flexibility in any handheld drilling operation. Swap to a new head in a matter of seconds with the easy-to-use quick change mechanism. With the LBD16M and LBP16M, you are always ready to take on any job in ever changing drilling applications.

- Quick change system – Easy-to-use and robust quick change design for high durability.
- Indexable head – The head can be positioned in any direction for maximum accessibility.
- High power lubrication free motor – No more oil aerosols, for a safer and cleaner working environment.

LBD16M 4081 0322 90

LBP16M 4081 0271 90

The Atlas Copco LBS36 drill is equipped with an integrated micro stop. It is designed for the aerospace industry where the focus is on high-precision drilling, reaming and countersinking.

- Accurate – The integrated micro stop function makes the LBS36 unique for high-precision drilling of rivet holes and other fasteners. Minimized spindle run-out is achieved by eliminating standard drill chuck.
- Ergonomic handle design – The integrated micro stop function makes the tool shorter and lighter in weight.
- Flexible – Can be used for drilling, reaming, countersinking and, in certain applications, a combined operation using a form bit.
- Dust extraction – Equipped with a specially designed spot suction system for working in composite materials.
- Lubrication-free – For clean working environment and operator comfort.

## Service Kits

LBS26 4081 0507 90

LBS36 4081 0005 90

Atlas Copco tappers are designed for tapping and thread-cleaning operations with thread taps. The tools are fitted with a tap chuck as standard.

- Comfortable and effective – The ergonomically designed handle gives a comfortable grip and maximum performance.
- Higher productivity – Double speed when you withdraw the machine.
- Low noise level – Rear-directed exhaust gives a lower noise level.
- Lubrication-free – For a clean working environment and operator comfort.
- Quick change system – Upgrade your old tool, or order a new one with this system. Various tap holders can be used to change a broken tap or to change to a different tap size.
- Lower cost – The efficient air motor, together with interchangeable components from our standard drills, cut your costs.

# Robust and versatile, the PFD-drills are your best choice for holemaking

### **PRODUCTIVITY**

With this platform you have all you need for hole preparation. Reduce cycle time and increase output with a powerful turbine motor. This robust tool is well suited for factory environment and the long service intervals maximizes uptime of your investments.

### **HOLE QUALITY**

Keep your workplace clean with Atlas Copco's ChipLet® feature which makes chips easy to evacuate. With ChipLet® during countersinking, you have a one-step process. Giving process improvements in terms of both productivity and quality.

### **ERGONOMICS**

My operators will really appreciate how all the controls on the tool are grouped in one and the same place. This reduces the risk of operator errors. The tool is also very well balanced which makes it easy to move around.

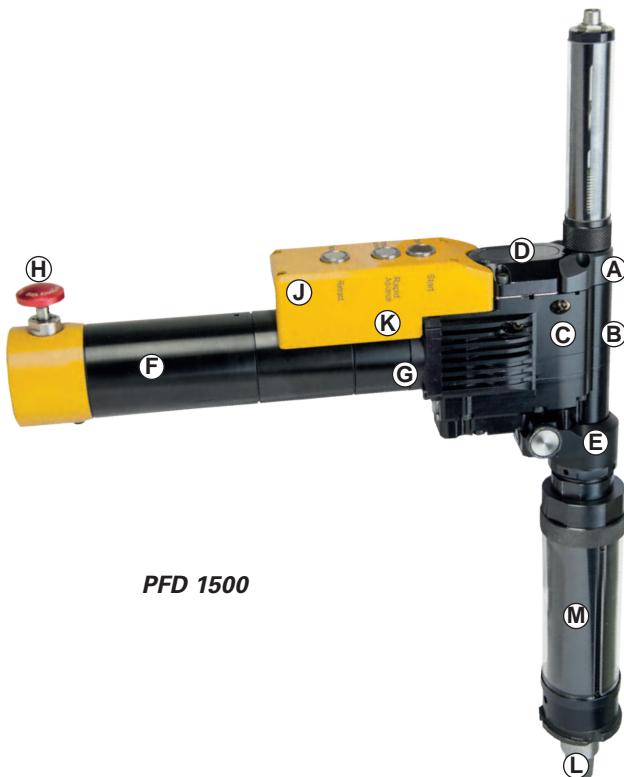

### **SAFE OPERATION**

The modular design means fewer back-up tools. You can also save on service as the platform is based on standard, re-usable components.

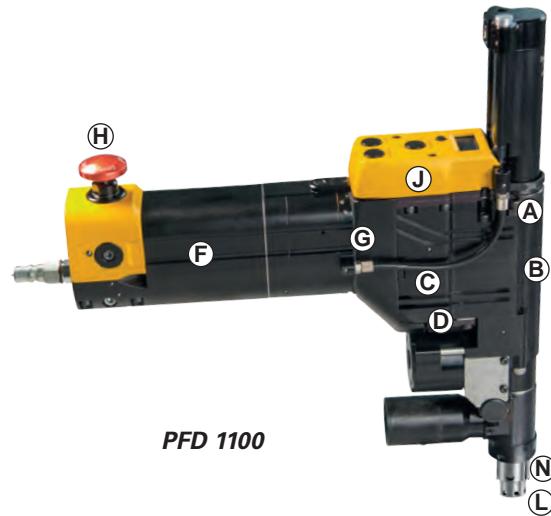

### **SUPPORT**

The modular approach means quick deliveries when needed, and makes it easy to re-work your existing products when urgent applications come up. With our technical documentation and support you will quickly put new tools to work on your assembly line.

**PFD 1500**

**PFD 1100**

## PFD 1500

| Item                | Ordering No. |
|---------------------|--------------|
| PFD1500RA-200-R     | 8440 1500 39 |
| Indexer-1-9-16      | 4141 0306 90 |
| PFD1500-IPR2        | 4141 0034 92 |
| Spindle-1500-12-9-6 | 4141 0004 91 |
| Guard-1500-12       | 4141 0323 91 |
| Nose-8IN-1-1-2      | 4141 0245 90 |

**Example:** Twistlock model with rapid advance and indexer. Spindle with 9/16"-18" interface, speed of 200 rpm and feed of 0.05 mm/r (0.002 IPR). Suitable for drilling of 19 mm holes (3/4") in Ti or Ti/CFRP stacks.

## PFD 1100

| Item               | Ordering No. |
|--------------------|--------------|
| PFD1100RA-IFB110B  | 8440 1110 66 |
| Spindle-CC-1100-2  | 4141 0742 90 |
| Guard-1100-2in-p   | 4141 0826 92 |
| Guide-CC-R-1100-M6 | 4141 0743 91 |
| Bush-CC-1100-53    | 4141 0707 92 |
| Foot-CC-1100-MINI  | 4141 0764 90 |
| Mandrel-CC-25.4-A  | 4141 0806 28 |
| Collet-CC-1        | 4141 0813 28 |

**Example:** Concentric collet model with inboard lubricator, counter and ChipLet®. Spindle with M6 interface, speed of 2600 rpm and feed of 0.07 mm/r (0.003 IPR). Suitable for drill and countersink of Ø 6.35 (1/4") holes in Al or Al/CFRP stacks.

- (A) Optional ChipLet® module which effectively breaks chips while drilling for improved chip evacuation and hole quality.
- (B) Angle head with superior durability with double needle bearings for both feed and drive gear.
- (C) Overload clutch protects the angle head and drive train from overthrust.
- (D) The replaceable feed cassette system enables quick and easy change of feed rate.
- (E) Optional indexer which allows the tool to be locked in the jig also when free space is compromised.
- (F) High torque, high power governed air motor maintains cutting speed while drilling.
- (G) Easy-to-change split gearbox for quick adjustment of rpm.

- (H) Emergency stop fully compliant with the European machinery directive for a high level of safety.
- (J) Rapid advance of spindle reduces cycle time and makes setup a quick and safe task.
- (K) Reliable and user-friendly tool controls with optional cycle counter.
- (L) Best in class spindle power and thrust capabilities. A wide range of speeds and feeds.
- (M) A large selection of tool noses with or without vacuum port makes the tool fit existing drill jigs.
- (N) Concentric collet foot which allows clamp force for countersinking up to diameter 22 mm (7/8"). Debris protection and efficient vacuum exhaust of chips. Foot is modular and easily removed for drill bit change.

# Ensure the full potential of your pneumatic tools

*To ensure that you benefit from the full potential power of your tools, Atlas Copco has developed a full range of air line infrastructure products to be used with pneumatic tools and equipment.*

### **PRODUCTIVITY**

By using Atlas Copco's air line infrastructure products you ensure that you have a correct air line installation for your tool. This will provide the correct air flow to the tool, ensuring that you benefit from its full potential power, and that you reach the correct torque in torque-controlled tools. By using the recommended installation you will also minimize the service requirements of the tool.

### **ENERGY EFFICIENCY**

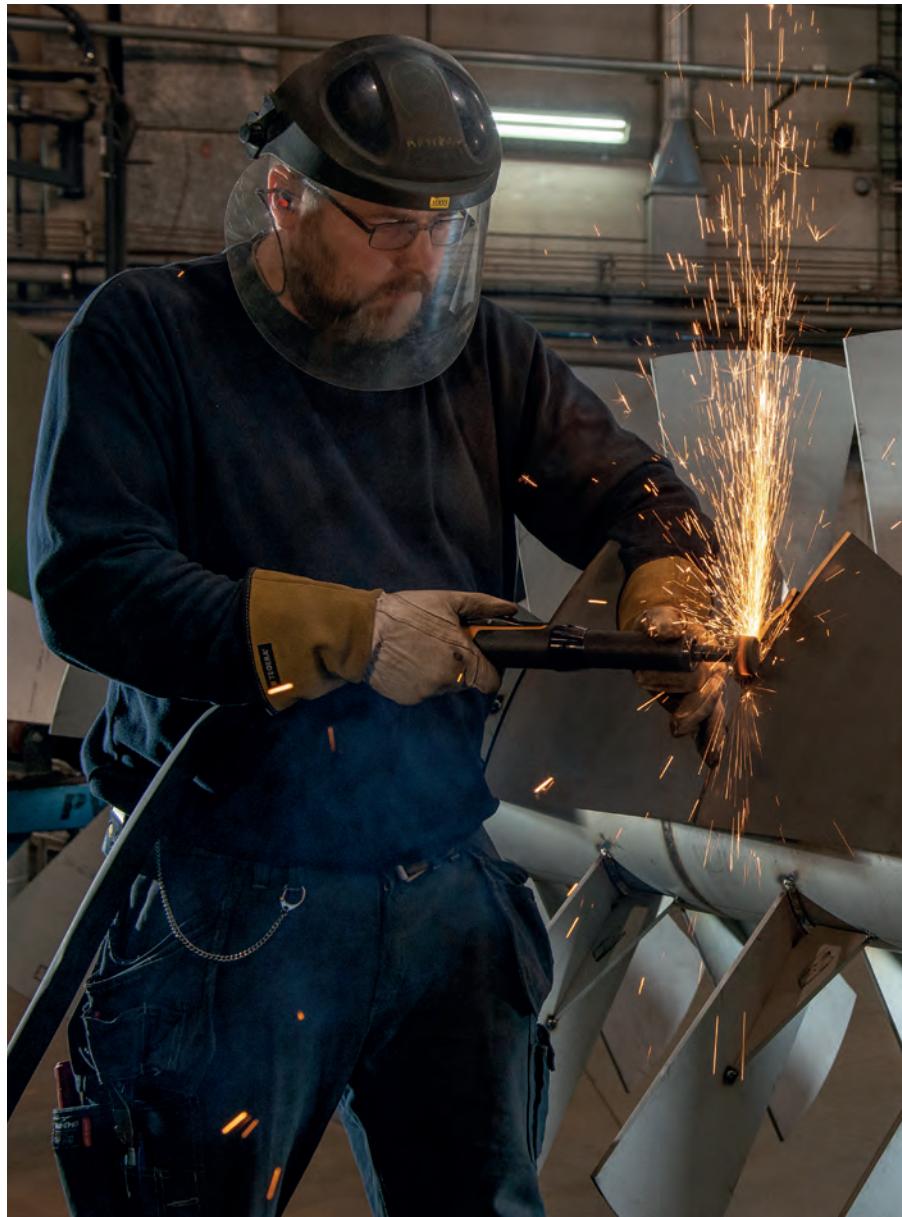

With a correct installation you will not only achieve the tool's full potential power, you will also reduce energy costs. All Atlas Copco products and accessories are designed for minimum pressure drop, which ensures that the compressor is not "working overtime".

### **SAFETY**

All products and accessories are designed to meet the highest demands for a safe working environment. Atlas Copco has developed a wide range of safety couplings and hose reels to meet today's high standards in terms of workplace safety.

### **QUALITY**

All Atlas Copco products and accessories are made of the highest quality materials for long production cycles and to withstand rough treatment. Choose Atlas Copco and you will be sure of high quality products.

# Product Safety

All local safety regulations with respect to installation, operation and overhaul must always be followed. Please read the separate instructions regarding safety which are supplied with all products in order to improve your own safety!

## BALL VALVE

- Switch off the compressed air with the ball valve when you are not working (see fig. 1).
- Open all ball valves gently in order to discover improperly tightened devices (see fig. 5).

## AIR PREPARATION UNITS

- Please check for solvents which change the structure of polycarbonate<sup>a</sup> bowls.

These solvents make the polycarbonate brittle so it can break. Normally polycarbonate is not easy to break. If you need to use aggressive solvents, please contact us and we will help you choose the right equipment.

- Use bowl guard.

An easy way to eliminate this type of accident is to use a bowl guard on MINI and MIDI units. The MAXI unit has an aluminum bowl with a new, more chemical resistant plastic on the inside as standard.

Check that the bowls are properly tightened and that all units are fitted together before switching on the compressed air with the ball valve.

## QUICK SAFETY COUPLINGS

To increase the safety and reduce the risk of operator injuries we recommend you to always buy couplings with a safety function. Couplings with a safety function are disconnected in two stages in order to vent the coupling and minimize the risk

of sudden component separation, which has the potential to cause operator injury.

Never open a quick coupling with a screwdriver in order to ventilate the air.

## CLAW COUPLINGS

- Be very careful (see fig. 1+2+3).

They are always open and must be used very carefully. To increase safety when using claw couplings, we recommend the claw LNH claw coupling with a lock nut.

## CLAMPS AND CONNECTIONS

- Avoid screwdrivers when tightening.

Check that they are properly tightened. Avoid screwdrivers when tightening, they can easily slip and damage your hand. Use a wrench. If you need to use a screwdriver, mount the clamp in a vice.

## HOSES

When mounting hoses on hose connections, use water and soap in order to make the hose slip on to the connection. Do not use oil. Water and soap will dry up. Remove leaking hoses. A small leakage can quickly become a large hole.

## BLOW GUNS

- Use the safety version. It eliminates the risk of air at high pressure coming into direct contact with skin.

<sup>a</sup> Polycarbonate has good chemical resistance to all solvents except chemicals containing acetone, benzol, glycerine, some hydraulic and synthetic oils, chloroform, methyl alcohol, carbon tetrachloride (and similar solvents), carbon disulphide, perchloroethylene, toluene, trichloroethylene, xylene (nitrocellulose, thinner), acetic acid.

## FOLLOW THIS ORDER WHEN WORKING WITH CLAW COUPLINGS.

### How to open a claw coupling:

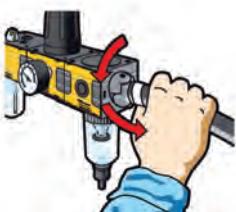

- ① Close the ball valve.

- ② Run the tool so the air ventilates out.

- ③ Release the claw coupling.

### How to close a claw coupling:

- ④ Make sure that the two claw couplings are mounted together.

Use claw couplings with lock nut (LNH) or use a lock spring for safer locking.

- ⑤ Open the ball valve gently.

## Saving your tooling investment

*Being global solution providers for tooling, compressors, vacuum solution, etc, we at Atlas Copco would like to assist you, our valued customers in achieving the maximum productivity out of your tools. We know that a well-designed air network can reduce your air leakage cost, enhance the performance of your tool, lead to greater productivity, energy efficient and in turn reduced down time.*

Atlas Copco air preparation units, such as filters, regulators and lubricators, enable your tools to run at optimal levels, hence reducing downtime and increasing productivity. The filter ensures compressed air comes cleaner to the tool without any particulates that might affect the performance of your tool in an adverse way, the regulator helps maintain a stable dynamic pressure and the lubricator helps to oil the tool in a controlled way.

### **FILTER – (F)**

Separating water and solid particles from the airline and compressor. Using filters results in higher quality air, you ensure longer service intervals, improved efficiency. Based on the centrifugal phenomena, gravity and centrifugal force, remove the heavy water particulates resulting in minimum contamination of the tools motor and body from dirt particulates.

Atlas Copco filters separate up to 98% of the water when operating within the design working range. With auto drainage the bowl is emptied when the accumulated water reaches a certain level.

### **REGULATOR- REG\***

Airline regulators used for natural gases and compressed air with built in lockable setting knobs are used to supply a constant flow of air to as required to maintain the efficiency of the tool being used.

The air pressure regulator ensures that the pre-set working pressure remains constant regardless of pressure variations in the intake air and minor variations in the air flow rate. By preventing unnecessary consumption of air, the air pressure regulator improves overall operating economy. Regulators are used to provide consistent air pressure to the tool at all times and to prevent minor air flow fluctuations that can affect the performance of the tool.

F/R units are combined filter / regulators assembled together. F/R units are recommended in every case where both filters and regulators are needed. Filtering and regulating properties are almost the same as for individual units.

### **LUBRICATOR – DIM**

Lubrication for more power and longer lifetime of the tool, lubrication is essential to prolong the life of the vane in the tool motor (unless stated otherwise). The life of the vanes may decrease to as little as 1/10th of the normal working time. Tests in Atlas Copco laboratories showed that the power output of a grinder decreases by 15-20% after 20 minutes when not lubricated. With the use of a lubricator you will prolong the lifetime of a vane motor up to three times and the motor will work much more efficiently, and with less friction.

Filter – FIL

Regulator – REG

Lubricator – DIM

\* (1 bar pressure drop from 6.3 bar means 20% lost efficiency)

Air preparation unit MINI-Range main application is to prepare the air for pneumatic components. MINI-Range units have a 1/4" BSP connection thread, are ideal for small tooling applications.

### WORKING TEMPERATURE

14°F to 122°F

+35°F to +140°F at 145 psi for filters

**NOTE:** For dry compressed air, ice formation must be avoided.

### DESCRIPTION

Sinter filter centrifugal principle, diaphragm-type pressure with relieving feature and lubricator with automatic oil filling.

### MEDIUM

Compressed air, neutral gases

### SUPPLY PRESSURE

21.76 psi to 232 psi

**NOTE:** All separate units, mounting brackets, assembly kits and pressure gauges need to be ordered separately. MAXI-F/R-3/4-NPT, MAXI-F/R-1-NPT, MAXI-FRL-3/4-NPT and MAXI-FRL-1-NPT are delivered with gauge.

Accessories: Maxi FRL stand, metal bowl, pressure language, ball valve are all on accessory page.

## Optional Accessories

### SINGLE FILTER ACCESSORIES

| Designation   | Ordering No. |
|---|--------------|
| Semi/Manual Drain: for MINI series  | 4221 0001 75 |
| Autodrain: For all three ranges   | 4221 0001 76 |
| <b>Metal filter bowl with level indicator and automatic drain (P1 max 10 bar)</b> |              |
| MINI series   | 4221 0002 04 |
| MIDI series   | 4221 0002 05 |
| MAXI series   | 4221 0002 07 |

Mounting bracket kit

### SINGLE REGULATOR ACCESSORIES

| Designation   | Ordering No. |
|---|--------------|
| Pressure Gauge 1: Standard (Metal material) BSP     | 4221 0001 77 |
| Pressure Gauge 1: Standard (Metal material) NPT     | 4221 0001 78 |
| Pressure Gauge 2: Heavy Duty (Larger size in metal) | 4221 0001 79 |

Filter element

### FILTER, REGULATOR AND LUBRICATOR ACCESSORIES

| Designation  | Ordering No. |
|--|--------------|
| <b>MINI</b>  |              |
| Coupling kit - (Steel, for wall mounting, 1x)              | 4221 0001 83 |
| Mounting bracket - (Steel, for control panel mounting, 1x) | 4221 0001 84 |
| Coupling kit - for connecting F+R+L units, 1x)             | 4221 0001 85 |
| <b>MIDI</b>  |              |
| Coupling kit - (Steel, for wall mounting, 1x)              | 4221 0001 86 |
| Mounting bracket - (Steel, for control panel mounting, 1x) | 4221 0001 87 |
| Coupling kit - For connecting F+R+L units, 1x)             | 4221 0001 88 |
| <b>MAXI</b>  |              |
| Coupling kit - (Steel, for wall mounting, 1x)              | 4221 0001 89 |
| Coupling kit - for connecting F+R+L units, 1x)             | 4221 0001 90 |
| Coupling kit - (Steel, for wall mounting, 1x)              | 4221 0002 00 |

Pressure gauge

NOTE: Control panel nut included in the bracket kit for all models

### BALL VALVE (LOCKABLE)

| Designation    | Ordering No. |
|----------------|--------------|
| Size MINI      | 8202 1350 63 |
| Size MIDI      | 8202 1350 64 |
| Size MAXI 3/4" | 8202 1350 65 |
| Size MAXI 1"   | 8202 1350 66 |

Ball valve

NOTE: Control panel nut is included with the bracket

# Optimizer Air Tool Oil

## OPTIMIZER AIR TOOL OIL

Atlas Copco Optimizer air tool oil is a white, oil based lubricant for pneumatic tools. It has excellent antiwear properties and contains additives preventing oxidation and foaming. The Optimizer air tool oil provides a better working environment, compared to conventional mist lubrication oils and is recommended when stringent demands are placed on the working environment.

- Provides a better working environment.
- Excellent antiwear properties.
- Minimizes wear on components.

## Technical Data

|                    |                         |
|--------------------|-------------------------|
| Temperature range  | -13°F to +158°F         |
| Density at 59°F    | 0.13 ounce/gallon       |
| Viscosity at 104°F | 0.34 in <sup>2</sup> /s |
| Pour point         | -54°F                   |
| Flash point COC    | >338°F                  |

| Model              | Ordering No. |
|--------------------|--------------|
| Optimizer 16.9 oz  | 9090 0000 02 |
| Optimizer 33.8 oz  | 9090 0000 04 |
| Optimizer 1 gallon | 9090 0000 06 |

# Ensure the highest air flow and lowest pressure drop of your pneumatic tools

*Whenever tools or pneumatic equipment need to be changed, or you need to make quick connections of hoses to an air outlet, Atlas Copco couplings are the energy efficient and high productivity choice.*

### **ENERGY EFFICIENCY**

All Atlas Copco couplings are designed to ensure minimum pressure drop and thus reduce energy consumption.

### **PRODUCTIVITY**

Exceptionally high air flow ensures full power to your tools.

### **QUALITY**

Atlas Copco couplings are light and compact and the bodies are made of hardened steel, which provides long life in the toughest applications.

### **ERGONOMICS**

The couplings from Atlas Copco features compact dimensions and low weight for the operator.

### **SAFETY**

ErgoQIC and SmartQIC are vented safety versions to minimize the risk of sudden component separation and sound bang. The safety features are according to EN 983 and ISO 4414.

### **THE RANGE**

Atlas Copco offers four product groups of quick couplings in many international standards:

- ErgoQIC - full flow coupling.
- SmartQIC - Safety vented coupling.
- QIC - Entry level coupling.
- Claw - High flow and durable coupling.

## Selection Guide

## ERGOQIC

The ErgoQIC coupling is a ball valve coupling with a safety feature offering a higher flow than ordinary coupling systems. The ErgoQIC is a strong and durable full flow quick coupling with no air restriction inside the coupling. It is suitable for assembly tools, drills and grinders. Upgrading any air system with ErgoQIC will give the benefits of productivity and energy efficiency. ErgoQIC is designed to minimize the risk of sudden component separation and sound bang. The safety features are according to EN 983 and ISO 4414. It is made of hardened steel.

The ErgoQIC disconnects in two steps; first you push in and bend slowly – the pressurized air hose will then vent, and as a second step you can disconnect without risk of harming the operator.

## SMARTQIC

SMARTQIC is the latest generation of pneumatic safety couplings and nipples. The couplings offers high flow and low pressure drop with innovative safety features. The design has a unique safety venting feature when disconnecting, thus minimizing risk of injury to the operator.

Durable and tough, the couplings are made out of zinc-plated steel/brass material and the entire product range complies with safety standards ISO 4414 and EN 983. SMARTQIC couplings also complies with OSHA 1910.95.

Suitable for many types of applications and pneumatic tools; such as screwdrivers, assembly tools, drills and grinders.

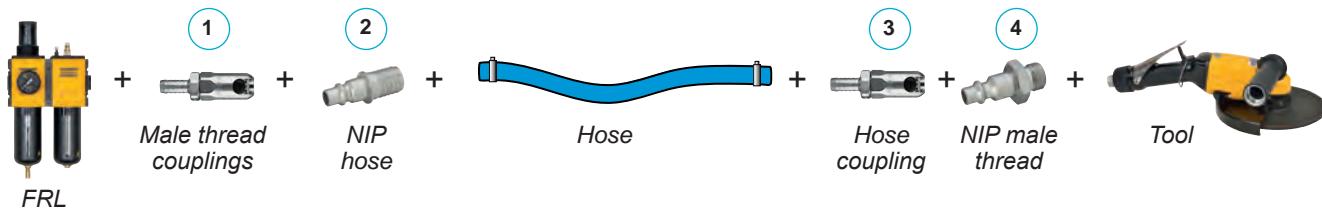

## CLAW

CLAW couplings are made from drop-forged, hardened steel which can withstand rough treatment and ensures a long life even under difficult conditions.

The coupling head is the same for all hose sizes, which can therefore be freely combined. The recommended maximum working pressure is 10 bar.

## HOW TO...

**NOTE:** Most Atlas Copco tools come with a female thread, please check the tread before choosing your coupling and nip selection.

## ErgoQIC 08

### ATLAS COPCO GLOBAL STANDARD

The ErgoQIC 08 is a full flow quick coupling with no air restriction inside the coupling. It is suitable for assembly tools, drills and small grinders. Upgrading any air system with ErgoQIC 08 will give the benefits of productivity and energy efficiency.

- Full flow coupling.
- Ergonomic design, small size and low weight.
- Strong and durable.
- Safety feature according to EN 983 / ISO 4414.
- Protective rubber cover available.
- Main market: Global.

## ErgoQIC 10

### ATLAS COPCO GLOBAL STANDARD

The ErgoQIC 10 is a full flow coupling with no air restriction inside the coupling. It is suitable for assembly tools, drills and grinders. Upgrading any air system with ErgoQIC 10 will give the benefits of productivity and energy efficiency.

- Extreme full flow coupling.
- Strong and durable.
- Minimized connection force.
- Safety feature according to EN 983 / ISO 4414.
- Protective rubber cover available.
- Main market: Global.

## ErgoQIC 08US

### ISO 6150-B / US STANDARD

The ErgoQIC 08US is a full flow quick coupling with no air restriction inside the coupling suitable for assembly tools, drills and small grinders. Upgrading any air system with ErgoQIC 08US will give the benefit of productivity and energy efficiency.

- Full flow coupling.
- Ergonomic design, small size and low weight.
- Strong and durable.
- Safety feature according to EN 983 / ISO 4414.
- Main market: North America, France, Norway and Spain.

## SmartQIC 08US

### ISO 6150-B / US STANDARD

Safety coupling with venting connection, high flow and low pressure drop.

- High reliability with low pressure drop.
- Safety function with vented connection.
- High durability and easy handling.
- High air flow and increased productivity.
- Minimizes hose whip and injuries to operator.
- Long life time.
- Safety feature according to ISO-standard 4414 and EN 983.
- Main market: Benelux, France, Norway and North America.

## ErgoQIC 10US

### ISO 6150-B / US STANDARD

The ErgoQIC 10US is a full flow quick coupling with no air restriction inside the coupling suitable for assembly tools, drills and small grinders. Upgrading any air system with ErgoQIC 10US couplings will give the benefit of productivity and energy efficiency. It is interchangeable with US 3/8" standard nipples.

- Full flow coupling.
- Ergonomic design, small size and low weight.
- Strong and durable.
- Safety feature according to EN 983 / ISO 4414.
- Main market: North America, France, Norway and Spain.

## SmartQIC 10US

### ISO 6150-B / US STANDARD

Safety coupling with venting connection, high flow and low pressure drop.

- High reliability with low pressure drop.
- Safety function with vented connectione.
- High durability and easy handling.
- High air flow and increased productivity.
- Minimizes hose whip and injuries to operator.
- Long life time.
- Safety feature according to ISO-standard 4414 and EN 983.
- Main market: Benelux, France, Norway and North America.

## Technical Data

|                      |                     |
|----------------------|---------------------|
| Max flow capacity    | 91 cfm (7.3 psi ΔP) |
| Economical air flow  | 57 cfm (2.9 psi ΔP) |
| Max working pressure | 230 psi             |
| Temperature range    | -4°F to 158°F       |

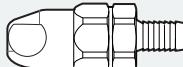

## Technical Data

## ErgoQIC 15US

### ISO 6150-B / US STANDARD

The ErgoQIC 15US is a full flow coupling with no air restriction inside the coupling suitable for large air consuming assembly tools, drills and grinders. Upgrading any air system with ErgoQIC 15US will give the benefit of productivity and energy efficiency. It is interchangeable with US 1/2" standard nipples.

- Extreme full flow coupling.
- Strong and durable.
- Minimized connection force.
- Safety feature according to EN 983 / ISO 4414.
- Main market: North America, France, Norway and Spain.

## SmartQIC 15US

### ISO 6150-B / US STANDARD

Safety coupling with venting connection, high flow and low pressure drop.

- High reliability with low pressure drop.
- Safety function with vented connectione.
- High durability and easy handling.
- High air flow and increased productivity.
- Minimizes hose whip and injuries to operator.
- Long life time.
- Safety feature according to ISO-standard 4414 and EN 983.
- Main market: North America, France, Norway and Spain.

**ErgoQIC 10AC****ATLAS COPCO GLOBAL STANDARD**

The ErgoQIC 10AC is a full flow quick coupling with no air restriction inside the coupling suitable for assembly tools, drills and small grinders. Upgrading any air system with ErgoQIC 10AC will give the benefit of productivity and energy efficiency.

- Full flow coupling.
- Ergonomic design, small size and low weight.
- Strong and durable.
- Safety feature according to EN 983 / ISO 4414.
- Main market: Nordic, Benelux and Italy.

CLAW couplings are made from drop-forged, hardened steel which can withstand rough treatment and ensures a long life even under difficult conditions. The coupling head is the same for all sizes, which can therefore be freely combined.

The recommended maximum working pressure is 10 bar.

- Large bore – machined surfaces give low air resistance and minimum pressure drop.
- Robust claws – will withstand rough handling without deformation.
- Locking lugs – precision-made to provide a reliable lock.
- Special rubber packings – resistant to oil and temperature changes. Max. temperature 80°C (176°F).
- Packing seats – lathe-turned grooves ensure a leak-proof seal.
- Couplings are zinc-plated and thus effectively treated against corrosion.

## BAL-1A

The Atlas Copco valve BAL-1A are suitable for air, water and many other liquids and gases due to the choice of material.

- Lubricated with silicone-free grease which is important when spray-painting.
- Maximum through flow – Full bore valve to DIN standards.
- Housing and ball made of chrome-plated hot-stamped brass MS 58.
- Handle of enamelled aluminum.
- With teflon seals.

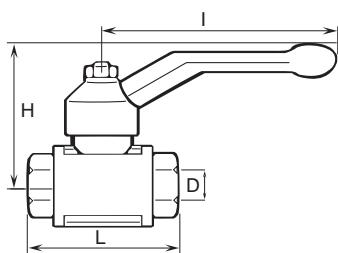

## Technical Data

Maximum working pressure: 232 psi

Working temperature range:  
-22°F to +392°F.

# MultiFlex

## MULTIFLEX SWIVEL MULTI-DIRECTIONAL CONNECTOR

The MultiFlex swivel is an ingenious multi-directional connector. Connect your tool and the hose will stay in the ideal position however much you and the tool move around. The MultiFlex bends and rotates 360° in all directions while the hose stays straight. It takes the effort out of working in those cramped spaces. What's more, the hose feels almost weightless and it reduces hose wear. It's the magic of MultiFlex – a marriage of ergonomic thinking and ingenious design.

- Ergonomic.
- Reduces hose wear.
- High flow capacity.
- Minimum pressure drop.
- Strong and durable.

## Pressure drop diagram for straight hoses

This diagram helps you to choose the right hose according to the air consumption of the tool and the length of the hose. The purpose of the diagram is to ensure that the pressure drop in the hoses does not exceed 2.9 psi.

### HOW TO READ THE DIAGRAM:

Look up the tools required air consumption at 87 psi.

Use this value in the diagram .

What length of hose do you need?

Look at the diagram to see which hose size you need.

Decide which type of hose you need, Atlas Copco Tools has seven different hoses covering all types of needs for pneumatic hand tools.

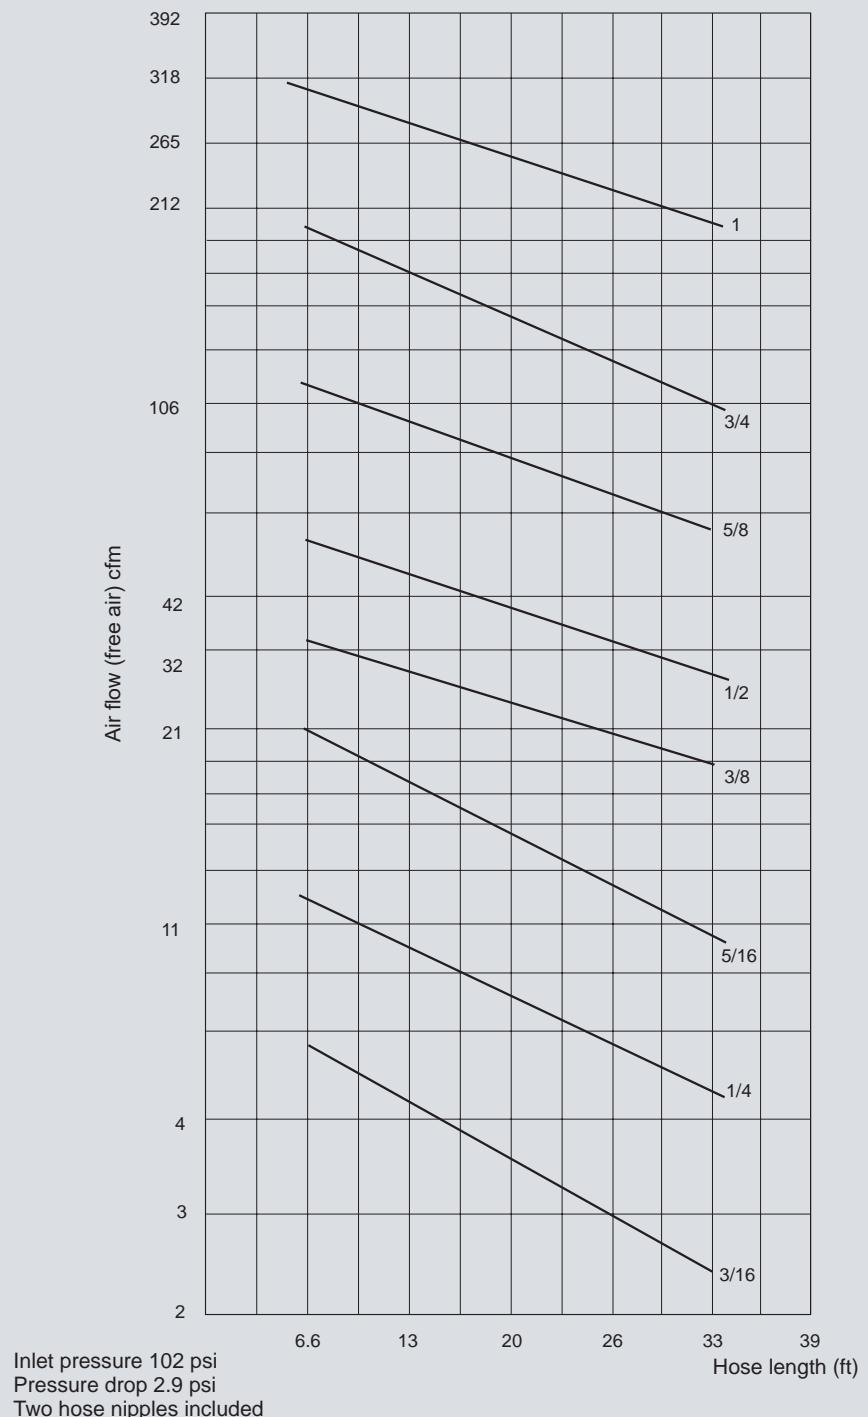

### EXAMPLE

The tool has an air consumption of 21 cfm and the application requires a hose length of 23 ft. These two values have a cross point slightly under the 3/8 inch size hose (23 ft of 3/8 inch hose gives a value of approximately 23.3 cfm).

Therefore a 3/8 inch hose will be suitable.

PRESSURE DROP DIAGRAM FOR HOSES

Internal hose diameter (in)

**CABLAIR HOSES****SUPER-LIGHT FLEXIBLE PVC-HOSE**

Cabair is made of high-strength, high performance PVC compound. The Cabair hose weighs 30-50% less and is much softer and more flexible than conventional PVC hoses. This ensures complete freedom of movement for operators of pneumatic hand tools in any working environment.

- Low weight.
- Extremely soft and flexible.
- Silicone free.
- Ergonomic.
- Working temperature +5°F to +140°F.

| Model      | Hose inside dia in | Hose outside dia in | Max working pressure <sup>a</sup> psi | Max rec. air flow <sup>b</sup> cfm | Weight per 101 ft coil lb | Ordering No. |

| CABLAIR 13 | 1/2                | 13/20               | 188                                   | 45                                 | 6.6                       | 9093 0036 01 |
| CABLAIR 16 | 5/8                | 4/5                 | 160                                   | 91                                 | 11.9                      | 9093 0036 31 |
| CABLAIR 20 | 3/4                | 19/20               | 160                                   | 159                                | 12.8                      | 9093 0036 61 |
| CABLAIR 25 | 1                  | 1 1/5               | 145                                   | 265                                | 23                        | 9093 0036 91 |

<sup>a</sup>With a safety factor of 3 at 68°F (at the max temp of +140°F the working pressure should be reduced by 50%).

<sup>b</sup>The pressure drop will be 3 psi on a hose length of 16 ft.

**CABLAIR ESD****EXTRA FLEXIBLE ANTISTATIC AIR HOSE**

Cabair ESD is an extra flexible antistatic air hose designed specifically for use within the computer manufacturing industry. The hose possesses properties which enable ESDS (electrostatic sensitive devices) to be handled in a protected area with a low risk level, as a result of electrostatic discharge. In addition to a known demand in the computer industry, it is expected that potential exists in the electronics, radio and communication fields. The connection device must be earthed/grounded.

- Extra flexible.
- Antistatic.
- Silicone free.
- Testing in accordance with BS2050:1978 (1998) 4.12.
- Working temperature +5°F to +140°F.

| Model          | Hose inside dia in | Hose outside dia in | Max working pressure <sup>a</sup> psi | Max rec. air flow <sup>b</sup> cfm | Weight per 101 ft coil lb | Ordering No. |

<sup>a</sup>With a safety factor of 3 at 68°F (at the max temp of +140°F the working pressure should be reduced by 50%).

## PVC HOSES

### STRONG PVC HOSE FOR HEAVY-DUTY APPLICATIONS

The PVC hose has high resistance to abrasion, which makes it the ideal hose for tough working environments such as workshops, factories, garages, etc. It is mainly recommended for indoor use.

- Long service life.
- Pliable.
- Transparent.
- Working temperature +5°F to +140°F.

| Model  | Hose inside dia in | Hose outside dia in | Max working pressure <sup>a</sup> psi | Max rec. air flow <sup>b</sup> cfm | Weight per 101 ft coil lb | Ordering No. |

| PVC 25 | 1                  | 1 1/5               | 160                                   | 265                                | 27.5                      | 9093 0039 61 |

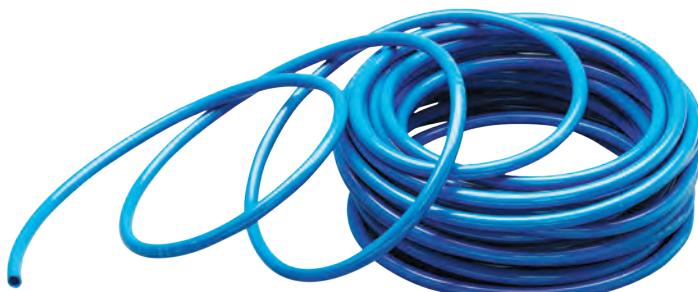

<sup>a</sup> With a safety factor of 3 at 68°F (at the max temp of +140°F the working pressure should be reduced by 50%).

<sup>b</sup> The pressure drop will be 3 psi on a hose length of 16 ft.

## POLUR

### HIGH RESISTANT POLYURETHANE HOSE

The Polur hose is the most environmentally friendly solution. It has high resistance to abrasion and it is oil resistant. The Polur hose has a much longer lifetime than PVC hoses. The Polur is ideal in tough working conditions such as workshops, factories, garages, shipyards and construction sites due to its flexibility, even at minus degrees. Polur is recommended for indoor and outdoor use.

- Oil resistant.
- Flexible.
- Long service life.
- Working temperature -22°F to +140°F.

| Model    | Hose inside dia in | Hose outside dia in | Max working pressure <sup>a</sup> psi | Max rec. air flow <sup>b</sup> cfm | Weight per 82 ft coil lb | Ordering No. |
|----------|--------------------|---------------------|---------------------------------------|------------------------------------|--------------------------|--------------|
| POLUR 08 | 5/16               | 1/2                 | 290                                   | 16                                 | 5                        | 8202 0601 08 |
| POLUR 10 | 3/8                | 11/20               | 232                                   | 28                                 | 5.5                      | 8202 0602 10 |
| POLUR 13 | 1/2                | 7/10                | 188                                   | 45                                 | 9                        | 8202 0603 13 |

<sup>a</sup> With a safety factor of 3 at 68°F (at the max temp of +176°F the working pressure should be reduced by 50%).

<sup>b</sup> The pressure drop will be 3 psi on a hose length of 16 ft, including 2 nipples and at an inlet pressure of 101 psi.

**TURBO****SUPER-LIGHT FLEXIBLE RUBBER HOSE**

The Turbo hose has been developed for flexible use both indoor and outdoor. The hose weighs 30-40% less than conventional rubber hoses, making it ideal for foundries, shipyards, engineering workshops and construction sites. The Turbo hose is oil resistant.

- Extremely low weight.
- Soft and flexible.
- Antistatic.
- Grinding and welding spatter resistant.
- Working temperature -22°F to +158°F.

<sup>a</sup> With a safety factor of 3 at 68°F.

<sup>b</sup> The pressure drop will be 3 psi on a hose length of 16 ft, including 2 nipples and at an inlet pressure of 101 psi.

**RUBBER****DURABLE REINFORCED HEAVY DUTY RUBBER HOSE**

The hose withstands rough handling and is suitable for the most demanding tasks in construction, mining, shipyards, foundries etc. The inner lining is black EPDM rubber, conductive to dissipate static electricity. Reinforcement with high tensile strength made of synthetic textile yarns.

- Durable.
- Antistatic.
- Grinding and welding spatter resistant.
- Working temperature -13°F to +158°F.

<sup>b</sup> The pressure drop will be 3 psi on a hose length of 16 ft, including 2 nipples and at an inlet pressure of 101 psi.

## RUBAIR

### DURABLE REINFORCED HEAVY DUTY RUBBER HOSE

The Rubair hose is double reinforced to fulfil all general heavy duty demands and is recommended for indoor and outdoor use. The Rubair hose is oil resistant.

- Durable.
- Antistatic.
- Grinding and welding spatter resistant.
- Working temperature -4°F to +176°F.

<sup>a</sup> With a safety factor of 5 at 68°F.

<sup>b</sup> The pressure drop will be 3 psi on a hose length of 16 ft, including 2 nipples and at an inlet pressure of 101 psi.

**SPI****ELASTIC HOSE FOR VERTICAL AND HORIZONTAL APPLICATIONS**

SPI elastic spiral hose is ideal for air tools used at varying distances from a fixed air outlet. It is easily stretched and retracts immediately when released. When used with hand tools, its self-storage principle ensures that the hose is kept off the floor and out of the way of the operator. The SPI 1 and SPI 2 have ball bearing swivels fitted on the long hose side to allow 360° rotation. All spiral hoses, except the SPI4, are fitted with plastic spring guard. SPI is the ideal hose in combination with a balancer.

- Self-retractable.
- Light and flexible.
- Strong and durable.
- Tubing material: Polyurethane (100% PUR).
- Hardness: Shore A 98 +2.
- Colour: Blue.
- Working pressure: 116 psi at 73°F.
- Burst pressure: 363 psi at 73°F.
- Temperature range: -40°F to +158°F.

**Dimensions**

<sup>a</sup> At inlet pressure 87 psi and pressure drop 7 psi.

Teflon coating on NPT threads.

# Productivity Kits

Productivity kits boost productivity, extend tool lifetime and ensure minimum pressure drop.

Each productivity kit includes ball valve, air preparation unit, and the couplings, hose and nipples needed for correct and safe installation of the tool.

Just choose the correct productivity kit based on the air flow requirement of the tool and whether the tool needs lubrication or not. You'll be surprised how much the productivity kit improves the performance of the tool.

- Improves the performance of the tool.
- Fast and easy installation.
- Extends tool lifetime.

## PRODUCTIVITY KITS FOR SCREWDRIVERS, DRILLS AND GRINDERS

**NOTE:** Tool nipple is not included in the Productivity kit and needs to be order separately together with the tool.

# Pre-mounted Hose Kits

## PRE-MOUNTED HOSE KITS

Atlas Copco hose kits provides an easy way to choose the right hose and coupling combination for pneumatic tools. Each kit is ready for immediate use without the need of assembly tools.

- Correct combination hose – coupling.
- Leak free hose connections.
- Immediate use.

**HM LIGHT**

The HM Light has a robust design with a high impact composite casing. The outlet slot is optimized to provide an ideal pull-out angle for the hose. The HM Light is recommended for small and medium screwdrivers, small and medium pulse tools, small drills, impact wrenches up to 1/2" size and riveting and chipping hammers.

- Snap-on, pivoting wall bracket
- PVC/PUR hose
- Hose end provided with pressed fitting and steel spiral hose protector (NPT and BSP)
- Hose easily replaced when needed
- Drum with ball bearings on both sides
- Working temperature: +32°F - +122°F
- Inlet hose length: 3.3 ft.

### HM OPEN

The HM Open has an open composite casing and 10 mm or 13 mm hose. HM Open is a reliable, medium sized hose reel recommended for screwdrivers, impact wrenches, pulse tools, drills, chipping and riveting hammers and grinders up 1000 W.

- Rubber hose
- Outlet roller position can be adjusted through 120 degrees for optimal pull-out angle
- Hose end provided with steel spiral hose protector (NPT and BSP)
- Latch function is easily disengaged
- Spring tension is easily adjusted
- Floor, wall or ceiling mounting
- Working temperature: +14°F - +140°F
- Inlet hose length: 3.3 ft.

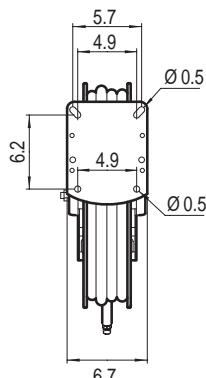

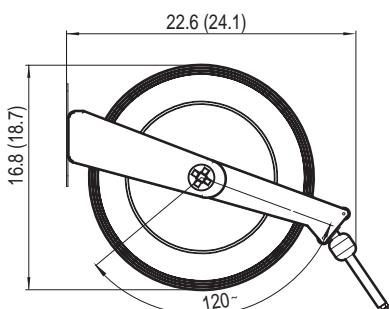

| Model         | Hose length ft | Hose type | Connection inlet   |                                  | Connection distribution | Economical air flow (at 3 psi pressure drop) cfm | Max air flow capacity (at 7 psi pressure drop) cfm | Weight lb | Ordering No.    |

**HM OPEN FLEX**

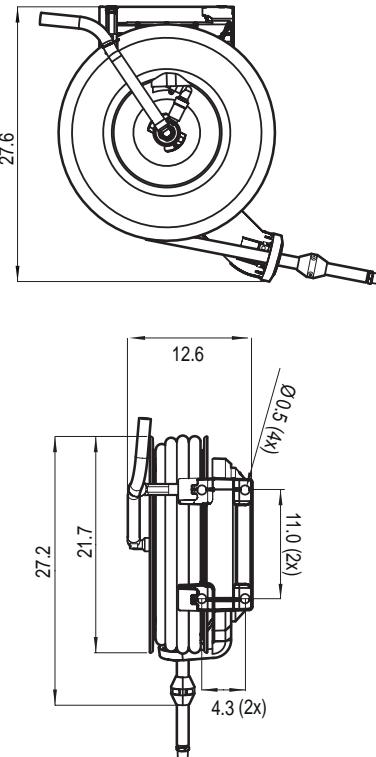

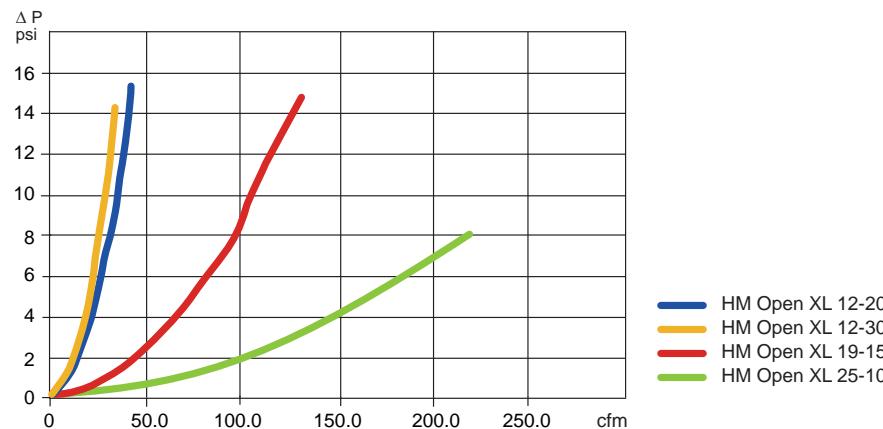

Hose reels in the HM Open Flex series have an open steel casing and 3/8" or 1/2" hose. HM Open Flex hose reels are recommended for screwdrivers, impact wrenches, pulse tools, drills, chipping and riveting hammers and grinders up to 1.3 hp.

- Kink resistant PUR hose or spatter resistant rubber hose.
- Floor, wall or ceiling mounting.
- Revolving hinge for flexible use.
- Working temperature: -22°F to +140°F.
- Max working pressure: 290 psi.
- Inlet hose length: 5 ft.

## HOSE REEL BALANCER – HRIL

Models in the HRIL range of hose reel balancers are specifically designed for use with small pneumatic hand tools.

The integrated air hose and support cable ensure the work area is kept tidy and the tool is easy to control.

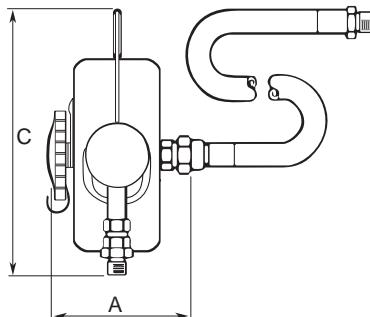

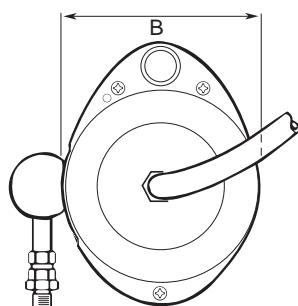

- Ergonomics – The retraction force over hose travel remains almost constant which minimizes load on the operator and ensures smooth operation.
- An easily adjusted rubber stop is fitted on the hose which allows the tool to be set at the optimum position.
- The retraction force is easily adjustable by means of a hand wheel on the rear casing (this can be removed if desired, once the retraction force is set).
- Long service life – The design features a rugged casing, self lubricating spindle bearing bushes and a 360 degrees rotary inlet connector.
- A durable hose is fitted with additional protection to prevent excessive bending around air connectors.
- Low pressure drop – The HRIL balancers have very good flow characteristics.

| Model  | Capacity range |         | Max rec.<br>air flow <sup>a</sup><br>cfm | Hose<br>travel<br>ft | Weight |     | Max<br>working<br>pressure<br>psi | Dimensions |         |         | Ordering No. |

**BLOW GUN BG-SERIES**

Atlas Copco blow guns BG-series are hard wearing, user friendly solution for all cleaning applications. The plastic body offer flexibility in handling for both left and right handed users, it insulate against cold and it reduce the risk of scratches to worksurfaces. The blow gun has excellent throtteling properties allowing easy regulation of the air flow. The blow guns have air inlet thread in brass that is fully covered by the plastic body. The blowguns are with star tip to reduce risk of damages or injuries if the tube is pressed against workpiece or skin and is therefore in compliance with the OSHA Safety Standards.

- High flow capacity
- Suspension
- Plastic body to avoid scratches
- Air inlet thread in brass
- Star tip, OSHA Safety Standards

## Service solutions at Atlas Copco

*Every production line and industrial site is unique and has its own challenges.*

*With that in mind, our service solutions are designed to help you get the most out of your industrial equipment. We combine analyses of production data with know-how and expertise in order to enhance your productivity and quality; while keeping you cost efficiency maintenance under control.*

*Our service offering consists of various services and options to further customise your maintenance agreement and fit your needs:*

# Service Packages

## Start-up

Starting a new operation requires meticulous planning, investment and training. Getting started quickly and smoothly ensures you're delivering value from the first day. Our start-up service solutions ensure that customers equipment is 'right first time', whilst also ensuring it delivers the optimum quality level and cost efficiency.

## Maintenance

Atlas Copco can manage your entire maintenance cycle, whilst supporting our customers with preventive maintenance programs. Our maintenance solutions help customers optimize performance, decrease production downtime, whilst ensuring the right quality of your products. All within a controlled maintenance cost.

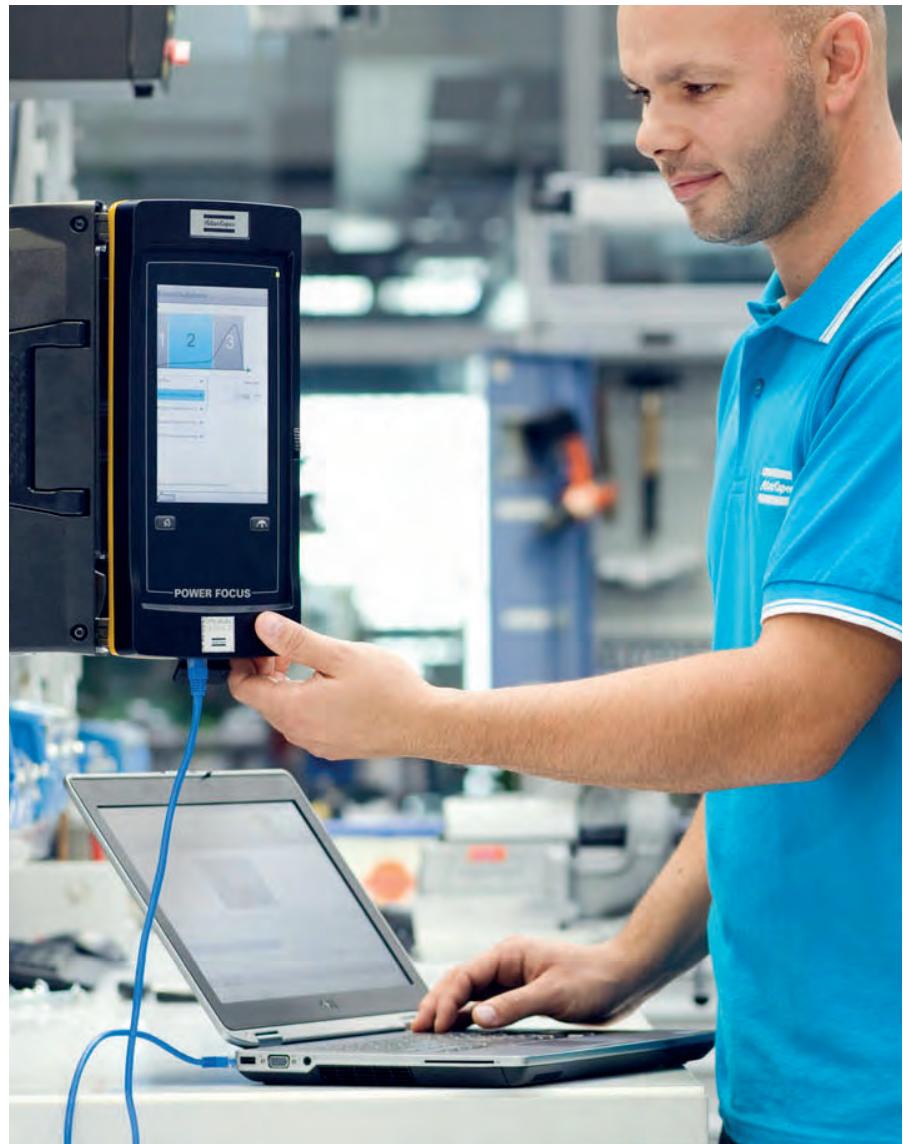

## Optimization

In your production, there are many factors which might affect the right performance of your equipment. Not only is the tooling important, but also the operator, materials, joint conditions and software. Through our optimization services, we offer the possibility to improve assembly processes whilst optimizing performance.

## EasyStart

EasyStart offers a trouble-free and efficient start of operations for your tightening system. Through a globally standardized and certified process for every step, from programming to training, you will get it right the first time, saving time and money.

## RapidRepair

RapidRepair, ensures damaged tools are quickly repaired and back in production with minimal administration, cost and inconvenience.

With a predefined, easy and practical process, we take full care of the whole repair cycle – with a leading turnaround time from door to door, because easy is both faster and less expensive.

## ToolCover

ToolCover maintenance solutions help optimize performance and gain efficiencies in production, whilst minimizing tool costs and production risks.

With a modular set of products, ToolCover is designed to meet specific needs and tool usage.

ToolCover solutions are always:

- Reducing maintenance & Repair time
- Built on global best practice processes and service certificates
- Offered with a fixed Preventive Maintenance cost
- Coupled with discounts on spare parts.

## Calibration

With our network of calibration laboratories we offer a complete package of calibration services to help control quality for all assembly tools and measurement equipment in production.

The most efficient way to control quality:

- Traceability and document management.
- Calibration/verification of transducerized tools and controllers.
- Torque adjustment and capability test.
- Verification test for a specific application.
- Accredited and factory calibration of measurement equipment.
- Testing and calibration of click and torque wrenches.

## TechCover Software Solutions

TechCover support solutions help protect production investment while optimizing production performance, quality and availability, whilst minimizing production risks.

With a modular set of products, TechCover is designed to meet your specific support requirements.

TechCover solutions are always:

- Reducing Resolution Times.
- Built on global best practice processes and support expertise.
- Offered with a fixed cost.
- Coupled with free access on software updates.

**BASED ON YOUR NEEDS, YOU CAN CHOOSE BETWEEN PROTECT, STABILITY, UPTIME.**

Please see below our value proposition

The diagram illustrates three levels of maintenance, each represented by a hexagonal icon:

- ToolCover Protect**: Aligns with **Uptime**, **Quality**, and **Cost eff.**
- ToolCover Stability**: Aligns with **Uptime**, **Quality**, and **Cost eff.**
- ToolCover Update**: Aligns with **Increasing value**, **Uptime**, **Quality**, and **Cost eff.**

A vertical arrow on the right indicates **Increasing value** from bottom to top. A horizontal arrow at the bottom indicates **Increasing use of production data** from left to right.

## Production optimization

Zero fault production at the lowest total cost. Atlas Copco Service can help improve productivity within an existing assembly, or in a new production project.

We ensure that the focus remains on quality and efficiency from concept and R&D, through to full production:

- Joint analysis and optimization.
- Process optimization
- Program optimization

## Training

Training provide your personnel with the capability to determine whether production issues and interruptions are the result of problems with the tooling or with the parts used in assembly.

Help raise productivity. Having well-trained operators, line engineers and quality people in your operations, means higher productivity and quality.

We have developed an extensive range of training courses that are provided locally through the Atlas Copco global network.

## ResultScan

ResultScan reduces your risk of sending defective products to your customers. Thereby decreasing costs of warranty, rework and recall.

It identifies your application's optimal monitoring limits. Installing these limits enables you to identify cross threading, material problems and operational errors, before the customer does. It reduces your risk of sending defective products to customers. Thereby decreasing costs of warranty, rework and recall.

| ETD M – Electric screwdriver, hand-held "Digitork", MicroTorque       | MRTT-B – Screwdriver for low torque applications            |
| ETD SL – Electric screwdriver, straight model, TENSOR SL              | MT TH – Torque In/Line rotary transducer                    |
| ETD ST – Electric nutrunner, shut-off type, straight model, TENSOR ST | MT TR – Torque&Angle In/Line rotary transducer              |
| ETD STR – Electric screwdriver, straight model, TENSOR STR            | MT TRA – Stationary torque transducer                       |
| ETF M – Electric screwdriver, fixtured "Digitork", MicroTorque        | MT TS – Manual screwdriver torque transducer                |
| ETF MT – Electric screwdriver, fixtured transducerized, MicroTorque   | MultiFlex – Swivel connectors                               |
| ETF SL – Electric screwdriver, shut-off type, fixture, TENSOR SL      | NIP – Nipple  |
| ETO ST – Electric nutrunner, shut-off type, open end, TENSOR ST       | Optimizer – Air tool oil                                    |
| ETO STB – Battery nutrunner, tube nut, TENSOR STB                     | PFD – Power feed drills                                     |
| ETP SB – Battery nutrunner, pistol grip TENSOR SB                     | POLUR – Polyurethane hose                                   |
| ETP SL – Electric screwdriver, shut-off type, pistol grip, TENSOR SL  | PVC – PVC hose  |
| ETP STB – Battery nutrunner, pistol grip TENSOR STB                   | QIC – Quick coupling  |
| ETP ST – Electric nutrunner, shut-off type, pistol grip, TENSOR ST    | QRTT – Transducer for spindle and fixtured tool calibration |
| ETP STR – Electric screwdriver, pistol grip, TENSOR STR               | QST – Fixtured electric nutrunner, shut-off type            |
| ETD ES – Electric nutrunner, shut-off type, angle model, TENSOR ES    | RBB – Bucking bar, vibration damped                         |
| ETV SB – Battery nutrunner, angle model, TENSOR SB                    | REG – Air preparation unit, regulator                       |
| ETV SL – Electric screwdriver, angle model, TENSOR SL                 | RIL – Balancer  |
| ETV ST – Electric nutrunner, shut-off type, angle model, TENSOR ST    | RRC – Chipping hammer, conventional type                    |
| ETV STR – Electric screwdriver, angle model, TENSOR STR               | RRD – Chipping hammer, vibration damped                     |
| ETV STB – Battery nutrunner, angle model, TENSOR STB                  | RRF – Chipping hammer, vibration damped                     |
| ETX – Fixtured electric nutrunner, shut-off type                      | RRH – Riveting hammers, vibration damped                    |
| FIL – Air preparation unit, filter                                    | RRN – Riveting hammer, conventional type                    |
| GHP – Torque arm, MicroTorque   | RTP – Pneumatic nutrunner, pistol grip                      |
| GTG – Turbo grinder   | RUBAIR – Rubber hose  |
| GTR – Straight turbo grinder  | RVM – Scaler, vibration damped                              |
| GUN – Blow gun  | SM – Torque arm, parallel                                   |
| HM – Hose reel  | SMC – Carbon arm  |
| HRIL – Hose reel  | SML – Torque arm, linear                                    |
| HT – Torque testers   | SPI – Spiral hose   |
| IRTT-B – In-line rotary torque and torque/angle transducer            | SMS – Torque arm, linear                                    |
| JSB – Joint Simulator Bench   | SRB – Battery nutrunner                                     |
| LBB – Pistol grip and straight drill                                  | SRTT-B – Static reaction torque transducer                  |
| LBD M – Modular drill, straight model                                 | SRTT-L – Transducer for STanalyser                          |
| LBR – Pneumatic nutrunner, stall type, ratchet wrenches               | STB – Static Transducer Bench                               |
| LBS – Micro stop drill  | TBP – Battery nutrunner                                     |
| LBV – Angle drill   | TPS – Tool Positioning System                               |
| LBP M – Modular drills, pistol model                                  | TT – Torque testers   |
| LCS – Circular cutters  | TURBO – Rubber hose   |
| LGB – Tapper  | TWIST – Pneumatic screwdriver, slip-clutch                  |
| LMD – Pneumatic nutrunner, stall type, straight model                 | WP – Balancer   |
| LMK – Pneumatic nutrunner, stall type, worm drive                     |   |
| LMP – Pneumatic nutrunner, stall type, pistol grip                    |   |
| LMS – Impact wrenches, non shut-off type                              |   |

## **Industrial Tools Division Warranty**

Atlas Copco Tools and Assembly Systems warrants to the customer that the products manufactured by Atlas Copco Tools and Assembly Systems and its affiliates shall be free of defects in design, material, and workmanship for the following periods of time:

- A. For portable industrial hand tools and hoists, twelve (12) months from date of shipment to customer.
- B. All 2000 Series Tools, accessories and parts, three (3) months from date of shipment of customer.

Should any failure to conform with this warranty appear prior to or after shipment of the product to customer during the specified periods under normal and proper use and provided the product has been properly stored, installed, handled and maintained by the customer, Atlas Copco Tools and Assembly Systems shall, if given prompt notice by customer, repair or replace the nonconforming product or authorize repair or replacement by the distributor. Note: This does not include standard wear items such as vanes, o-rings, etc.

Replaced products become the property of Atlas Copco Tools and Assembly Systems.

Atlas Copco Tools and Assembly Systems warrants Products or parts thereof repaired or replaced pursuant to the above warranty, under normal or proper use, storage, installation and maintenance, against defects in design, workmanship and material for a period of 30 days from date of start-up of such repaired or replaced equipment or parts or the expiration of the original product warranty, whichever is longer.

Atlas Copco Tools and Assembly Systems' warranty does not extend to products not manufactured by Atlas Copco Tools and Assembly Systems or its affiliates. As to such products, customer shall be entitled to proceed only upon the terms of that particular manufacturer's warranty does not apply to defects in material provided by customer or design stipulated by customer.

Use products, products not manufactured by Atlas Copco Tools and Assembly Systems or its affiliates and products excluded from the above warranties are sold AS IS with no representation or warranty, and ALL WARRANTIES OF QUALITY, WRITTEN, ORAL OR IMPLIED, other than may be expressly agreed to by Atlas Copco Tools and Assembly Systems. In writing, INCLUDING WITHOUT LIMITATION, WARRANTIES OR MERCHANTABILITY AND FITNESS ARE HEREBY DISCLAIMED.

THE FOREGOING WARRANTIES ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES OF QUALITY, WRITTEN, ORAL OR IMPLIED AND ALL OTHER WARRANTIES INCLUDING WITHOUT LIMITATION ANY WARRANTY OF MERCHANTABILITY OR FITNESS ARE HEREBY DISCLAIMED. Correction of nonconformities as provided above shall be distributor's exclusive remedy and shall constitute fulfillment of all liabilities of Atlas Copco Tools and Assembly Systems (including any liability for direct, indirect, special incidental or consequential damages) whether in warranty, strict liability, contract, tort, negligence or otherwise with respect to the quality of or any defect in products delivered here under.

## **OSHA Statement**

Atlas Copco Tools and Assembly Systems ("the company") represents to the original user that the products advertised herein are designed to comply with The Occupational Safety and Health Act of 1970 and as amended as of the date of manufacture. The company shall not be responsible for any failure to so comply with the Act which results from the location, operation, use or maintenance of the products or from alteration of the products by persons other than the company or from any option or accessory of the products which was available to the original user but omitted at his direction, or from design or instructions furnished by the original user.

The company's responsibility herein is limited to modification or replacement of the products so that the products conform to the regulations applicable at the time of manufacture or at the option of the company to refund to the original user the purchase price less an allowance for normal depreciation upon the return of the products to the company. By special request, a sound warranty can be offered; otherwise all standards under the Act with respect to noise are specifically excluded.

Whether in relation to the above or otherwise, the company will not indemnify the original user for any fines; penalties neither imposed nor are liable for loss due to delay or any special, indirect or consequential damages of any nature whatsoever.
